Dear Permit Holder:

Enclosed please find a final Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. Please complete a survey at www.epa.ohio.gov/dapc/permitsurvey.aspx and give us feedback on your permitting experience. We value your opinion.

The issuance of this PTI is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Kevin Boyce," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, OH 43215

If you have any questions, please contact Ohio EPA DAPC, Northwest District Office at (419)352-8461 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. This permit can be accessed electronically on the DAPC Web page, www.epa.ohio.gov/dapc, by clicking the "Issued Air Pollution Control Permits" link.

Sincerely,

Michael W. Ahern
Michael W. Ahern, Manager
Permit Issuance and Data Management Section, DAPC

Authorization

Facility ID: 0332010201
Application Number(s): A0038760
Permit Number: P0105775
Permit Description: Installation of a Perchloroethylene Dry Cleaning Machine and a Petroleum Dry Cleaning Machine
Permit Type: Initial Installation
Permit Fee: \$200.00
Issue Date: 4/30/2010
Effective Date: 4/30/2010
Expiration Date: 4/30/2020
Permit Evaluation Report (PER) Annual Date: Oct 1 - Sept 30, Due Nov 15

This document constitutes issuance to:

KRAMER'S SUPERIOR CLEANERS
731 S MAIN ST
FINDLAY, OH 45840

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Northwest District Office
347 North Dunbridge Road
Bowling Green, OH 43402
(419)352-8461

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski
Director

Authorization (continued)

Permit Number: P0105775
Permit Description: Installation of a Perchloroethylene Dry Cleaning Machine and a Petroleum Dry Cleaning Machine

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

- Emissions Unit ID:** D003
- Company Equipment ID: D003
- Superseded Permit Number:
- General Permit Category and Type: Not Applicable

- Emissions Unit ID:** D004
- Company Equipment ID: D004
- Superseded Permit Number:
- General Permit Category and Type: Not Applicable

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. Unless otherwise specified, facilities subject to one or more synthetic minor restrictions must use Ohio EPA's "Air Services" to submit annual emissions associated with this permit requirement. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Ohio EPA DAPC, Northwest District Office in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting¹ a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emissions unit once the certification has been submitted to Ohio EPA by the authorized official.

¹ Permittees that use Ohio EPA's "Air Services" can mark the affected emissions unit(s) as "permanently shutdown" in the facility profile along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update will constitute notifying of the permanent shutdown of the affected emissions unit(s).

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None

C. Emissions Unit Terms and Conditions

1. D003

Operations, Property and/or Equipment Description:

Perchloroethylene Dry Cleaning Machine (Dry-to-Dry)

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05 (A)(3)	2.37 tons of volatile organic compounds (VOC)/year
b.	OAC rule 3745-21-09(AA)	See b)(2)a., c)(2) through c)(5) and d)(1)
c.	40 CFR Part 63, Subparts A & M	See b)(2)b., b)(2)c., c)(4), c)(6) through c)(10), d)(1) through d)(6), and e)(2).

(2) Additional Terms and Conditions

a. This facility is exempt from the requirements of OAC rule 3745-21-09(AA)(1)(a), pursuant to OAC rule 3745-21-09(AA)(2)(c) because the total annual amount of fabric cleaned with perchloroethylene is less than sixty thousand pounds.

b. The exhaust from each dry cleaning machine shall be vented through a refrigerated condenser. [40 CFR 63.322(b)(1)]

c. This facility is considered an area source under 40 CFR Part 63 Subpart M because it includes only dry-to-dry machines with a total yearly perchloroethylene consumption of less than 2100 gallons. [40 CFR 63.620(h)]

d. The permittee must comply with all of the requirements listed for an area source per 40 CFR Part 63, Subpart M.

c) Operational Restrictions

- (1) The annual perchloroethylene usage shall not exceed 135 gallons.
- (2) The waste from any diatomaceous earth filter which has been used to filter perchloroethylene shall contain no more than twenty-five per cent (25%) by weight perchloroethylene, as determined under paragraph (J) of OAC rule 3745-21-10.
- (3) The waste from any distillation operation (solvent still) which has been used to distill perchloroethylene shall contain no more than sixty per cent (60%) by weight perchloroethylene, as determined under paragraph (J) of OAC rule 3745-21-10.
- (4) Any disposable filter cartridge which has been used to filter perchloroethylene shall be drained in the filter housing for at least twenty-four (24) hours before being discarded. [40 CFR 63.322(i)]
- (5) All equipment must be maintained so as to prevent the leaking of perchloroethylene liquid and prevent perceptible vapor leaks from gaskets, seals, ducts, and related equipment. Any equipment which is leaking perchloroethylene liquid or has a perceptible vapor leak shall not be operated until the leak is repaired.
- (6) The permittee shall store all perchloroethylene and wastes that contain perchloroethylene in solvent tanks or solvent containers with no perceptible leaks. The exception to this requirement is that containers for separator water may be uncovered, as necessary, for proper operation of the machine and still. [40 CFR 63.322(j)]
- (7) The door of each dry cleaning machine shall be closed at all times except to transfer articles to and from the machine. [40 CFR 63.322(c)]
- (8) The dry cleaning machine shall be operated and maintained according to manufacturer's specifications and recommendations. [40 CFR 63.322(d)]
- (9) Perchloroethylene shall not be vented or released to the atmosphere while the dry cleaning machine drum is rotating. [40 CFR 63.322(e)(1)]
- (10) The machine shall be operated to prevent air drawn into the dry cleaning machine (when the machine door is open) from passing through the refrigerated condenser. [40 CFR 63.322(e)(3)]

