CERTIFIED MAIL

**RE: Final Title V Chapter 3745-77
permit**

03-39-02-0133
Mayflower Vehicle Systems, Inc.
Bob DuBois
55 North Garfield Street
Norwalk, OH 44852

Dear Bob DuBois:

Enclosed is the Title V permit that allows you to operate the facility in the manner indicated in the permit. Because this permit may contain several conditions and restrictions, we urge you to read it carefully.

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed with the Environmental Review Appeals Commission within thirty (30) days after notice of the Director's action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. It is also requested by the Director that a copy of the appeal be served upon the Environmental Enforcement Section of the Office of the Attorney General. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
236 East Town Street
Room 300
Columbus, Ohio 43215

If you have any questions, please contact Northwest District Office.

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

Becky Castle, DAPC PMU

Ohio EPA

State of Ohio Environmental Protection Agency

FINAL TITLE V PERMIT

Issue Date: **04/18/01** Effective Date: **04/18/01**

Expiration Date: **04/18/06**

This document constitutes issuance to:

Mayflower Vehicle Systems, Inc.

55 North Garfield Street

Norwalk, OH 44852

of a Title V permit for Facility ID: 03-39-02-0133

Emissions Unit ID (Company ID)/

Emissions Unit Activity Description:

K003 (Electrodeposition Coating Operation)

Electrodeposition Coating Operation

K011 (Black Cab Repair Spray Booth)

Black Cab Repair Spray Booth

Z002 (Electrodeposition Coating Primer Repair Operation)

Electrodeposition Coating Primer Repair Operation

Z003 (Coach Joint Sealer Application)

Coach Joint Sealer Application

Z004 (Interior Topcoat Application)

Interior Topcoat Application

You will be contacted approximately eighteen (18) months prior to the expiration date regarding the renewal of this permit. If you are not contacted, please contact the appropriate Ohio EPA District Office or local air agency listed below. This permit and the authorization to operate the air contaminant sources (emissions units) at this facility shall expire at midnight on the expiration date shown above. If a renewal permit is not issued prior to the expiration date, the permittee may continue to operate pursuant to OAC rule 3745-77-04(A) and in accordance with the terms of this permit beyond the expiration date, provided that a complete renewal application is submitted no earlier than eighteen (18) months and no later than one-hundred eighty (180) days prior to the expiration date.

Described below is the Ohio EPA District Office or local air agency that is responsible for processing and administering your Title V permit:

Northwest District Office
347 North Dunbridge Road
Bowling Green, OH 43402
(419) 352-8461

OHIO ENVIRONMENTAL PROTECTION AGENCY

Christopher Jones
Director

PART I - GENERAL TERMS AND CONDITIONS

A. State and Federally Enforceable Section

1. Monitoring and Related Recordkeeping and Reporting Requirements

- a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
 - i. The date, place (as defined in the permit), and time of sampling or measurements.
 - ii. The date(s) analyses were performed.
 - iii. The company or entity that performed the analyses.
 - iv. The analytical techniques or methods used.
 - v. The results of such analyses.
 - vi. The operating conditions existing at the time of sampling or measurement.
- b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
 - i. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
 - ii. Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be promptly made to the appropriate Ohio EPA District Office or local air agency. These quarterly written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the submission of monitoring reports every six months and OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of all deviations except malfunctions, which shall be reported in accordance with OAC rule 3745-15-06. The written reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.) See B.8 below if no deviations occurred during the quarter.
 - iii. Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted to the appropriate Ohio EPA District Office or local air agency every six months, i.e., by January 31 and July 31 of each year for the previous six calendar months. These semi-annual written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i)

and (ii) pertaining to the reporting of any deviations related to the monitoring, recordkeeping, and reporting requirements. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.

- iv. Each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.

2. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports submitted pursuant to OAC rule 3745-15-06 shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of deviations caused by malfunctions or upsets.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

3. Risk Management Plans

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

4. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

5. Severability Clause

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

6. General Requirements

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.

- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, reopened, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

7. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78.

8. Marketable Permit Programs

No revision of this permit is required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in this permit.

