

Facility ID: 0857040961 Issuance type: Title V Draft Permit

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part III" and before "I. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0857040961 Issuance type: Title V Draft Permit

Part II - Specific Facility Terms and Conditions

a State and Federally Enforceable Section

1. Allowable Emission Limitation(s):

The emissions from this facility shall not exceed the following:

a. The emissions [as defined by OAC 3745-77-01 (BB)] of hazardous air pollutants (HAPs), as identified in Section 112(b) of Title III of the Clean Air Act, shall not exceed 10 TPY for any single HAP as a rolling 12-month summation, and 25 TPY for any combination of HAPs, as a rolling 12-month summation.

b. Compliance with the above limitations shall be achieved by restricting gasoline, distillates and additive throughputs.

2. Record Keeping Requirements:

For the purposes of determining annual emissions, the permittee shall maintain monthly records for the facility of the following information:

- a. the total emissions for each single HAP; and,
- b. the total emissions for all HAPs combined.

3. Reporting Requirements:

The permittee shall submit annual reports which identify the following:

- a. the total actual emissions of each individual HAP from the facility; and,
- b. the total actual emissions of all of the HAPs from the facility.

These annual reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

4. Compliance and Testing Requirements:

a. The HAP emissions from gasoline truck loading and storage shall be determined using the following emissions factors:

- i. benzene - 0.0102 pound of benzene emissions per pound of VOC emissions;
- ii. cumene - 0.0001 pound of cumene emissions per pound of VOC emissions;
- iii. toluene - 0.0166 pound of toluene emissions per pound of VOC emissions;
- iv. xylene - 0.0058 pound of xylene emissions per pound of VOC emissions;
- v. ethyl benzene - 0.001 pound of ethyl benzene emissions per pound of VOC emissions;
- vi. n-hexane - 0.0168 pound n-hexane emissions per pound of VOC emissions;
- vii. isooctane - 0.0052 pound of isooctane per pound VOC emissions.

These factors are based on liquid weight percent (weight fraction) of each HAP in the gasoline. Speciated emissions were estimated based on equations found in AP-42, Section 12.4.

b. VOC emissions from the storage tanks shall be determined using the USEPA's "Tanks Program 3.0."

c. The HAP emissions from distillates truck loading and storage and fugitive emissions shall be determined using USEPA's "VOC/PM Speciation Data System", version 1.50, Oct. 1992.

Should more accurate emission factors be developed during the current permit cycle, the permittee shall use them, provided the new emission factors are mutually agreeable to the Ohio EPA, the Regional Air Pollution Control Agency and the Sun Company, Inc.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0857040961 Issuance type: Title V Draft Permit

b State Only Enforceable Section

1. The following insignificant emission units are located at this facility. Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations, as well as any emission limitation and/or control requirements contained within a Permit to Install for the emissions unit.
 - T008: 1000 gal distillate storage tank
 - T009: 1000 gal kerosene storage tank
 - T011: 1000 gal additive storage tank
 - Z001: 1000 gal ethanol storage tank
 - Z002: 1000 gal ethanol storage tank
 - Z003: Fugitive emissions from pumps, valves and flanges
 - Z004: 1000 gal ethanol storage tank
 - Z005: 1000 gal ethanol storage tank
 - Z006: Heating oil tank #1 (for furnace that supplies heat to the bldg)
 - Z007: Heating oil tank #2 (for furnace that supplies heat to the bldg)
 - Z008: Oil/Water separator
2. The facility is hereby notified that this permit, and agency records concerning the operation of these permitted emissions units are subject to public disclosure in accordance with OAC rule 3745-49-03.

Part III - Terms and Conditions for Emissions Units

[Go to the top of this document](#)

Facility ID: 0857040961 Emissions Unit ID: J001 Issuance type: Title V Draft Permit

A. State and Federally Enforceable Section

The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.