d) Monitoring and/or Recordkeeping Requirements

- (1) The following components shall be visually inspected biweekly for perceptible leaks while the dry cleaning system is operating:
 - a. hose and pipe connections, fittings, coupling and valves;
 - b. machine door gaskets and seatings;
 - c. filter gaskets and seatings;

- d. pumps;
- e. solvent tanks and containers;
- f. water separators;
- g. filter sludge recovery or muck cookers;
- h. distillation-unit;
- i. diverter valves;
- j. saturated lint from the lint basket;
- k. cartridge filters and housings;
- l. stills; and
- m. exhaust dampers.

Inspection with a halogenated hydrocarbon detector or PCE gas analyzer also fulfills this requirement. [40 CFR 63.322(k) and 40 CFR 63.322(l)]

- (2) Leaks are to be repaired within 24 hours after being detected. If repair parts are to be ordered, the order shall be initiated within 2 working days after detecting the leak. The repair parts shall be installed within 5 working days after they are received. [40 CFR 63.322(m)]
- (3) The components listed in d)(1) shall be inspected monthly for vapor leaks using a halogenated hydrocarbon detector or PCE gas analyzer. The inspections shall be done while the components are in operation. The analyzer shall be operated according to the manufacturer's instructions. Specifically, the operator shall place the probe inlet at the surface of each component interface where leakage could occur and move it slowly along the interface of the periphery. The week in which a monthly inspection is performed using a halogenated hydrocarbon detector or PCE gas analyzer shall satisfy the requirements for the biweekly visual inspection for perceptible leaks for that same week as required in d)(1). [40 CFR 63.322(1)(i)]
- (4) The following parameters shall be monitored on a weekly basis:
 - a. The refrigeration system high pressure and low pressure readings during the drying phase to determine if they are in the range specified in the manufacturer's operating instructions; [40 CFR 63.323(a)(1)(i)]
 - or
 - b. The temperature of the air-perchloroethylene gas-vapor stream on the outlet side of the refrigerated condenser shall be measured weekly with a temperature sensor to determine if it is equal to or less than 45 degrees Fahrenheit before the end of the cool-down or drying cycle while the gas-vapor stream is flowing through the condenser. The temperature sensor shall be used according to the manufacturer's instructions and shall be designed to measure a temperature of

45 degrees Fahrenheit to an accuracy of plus or minus 2 degrees Fahrenheit.
[40 CFR 63.323(a)(1)(ii)]

- (5) In accordance with 40 CFR 63.324(d), the following records shall be kept on site in a log for a period of not less than five (5) years, and shall be made available upon request:
- a. Receipts of all perchloroethylene purchases.
 - b. The volume of perchloroethylene purchased each month as recorded from perchloroethylene purchase receipts. If no perchloroethylene is purchased during a given month, then the records shall state zero gallons.
 - c. The calculation and result of the yearly perchloroethylene consumption (12-month rolling summation) determined on the first day of each month.
 - d. The dates of all weekly visual inspections and monthly vapor leak inspections conducted with the use of a halogenated hydrocarbon detector or PCE gas analyzer and the name or location of dry cleaning system components where leaks are detected.
 - e. The dates of repair and records of written or verbal orders for repair parts.
 - f. The date and temperature sensor monitoring or pressure gauge reading results, as required in d)(3) above.
 - g. A description of control equipment maintenance performed and the date.
 - h. The amount of fabric dry cleaned with perchloroethylene, from January 1 to December 31 of each year, in pounds.
- (6) A copy of the design specifications and the operating manuals for each dry-cleaning system and each emission control device located at the dry cleaning facility shall be retained on site and shall be made available upon request. [40 CFR Part 63.324(e)]
- e) Reporting Requirements
- (1) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the director by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
 - (2) Upon issuance of this permit, the permittee shall submit to the Northwest District Office a notification of compliance status providing the following information and signed by a responsible official who shall certify its accuracy:
 - a. The name and address of the owner or operator;
 - b. The address of the dry cleaning facility;
 - c. A brief description of the type of each dry cleaning machine at the facility;