9. Reasonably Anticipated Operating Scenarios

The permittee is hereby authorized to make changes among operating scenarios authorized in this permit without notice to the Ohio EPA, but, contemporaneous with making a change from one operating scenario to another, the permittee must record in a log at the permitted facility the scenario under which the permittee is operating. The permit shield provided in these general terms and conditions shall apply to all operating scenarios authorized in this permit.

10. Reopening for Cause

This Title V permit will be reopened prior to its expiration date under the following conditions:

- a. Additional applicable requirements under the Act become applicable to one or more emissions units covered by this permit, and this permit has a remaining term of three or more years. Such a reopening shall be completed not later than eighteen months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than

the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of OAC rule 3745-77-08.

- b. This permit is issued to an affected source under the acid rain program and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit, and shall not require a reopening of this permit.
- c. The Director of the Ohio EPA or the Administrator of the U.S. EPA determines that the federally applicable requirements in this permit are based on a material mistake, or that inaccurate statements were made in establishing the emissions standards or other terms and conditions of this permit related to such federally applicable requirements.
- d. The Administrator of the U.S. EPA or the Director of the Ohio EPA determines that this permit must be revised or revoked to assure compliance with the applicable requirements.

11. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA, the State, and citizens under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

12. Compliance Requirements

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this Title V permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
 - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with paragraph (E) of OAC rule 3745-77-03.
 - iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
 - iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement.

Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:

- i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
- d. Compliance certifications concerning the terms and conditions contained in this permit that are federally enforceable emission limitations, standards, or work practices, shall be submitted to the appropriate Ohio EPA District Office or local air agency in the following manner and with the following content:
- i. Compliance certifications shall be submitted annually on a calendar year basis. The annual certification shall be submitted on or before April 30th of each year during the permit term.
 - ii. Compliance certifications shall include the following:
 - (a) An identification of each term or condition of this permit that is the basis of the certification.
 - (b) The permittee's current compliance status.
 - (c) Whether compliance was continuous or intermittent.
 - (d) The method(s) used for determining the compliance status of the source currently and over the required reporting period.
 - (e) Such other facts as the Director of the Ohio EPA may require in the permit to determine the compliance status of the source.
 - iii. Compliance certifications shall contain such additional requirements as may be specified pursuant to sections 114(a)(3) and 504(b) of the Act.

13. Permit Shield

- a. Compliance with the terms and conditions of this permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but excluding terms and conditions for which the permit shield is expressly prohibited under OAC rule 3745-77-07) shall be deemed compliance with the applicable requirements identified and addressed in this permit as of the date of permit issuance.
- b. This permit shield provision shall apply to any requirement identified in this permit pursuant to OAC rule 3745-77-07(F)(2), as a requirement that does not apply to the source or to one or more emissions units within the source.

14. Operational Flexibility

The permittee is authorized to make the changes identified in OAC rule 3745-77-07(H)(1)(a) to (H)(1)(c) within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the Act [as defined in OAC rule 3745-77-01(JJ)], and does not result in an exceedance of the emissions allowed under this permit (whether expressed

therein as a rate of emissions or in terms of total emissions), and the permittee provides the Administrator of the U.S. EPA and the appropriate Ohio EPA District Office or local air agency with written notification within a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions. If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the Administrator of the U.S. EPA and the appropriate District Office of the Ohio EPA or local air agency as soon as possible after learning of the need to make the change. The notification shall contain the items required under OAC rule 3745-77-07(H)(2)(d).

15. Emergencies

The permittee shall have an affirmative defense of emergency to an action brought for noncompliance with technology-based emission limitations if the conditions of OAC rule 3745-77-07(G)(3) are met. This emergency defense provision is in addition to any emergency or upset provision contained in any applicable requirement.