1. None.

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Gasoline and distillate loading rack controlled by a Hydrotech carbon adsorption - absorption VRU	OAC rule 3745-21-09 (Q)	See Additional Terms and Conditions #2

2. Additional Terms and Conditions

- a. The loading rack shall be equipped with a vapor collection system whereby during the transfer of gasoline to any delivery vessel:
 - (a)
 - i. All vapors displaced from the delivery vessel during loading are vented only to the vapor collection system.
 - ii. The pressure in the vapor collection system is maintained between minus 6 and plus 18 inches of water gauge pressure.
 - b. The loading rack shall be equipped with a vapor control system whereby:
 - i. All vapors collected by the vapor collection system are vented to the vapor control system.
 - ii. The mass emissions of VOC from the vapor control system do not exceed 0.67 pound of VOC per 1000 gallons (80 milligrams of VOC per liter) of gasoline loaded into the delivery vessel.
 - iii. Any liquid gasoline returned to a stationary storage tank from the vapor control system is free of entrained air to the extent possible with good engineering design.
 - c. A means shall be provided to prevent drainage of gasoline from the loading device when it is not in use or to accomplish complete drainage before the loading device is disconnected.
 - d. All gasoline loading lines and vapor lines shall be equipped with the fittings which are vapor tight.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

II. Operational Restrictions

1. The annual throughputs of gasoline, distillates and additive shall not exceed 1,116,900,000 gallons, 193,146,042 gallons, and 1,116,900 gallons, respectively. To ensure enforceability during the first twelve calendar months of operation following the issuance of this permit, this permittee shall not exceed the

throughput limitations specified in the following table:

Maximum Allowable Cumulative Throughput (gallons) for:	
Months Gasoline	Distillate Fuels Additive
1	93,075,000 16,095,504 93,075
1 - 2	186,150,000 32,191,007 186,150
1 - 3	279,225,000 48,286,511 279,225
1 - 4	372,300,000 64,382,014 372,300
1 - 5	465,375,000 80,477,518 465,375
1 - 6	558,450,000 96,573,021 558,450
1 - 7	651,525,000 112,668,525 651,525
1 - 8	744,600,000 128,764,028 744,600
1 - 9	837,675,000 144,859,532 837,675
1 - 10	930,750,000 160,955,035 930,750
1 - 11	1,023,825,000 177,050,539 1,023,825
1 - 12	1,116,900,000 193,146,042 1,116,900

After the first twelve calendar months of operation, compliance with the annual throughput limitations shall be based upon a rolling 12-month summation.

2. The permittee shall not permit gasoline to be spilled, discarded in sewers, stored in open containers or handled in any other manner that would result in evaporation.
3. The permittee shall repair within 15 days any leak from the vapor collection system and vapor control system when such leak is equal to or greater than 100 percent of the lower explosive limit as propane, as determined under paragraph (K) of OAC rule 3745-21-10.
4. The following VRU parameters have been identified as key operating parameter for which acceptable operating levels have been established. The permittee shall operate the VRU within these acceptable operating levels:
 - a. to ensure proper regeneration of the carbon beds, the maximum vacuum pulled during the regeneration cycle shall be greater than or equal to 25 inches Hg and the air purge solenoid must be open;
 - b. to ensure proper absorption by the absorption tower, the gasoline supply temperature shall not exceed 90 degrees F;
 - c. to ensure a proper flow rate from the absorption tower to the carbon bed, the absorber pressure shall not exceed 15 PSI; and
 - d. to ensure proper adsorption, the carbon bed temperature, at all levels, shall not exceed 135 degrees F.

Operation of the VRU outside of these specified operating levels is indicative of possible non-compliance with the mass emission limits and shall trigger an investigation to establish correct operation, along with maintenance and/or repair activities, and/or stack emission testing to verify compliance.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall maintain monthly records of the following information:
 - a. the total, individual throughputs of gasoline, distillates and additive, in gallons;
 - b. the cumulative, individual throughputs of gasoline, distillates and additive, in gallons, for each calendar month during the first 12 months of operation following the issuance of this permit; and,
 - c. beginning after the first twelve calendar months of operation following the issuance of this permit, the rolling 12-month summations of the total, individual throughputs of gasoline, distillates and additive, in gallons.
2. The permittee shall implement, within 90 days of the issuance of this permit, a preventative maintenance program (PMP) for the Hydrotech Carbon Adsorption - Absorption Hydrocarbon Vapor Recovery Unit (VRU) which has been approved by the Regional Air Pollution Control Agency. The PMP shall include an annual inspection of the VRU by a qualified individual trained in the operation and inspection of carbon adsorption-absorption systems. The resultant report shall be maintained on site and shall be made available during subsequent inspections by the Regional Air Pollution Control Agency.
3. The permittee shall collect and record the following information each day:
 - a. The permittee shall maintain the data required by the "Hydrotech Daily Operating Check Sheet," as submitted to the Regional Air Pollution Control Agency on January 23, 1997, on a daily basis (i.e., Monday through Friday). Any subsequent changes to this check sheet shall be mutually agreeable to the Sun Company, Inc. and the Regional Air Pollution Control Agency;
 - b. The permittee shall maintain a log or record of operating times for the capture (collection) system, control device, monitoring equipment, and the associated emissions unit.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports to the Director (the appropriate District Office or local

air agency) which identify the following information:

- a. all exceedances of the rolling, 12-month throughput limitations for gasoline, distillates and additive; and
- b. all exceedances of the respective maximum allowable cumulative throughputs for gasoline, distillates and additive for the first 12 calendar months of operation following the issuance of this permit.