- d. If they are located in a building with a residence, even if the residence is vacant at the time of this notification;
- e. If they are located in a building with no other tenants, leased space, or owner occupants;
- f. Whether they are a major or area source;
- g. The yearly perchlorethylene solvent consumption based upon the yearly solvent consumption calculated in d)(7);
- h. A description of the type of control device that will be used to achieve compliance with 40 CFR 63.322(b) and whether the control device is currently in use or will be purchased.
- i. Whether or not they are in compliance with each applicable requirement of 40 CFR 63.322; and
- j. All information contained in the statement is accurate and true. [40 CFR 63.324(a) and 63.324(f)]

f) Testing Requirements

- (1) Compliance with the annual perchloroethylene consumption limitation shall be determined using the records maintained in accordance with d)(4).
- (2) Compliance with the emission limitations in section b)(1) shall be determined in accordance with the following methods:
 - a. Emission Limitation
2.37 tons of volatile organic compounds (VOC)/year
 - Applicable Compliance Method
Compliance with the annual limitation shall be determined by multiplying a maximum annual perchloroethylene usage of 135 gallons by a VOC content of 13.50 lbs/gallon and dividing by 2000 lbs/ton.

g) Miscellaneous Requirements

- (1) None

2. D004

Operations, Property and/or Equipment Description:

Petroleum Dry Cleaning Machine (Dry-to-Dry)

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05 (A)(3)	1.14 tons of volatile organic compounds (VOC)/year
b.	OAC rule 3745-21-09(BB)	See sections b)(2)a. through b)(2)d.
c.	40 CFR Part 60 Subpart JJJ	See sections b)(2)e.

(2) Additional Terms and Conditions

a. This facility is exempt from the requirements of OAC rule 3745-21-09(BB)(1)(a), (BB)(1)(b), and (BB)(2) pursuant to OAC rule 3745-21-09(BB)(3)(b) because the total annual consumption of petroleum solvent is less than or equal to four thousand seven hundred gallons.

b. Any bucket or barrel which contains petroleum solvent or petroleum solvent-laden waste shall be covered to minimize solvent evaporation.

c. Any equipment associated with the use of petroleum solvent shall be visually inspected weekly to identify any liquid leaks of petroleum solvent.

- d. Any liquid or vapor leak of petroleum solvent shall be repaired within 15 days after identifying the source of the leak, unless a necessary repair part is not on hand. If a repair part is not on hand, it shall be ordered within three working days after identifying the source of the leak. The leak shall be repaired within 15 days following the delivery of the necessary repair part.
 - e. This emissions unit is exempt from the provisions of 40 CFR Part 60 Subpart JJJ because the petroleum dry cleaning plant has a total manufacturer's rated dryer capacity of less than 84 pounds, as per 40 CFR 60.620(a).
- c) Operational Restrictions
- (1) The annual petroleum solvent usage shall not exceed 130 gallons.
- d) Monitoring and/or Recordkeeping Requirements
- (1) The permittee shall maintain records of annual solvent usage in a readily accessible location for at least five years and shall make these records available to the Northwest District Office upon verbal or written request.
 - (2) The permittee shall maintain the results of any leak checks, including, at a minimum, the following information for at least five years and shall make these records available to the Northwest District Office upon verbal or written request:
 - a. Date of inspection.
 - b. Findings (may indicate no leaks discovered or location, nature, and severity of each leak).
 - c. Leak determination method.
 - d. Corrective action (date each leak repaired and reasons for any repair interval in excess of fifteen calendar days).
 - e. Inspector's name and signature.
- e) Reporting Requirements
- (1) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the director by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
 - (2) Any leaks in vapor or liquid lines that are not repaired within fifteen days after identification shall be reported to the Northwest District Office within 30 days after the repair is completed.
 - (3) For any petroleum dry cleaning facility that is exempted pursuant to OAC rule 3745-21-09(BB)(3)(b) and has an annual consumption of petroleum solvent greater than 4,700

gallons, the permittee shall so notify the Northwest District Office within 30 days of becoming aware of the occurrence.

f) Testing Requirements

(1) Compliance with the emission limitations in section b)(1) shall be determined in accordance with the following methods:

a. Emission Limitation

1.14 tons of volatile organic compounds (VOC)/year

Applicable Compliance Method

Compliance with the annual limitation shall be determined by multiplying a maximum annual petroleum solvent usage of 130 gallons by a VOC content of 6.42 lbs/gallon and dividing by 2000 lbs/ton.

g) Miscellaneous Requirements

(1) None