16. Off Permit Changes

The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:

- a. The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition;
- b. The permittee provides contemporaneous written notice of the change to the director and the administrator, except that no such notice shall be required for changes that qualify as insignificant emission levels or activities as defined in OAC rule 3745-77-01(U). Such written notice shall describe each such change, the date of such change, any change in emissions or pollutants emitted, and any federally applicable requirement that would apply as a result of the change;
- c. The change shall not qualify for the permit shield under OAC rule 3745-77-07(F);
- d. The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes; and
- e. The change is not subject to any applicable requirement under Title IV of the Act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of rule 3745-77-07 of the Administrative Code applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit to install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that Chapter. Nothing in paragraph (I) of rule 3745-77-07 of the Administrative Code shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

(For further clarification, the permittee can refer to Engineering Guide #63 that is available in their STARSHIP software package.)

17. Compliance Method Requirements

Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Fed. Reg. 8314, Feb. 24, 1997), in the context of any future proceeding.

18. Insignificant Activity

Each insignificant activity that has one or more applicable requirements shall comply with those applicable requirements.

B. State Only Enforceable Section

1. Permit to Install Requirement

Prior to the “installation” or “modification” of any “air contaminant source,” as those terms are defined in OAC rule 3745-31-01, a permit to install must be obtained from the Ohio EPA pursuant to OAC Chapter 3745-31.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

Part II - Specific Facility Terms and Conditions

A. State and Federally Enforceable Section

1. Risk Management Plans: If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

B. State Only Enforceable Section

1. The following insignificant emissions units are located at this facility:

two 2.2 mmBtu/hour natural gas-fired boilers, emissions unit B001;
two coating booths (less than 5 gallons/day), emissions unit K002;
touch up booth (less than 5 gallons/day), emissions unit K010;
bake oven, emissions unit P003;
electric sludge dryer, emissions unit P008;
copper buffing booth, emissions unit P009; and
grind booth with filters, emissions unit P010.

Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations as well as any emission limitations and/or control requirements contained within a PTI for the unit.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Electrodeposition Coating Operation (K003)
Activity Description: Electrodeposition Coating Operation

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
prime coat application by electrodeposition	OAC rule 3745-31-05 (PTI No. 03-8762)	52.5 tons volatile organic compounds (VOC)/year (refer to section A.I.2.a of the terms and conditions of this permit)
	OAC rule 3745-21-09(C)(1)(a)(i)	The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(C)(1)(a). 1.2 pounds VOC/gallon of coating, as a daily, volume-weighted average, excluding water and exempt solvents; or
	OAC rule 3745-21-09 (C)(1)(a)(ii), (iii) and (iv) 40 CFR, Part 60, Subpart MM	VOC emission limit based on solids turnover ratio, Rt (see section A.I.2.b) Refer to section A.I.2.c of the terms and conditions of this permit.

2. Additional Terms and Conditions

- 2.a The combined VOC emissions from the application of coatings and cleanup materials in emissions units K003, K012, K013 and K014, combined shall not exceed 52.5 tons/rolling, 365-day summation of the daily coatings and cleanup materials VOC input rates.* The 52.5 tons/year is broken down as follows:

- i. E-coat/pretreat/oven - 78,000 pounds VOC/year;
- ii. E-coat/primer repair - 14,240 pounds VOC/year;
- iii. Coach joint sealer - 5,475 pounds VOC/year, and
- iv. Interior topcoat - 7,366 pounds VOC/year.

*Daily VOC input rate of each coating and cleanup material = (C x D), where C = the number of gallons employed per day and D = the VOC content in pounds of VOC per gallon. The daily VOC input rate is equivalent to the daily VOC emission rate, and is based upon 100 percent of the solvent in the coating or cleanup material being emitted.

2. Additional Terms and Conditions (continued)

- 2.b** The permittee shall comply with the following VOC emission limitations (based on the solids turnover ratio (Rt) for this coating line):
- i. 1.4 pounds of VOC per gallon of solids when Rt is 0.160 or greater, or
 - ii. $1.4 \times 350^{(0.160 - Rt)}$ pounds of VOC per gallon of solids when Rt is greater than or equal to 0.040 and less than 0.160, or
 - iii. no VOC emission limit when Rt is less than 0.040.

where:

$$Rt = Tv/Le$$

Tv = total volume of coating solids that are added to the electrodeposition coating line in a calendar month (gallons)

Le = volume design capacity of the electrodeposition system, which is the total liquid volume contained in the electrodeposition system's tanks, pumps, recirculating lines, filters, etc. at the system's designed liquid operating level (gallons)

- 2.c** The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-21-09(C)(1).