The reports shall be in writing and shall be submitted to the Director (the appropriate District Office or local air agency) within 45 days after the deviation occurs.

2. The permittee shall submit an annual report which specifies the total, individual annual throughputs of gasoline, distillates and additive. This report shall be submitted by April 15 of each year and shall cover the previous calendar year.
3. The permittee shall submit deviation (excursion) reports that identify any parameter readings that do not meet the acceptable level for each VRU key operating parameter established in A.II.4 above. The report shall include a written description of why the unacceptable reading occurred, and an explanation of any action taken or required to correct the unacceptable reading.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

V. Testing Requirements

1. To calculate emissions for the purpose of determining compliance with the applicable emission limitations of this permit, the permittee shall comply with the following:
 - a. VOC emissions from gasoline truck loading shall be determined using the most recent VOC stack test results and a vapor tightness loss rate of 9 mg/l from the trucks. The 9 mg/l leakage emission factor is calculated using 0.5% as the average leakage from a truck passing the 3-inch pressure decay test (USEPA 1980: Bulk Gasoline Terminals - Background Information for Proposed Standards, Table C-4).
 - b. The VOC emissions from the distillates loading shall be determined using the fourth edition of AP-42, Chapter 4.4.
 - c. The VOC emissions from fugitive emissions (e.g., valves fitting and pumps) shall be determined using EPA-453/R-95-017, "Protocol for Equipment Leak Emission Estimates."
2. Compliance Methods - Compliance with the emission limitation(s) in Section A.1. of these terms and conditions shall be determined in accordance with the following method(s):
 - a. Emission Limitation - 0.67 pound of VOC/1000 gallons of gasoline loaded into the delivery vessel.
Applicable Compliance Method - Compliance shall be based on stack testing per OAC rule 3745-21-10.
 - a. The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:
 1.
 - a. The emission testing shall be conducted within 12 months prior to permit renewal during the summer months when the gasoline vapor pressure is highest.
 - b. The following test methods and procedures from 40 CFR Part 60 shall be employed to demonstrate compliance with the allowable VOC mass emission rate(s):
Method 2A inlet vapor volume
Method 21 potential leak sources
Method 25B inlet and outlet VOC concentration
Subpart XX [60.503(d)] tank truck maximum pressure
 - c. The test(s) shall be conducted while the emissions unit is operating at or near its maximum capacity, unless otherwise specified or approved by the appropriate Ohio EPA District Office or local air agency.
 - d. The VRU parameters for which acceptable operating ranges have been established in A.II.4 above shall be recorded during the test, in a manner acceptable to RAPCA, to verify acceptability.
 - b. Not later than 30 days prior to the proposed test date(s), this facility shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the tests, and the person(s) who will be conducting the tests. Failure to submit such notification for review and approval prior to the tests may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission tests.

Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to assure that the emissions unit operation and testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions tests shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following completion of the test(s).

A. State and Federally Enforceable Section

The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.

1. None.

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
air stripper associated with groundwater remediation	OAC rule 3745-21-07 (G)(2)	8 lbs/hr, 40 lbs/day organic compounds

2. Additional Terms and Conditions

- a. The total concentration of benzene, toluene, ethylbenzene and xylene (BTEX), in the influent groundwater stream to this emissions unit shall not exceed 8400 parts per billion (ppb).

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

II. Operational Restrictions

1. The daily throughput of groundwater through this emission unit shall not exceed 432,000 gallons per day.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall take samples of the influent groundwater stream at least once per month and conduct, or have conducted, an analysis for the BTEX compounds. The analysis shall be conducted in accordance with U.S. EPA modified RM 602.
2. The permittee shall maintain monthly records which list the daily throughput of groundwater through this emission unit and the results of the sampling/analysis required above.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

IV. Reporting Requirements

1. The permittee shall notify the Director (or appropriate District Office (DO) or local air agency(LAA)) in writing of any record of deviation of the BTEX concentration limitation and/or the daily groundwater throughput limitation. This notification shall include a copy of such record, including any corrective action(s) taken, and shall be sent to the Director (DO or LAA) within 45 days after the deviation occurs.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

V. Testing Requirements

1. Compliance Methods -
Compliance with the emission limitation(s) in Section A.1 of these terms and conditions shall be determined in accordance with the following method(s):
2. Emission Limitation -
8400 parts per billion (ppb)
Applicable Compliance Method -
Compliance shall be based upon the monitoring and record keeping requirements specified in Section A.III.
3. Throughput Limitation -
432,000 gallons per day
Applicable Compliance Method -
Compliance shall be based upon the record keeping requirements specified in Section A.III.2.

- 4. Emission Limitation -
8 lbs/hr organic compounds

Applicable Compliance Method -
Actual hourly emissions shall be determined by multiplying the maximum hourly throughput of 18,000 gallons/hr times the measured BTEX concentration (ppb), times the groundwater weighted average density of 8.34 lbs/gal. Compliance shall be determined by showing compliance with the concentration limitation in section A.III.1.

- 5. Emission Limitation -
40 lbs/day organic compounds

Applicable Compliance Method(s) -
Actual daily emissions shall be determined by multiplying the actual groundwater throughput per day, times the measured BTEX concentration (ppb), times the groundwater weighted average density of 8.34 lbs/gal. Compliance shall be determined by showing compliance with the concentration and throughput limitations in Section A.III.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

VI. Miscellaneous Requirements

- 1. The following term(s) and condition(s) shall supersede the requirements contained in the permit to install [number 08-2084] issued for this emissions unit on July 18, 1997: A.I.2, A.II.1, A.III.1 and 2, and A.IV.1.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

V. **Testing Requirements**

1. Compliance Methods -

Compliance with the emission limitation(s) in Section B.1. of these terms and conditions shall be determined in accordance with the following method(s):

a. 1.26 lbs/hr organic compounds

Applicable Compliance Method -

Actual hourly emissions shall be determined by multiplying the maximum hourly throughput of 18,000 gallons/hr times the measured BTEX concentration (ppb), times the groundwater weighted average density of 8.34 lbs/gal. Compliance shall be determined by showing compliance with the concentration limitation in section B.III.1.

b. Emission Limitation -
30.24 lbs/day organic compounds

Applicable Compliance Method(s) -

Actual daily emissions shall be determined by multiplying the actual groundwater throughput per day, times the measured BTEX concentration (ppb), times the groundwater weighted average density of 8.34 lbs/gal. Compliance shall be determined by showing compliance with the concentration and throughput limitations in Section B.III.

c. Emission Limitation -
5.52 tons/yr, organic compounds

Applicable Compliance Method(s) -

The 5.52 tons/yr limitation was developed by multiplying the 1.26 lbs/hr limitation by the maximum operating schedule of 8760 hrs/yr, and dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the hourly limitation and throughput limitation, compliance will also be shown with the annual limitation.

A. State and Federally Enforceable Section

The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.

1. None.

I. **Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Above ground internal floating roof storage tank	OAC rule 3745-21-09 (L)	See Additional Terms and Conditions #2.

2. **Additional Terms and Conditions**

- a. The fixed roof storage tank shall be equipped with an internal floating roof.

- b. The automatic bleeder vents shall be closed at all times when the roof is floated off or landed on the roof leg supports, and the rim vents, if provided, shall be set to open when the roof is being floated off the leg supports or is at the manufacturer's recommended setting.
- c. All openings, except stub drains, shall be equipped with a cover, seal or lid, which is to be in a closed position at all times except when in actual use for tank gauging or sampling.

Part III - Terms and Conditions for Emissions Units

[Go to the top of this document](#)

Facility ID: 0857040961 Emissions Unit ID: T007 Issuance type: Title V Draft Permit

A. State and Federally Enforceable Section

The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.

1. None.

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Above ground internal floating roof storage tank	OAC rule 3745-21-09 (L)	See Additional Terms and Conditions #2.

2. Additional Terms and Conditions

- a. The fixed roof storage tank shall be equipped with an internal floating roof.
- b. The automatic bleeder vents shall be closed at all times when the roof is floated off or landed on the roof leg supports, and the rim vents, if provided, shall be set to open when the roof is being floated off the leg supports or is at the manufacturer's recommended setting.
- c. All openings, except stub drains, shall be equipped with a cover, seal or lid, which is to be in a closed position at all times except when in actual use for tank gauging or sampling.