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for this emissions unit:
 - a. the name and identification number of each material (coating, solvent, etc.) added to the dip tank;
 - b. the VOC content, in pounds VOC per gallon, excluding water and exempt solvents, of each material added to the dip tank;
 - c. the solids content, in gallon of solids per gallon, of each material employed;
 - d. the volume, in gallons (excluding water and exempt solvents), of each material added to the dip tank;
 - e. the total volume, in gallons (excluding water and exempt solvents), of all materials added to the dip tank;
 - f. the daily, volume-weighted average VOC content of the materials added to the dip tank, in pounds VOC per gallon [excluding water and exempt solvents];
 - g. the VOC emissions, in pounds, for each material employed [equals (b) times (d)];
 - h. the solids employed, in gallons, for each material employed [equals (c) times (d)];
 - i. the total VOC emissions, in pounds, for all materials employed [summation of (g) for all materials];
 - j. the total solids employed, in gallons, for all materials employed [summation of (h) for all materials];
 - k. the volume design capacity of the electrodeposition system, in gallons;
 - l. the solids turnover ratio [(i) divided by (k)];
 - m. the average pounds of VOC per gallon of solids [(i) divided by (j)]; and
 - n. the rolling, 365-day summation of VOC emissions, in tons (the rolling, 365-day VOC emissions shall be based upon the sum of 1.i for the preceding 364 calendar days + 1.i for the current day).
2. The permittee shall collect and record each day the rolling, 365-day summation of VOC emissions, in tons, for emissions units K003, K012, K013 and K014, combined.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing that the 1.2 pounds VOC/gallon of coating (excluding water and exempt solvents) limitation and the applicable limitation in section A.1.2.b (pounds VOC/gallon of solids) were both exceeded in this emissions unit. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 45 days following the end of the calendar month.
2. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the rolling, 365-day VOC emission limitation of 52.5 tons. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
3. The permittee shall submit annual reports that summarize the actual annual VOC emissions, in tons, for this emissions unit. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

V. Testing Requirements

1. In accordance with OAC rule 3745-21-10, any determination of VOC content*, solids content, or density of a coating and/or cleanup material shall be based on the coating/cleanup material as employed (as applied), including the addition of any thinner or viscosity reducer to the coating/cleanup material. The company shall determine the composition of the coatings/cleanup materials by formulation data supplied by the manufacturer of the coating/cleanup material or from data determined by an analysis of each coating/cleanup material, as received, by Reference Method 24. The Ohio EPA may require the company, if it uses formulation data supplied by the manufacturer, to determine data used in the calculation of the VOC content of coatings/cleanup materials by Reference Method 24 or an equivalent or alternative method.

* "VOC content" means all volatile organic compounds that are in a coating/cleanup material expressed as pounds of VOC per gallon.

2. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 2.a Emission Limitation: 52.5 tons VOC/rolling, 365-day period

Applicable Compliance Method: The permittee shall demonstrate compliance with this limitation through the record keeping required in sections A.III.1 and 2 of the terms and conditions of this permit.

- 2.b Emission Limitation:
1.2 pounds VOC/gal coating, excluding water and exempt solvents or 1.4 pounds VOC/gallon of solids when the solids turnover ratio is 0.160 or greater, or $[1.4 \times 350 \text{ raised to the } (0.160 - \text{solids turnover ratio}) \text{ power}]$ pounds VOC/gallon of solids when the solids turnover ratio is greater than or equal to 0.040 but less than 0.160, or no emission limit when the solids turnover ratio is less than 0.040

Applicable Compliance Method:

The permittee shall demonstrate compliance with this emission limitation through the record keeping required in section A.III.1 of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
prime coat application by electrodeposition	OAC rule 3745-31-05 (PTI No. 03-8762)	30.0 pounds volatile organic compounds (VOC)/hour

2. Additional Terms and Conditions

- 2.a The 30.0 pounds VOC/hour emission limitation was established for PTI purposes to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with this limitation.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

1. The permit to install for this emissions unit (K003) was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: glycol ether*
 TLV (ug/m3): 121,000
 Maximum Hourly Emission Rate (lbs/hr): 30.0
 Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 342.5
 MAGLC (ug/m3): 2881

*worst-case scenario -- assume all emissions are of the compound with the lowest TLV.

III. Monitoring and/or Record Keeping Requirements (continued)

2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
 - a. changes in the composition of the materials used (typically coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

3. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy":
 - a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

None

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section B.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

Emission Limitation: 30.0 pounds VOC/hour, from coatings usage

Applicable Compliance Method: Compliance shall be determined by multiplying the maximum coating usage rate of 25 gallons/hour by the maximum VOC content, as applied, of all the coatings employed (lbs/gallon).

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Black Cab Repair Spray Booth (K011)
Activity Description: Black Cab Repair Spray Booth

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
black cab repair coating line for heavy-duty truck bodies	OAC rule 3745-21-09 (U)(2)(e)	none (refer to section A.II.1 of the terms and conditions of this permit)
	OAC rule 3745-17-11(B)	none (refer to section A.I.2.a of the terms and conditions of this permit)
	OAC rule 3745-17-07(A)	none (refer to section A.I.2.b of the terms and conditions of this permit)

2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of particulate emissions (PE) from this emissions unit is less than 10 pounds/hour. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. In addition, Table I of OAC rule 3745-17-11 does not apply since the facility is located in Huron County, which is identified as a P-3 county.
- 2.b This emissions unit is exempt from the visible PE limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.

II. Operational Restrictions

1. The maximum daily coating usage in this emissions unit shall not exceed 10 gallons.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for this emissions unit:
 - a. the name and identification number of each coating employed;
 - b. the volume, in gallons, of each coating employed; and
 - c. the total volume, in gallons, of all of the coatings employed.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate Ohio EPA district office or local air agency) in writing of any daily record showing that the coating line employed more than the applicable maximum daily coating usage restriction of 10 gallons. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA district office or local air agency) within 45 days after the exceedance occurs.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

Usage Restriction: 10 gallons/day coatings usage

Applicable Compliance Method: The permittee shall demonstrate compliance with this emission limitation through the record keeping required in section A.III.1 of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
black cab repair coating line for heavy-duty truck bodies	OAC rule 3745-31-05 (PTI No. 03-11157)	65.0 pounds volatile organic compounds (VOC)/day and 11.9 tons VOC/year (from coatings usage) 17.9 pounds VOC/month and 0.11 ton VOC/year (from cleanup materials usage) 12.0 tons VOC/year (from coatings and cleanup materials usage, combined) 0.01 pound particulate emissions (PE)/hour and 0.04 ton PE/year (from coatings usage) Visible PE shall not exceed 0 percent opacity, as a six-minute average.

2. Additional Terms and Conditions

None

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for this emissions unit:
 - a. the name and identification number of each coating employed;
 - b. the volume, in gallons, of each coating employed;
 - c. the VOC content of each coating employed (lbs/gallon); and
 - d. the total VOC emissions from all coatings employed, in pounds [summation of (b x c) for all coatings].

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall collect and record the following information each month for the purpose of determining annual VOC emissions:
 - a. the name and identification number of each cleanup material employed;
 - b. the number of gallons of each cleanup material employed;
 - c. the VOC content of each cleanup material employed;
 - d. the total VOC emissions from all cleanup materials employed, in pounds [summation of (b x c) for all cleanup materials];
 - e. the total VOC emissions from all of the coatings employed, in pounds (this is calculated by summing the daily VOC emission rates (from section 1.d) for the calendar month); and
 - f. the total VOC emissions from all coatings and cleanup materials employed, in tons $[(2.d + 2.e)/2000]$.
3. The permit to install for this emissions unit (K011) was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: isobutyl alcohol

TLV (ug/m3): 152,000

Maximum Hourly Emission Rate (lbs/hr): 0.650

Predicted 1-Hour Maximum Ground-Level Concentration at the Fenceline (ug/m3): 20.53

Maximum Acceptable Ground-Level Concentration (MAGLC) (ug/m3): 3,619

Pollutant: methyl n-amyl ketone

TLV (ug/m3): 233,000

Maximum Hourly Emission Rate (lbs/hr): 0.325

Predicted 1-Hour Maximum Ground-Level Concentration at the Fenceline (ug/m3): 10.27

Maximum Acceptable Ground-Level Concentration (MAGLC) (ug/m3): 5,548

Pollutant: n-butyl acetate

TLV (ug/m3): 713,000

Maximum Hourly Emission Rate (lbs/hr): 0.325

Predicted 1-Hour Maximum Ground-Level Concentration at the Fenceline (ug/m3): 10.27

Maximum Acceptable Ground-Level Concentration (MAGLC) (ug/m3): 16,976

Pollutant: toluene

TLV (ug/m3): 375,000

Maximum Hourly Emission Rate (lbs/hr): 0.325

Predicted 1-Hour Maximum Ground-Level Concentration at the Fenceline (ug/m3): 10.27

Maximum Acceptable Ground-Level Concentration (MAGLC) (ug/m3): 8,929

III. Monitoring and/or Record Keeping Requirements (continued)

Pollutant: n-butyl acetate
TLV (ug/m3): 713,000
Maximum Hourly Emission Rate (lbs/hr): 0.325
Predicted 1-Hour Maximum Ground-Level Concentration at the Fenceline (ug/m3): 10.27
Maximum Acceptable Ground-Level Concentration (MAGLC) (ug/m3): 16,976

Pollutant: xylene
TLV (ug/m3): 435,000
Maximum Hourly Emission Rate (lbs/hr): 0.488
Predicted 1-Hour Maximum Ground-Level Concentration at the Fenceline (ug/m3): 15.40
Maximum Acceptable Ground-Level Concentration (MAGLC) (ug/m3): 10,357

4. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- changes in the composition of the materials used (typically coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

5. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
- a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

- The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing all exceedances of the daily VOC emission limitation of 65.0 pounds. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the date the deviation occurred.
- The permittee shall submit annual reports that summarize the actual annual VOC emissions from coatings usage. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

IV. Reporting Requirements (continued)

3. The permittee shall submit annual reports that summarize the actual annual VOC emissions from coatings and cleanup materials usages. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section B.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitations:
65.0 pounds VOC/day, 11.9 tons/year (from coatings usage)

Applicable Compliance Method:

Compliance shall be based upon the record keeping specified in section B.III.1 of the terms and conditions of this permit.

- 1.b Emission Limitations: 17.9 pounds VOC/month, 0.11 ton VOC/year (from cleanup materials usage)

Applicable Compliance Method: Compliance shall be based upon the record keeping specified in section B.III.2 of the terms and conditions of this permit.

- 1.c Emission Limitations: 0.01 pound PE/hour, 0.04 ton PE/year

Applicable Compliance Method: The permittee may calculate actual PE rates for the unit utilizing the following equation:

$$PE = (\text{maximum coating solids usage rate}) \times (1-TE) \times (1-CE)$$

where:

PE = Particulate emissions rate (pounds/hour);

TE = Transfer efficiency, which is the ratio of the amount of coating solids deposited on the coated part to the amount of coating solids used;

CE = Control efficiency of the control equipment (filters).

The annual emission limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2000. Therefore, provided compliance is shown with the hourly limitation, compliance shall also be shown with the annual limitation.

If required, compliance with the PE limitation shall be determined in accordance with the test method and procedures in Methods 1 - 5, which are located in 40 CFR Part 60, Appendix A.

- 1.d Emission Limitation: Visible PE shall not exceed 0 percent opacity, as a six-minute average.

Applicable Compliance Method: If required, the permittee shall demonstrate compliance with the visible PE limitation by using Method 9, which is located in 40 CFR Part 60, Appendix A.

2. In accordance with OAC rule 3745-21-10, any determination of VOC content*, solids content, or density of a coating and/or cleanup material shall be based on the coating/cleanup material as employed (as applied), including the addition of any thinner or viscosity reducer to the coating/cleanup material. The company shall determine the composition of the coatings/cleanup materials by formulation data supplied by the manufacturer of the coating/cleanup material or from data determined by an analysis of each coating/cleanup material, as received, by Reference Method 24. The Ohio EPA may require the company, if it uses formulation data supplied by the manufacturer, to determine data used in the calculation of the VOC content of coatings/cleanup materials by Reference Method 24 or an equivalent or alternative method.

* "VOC content" means all volatile organic compounds that are in a coating/cleanup material expressed as pounds of VOC per gallon.

Facility Name: **Mayflower Vehicle Systems, Inc.**
Facility ID: **03-39-02-0133**
Emissions Unit: **Black Cab Repair Spray Booth (K011)**

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Electrodeposition Coating Primer Repair Operation (Z002)
Activity Description: Electrodeposition Coating Primer Repair Operation

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
e-coat primer repair application (emissions unit K012)	OAC rule 3745-31-05 (PTI No. 03-8762)	52.5 tons volatile organic compounds (VOC)/year (refer to section A.I.2.a of the terms and conditions of this permit)
	OAC rule 3745-21-09 (U)(2)(e)	The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(e). none (refer to section A.II.1 of the terms and conditions of this permit)

2. Additional Terms and Conditions

- 2.a The combined VOC emissions from the application of coatings and cleanup materials in emissions units K003, K012, K013 and K014, combined shall not exceed 52.5 tons/rolling, 365-day summation of the daily coatings and cleanup materials VOC input rates.* The 52.5 tons/year is broken down as follows:
 - i. E-coat/pretreat/oven - 78,000 pounds VOC/year;
 - ii. E-coat/primer repair - 14,240 pounds VOC/year;
 - iii. Coach joint sealer - 5,475 pounds VOC/year, and
 - iv. Interior topcoat - 7,366 pounds VOC/year.

*Daily VOC input rate of each coating and cleanup material = (C x D), where C = the number of gallons employed per day and D = the VOC content in pounds of VOC per gallon. The daily VOC input rate is equivalent to the daily VOC emission rate, and is based upon 100 percent of the solvent in the coating or cleanup material being emitted.

II. Operational Restrictions

1. The maximum daily coating usage in this emissions unit shall not exceed 10 gallons.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for this emissions unit:
 - a. the name and identification number of each material (coating, solvent, etc.) added to the dip tank;
 - b. the VOC content, in pounds VOC per gallon, excluding water and exempt solvents, of each material added to the dip tank;
 - c. the solids content, in gallon of solids per gallon, of each material employed;
 - d. the volume, in gallons (excluding water and exempt solvents), of each material added to the dip tank;
 - e. the total volume, in gallons (excluding water and exempt solvents), of all materials added to the dip tank;
 - f. the daily, volume-weighted average VOC content of the materials added to the dip tank, in pounds VOC per gallon [excluding water and exempt solvents];
 - g. the VOC emissions, in pounds, for each material employed [equals (b) times (d)];
 - h. the solids employed, in gallons, for each material employed [equals (c) times (d)];
 - i. the total VOC emissions, in pounds, for all materials employed [summation of (g) for all materials];
 - j. the total solids employed, in gallons, for all materials employed [summation of (h) for all materials];
 - k. the volume design capacity of the electrodeposition system, in gallons;
 - l. the solids turnover ratio [(i) divided by (k)];
 - m. the average pounds of VOC per gallon of solids [(i) divided by (j)]; and
 - n. the rolling, 365-day summation of VOC emissions, in tons (the rolling, 365-day VOC emissions shall be based upon the sum of 1.i for the preceding 364 calendar days + 1.i for the current day).
2. The permittee shall collect and record each day the rolling, 365-day summation of VOC emissions, in tons, for emissions units K003, K012, K013 and K014, combined.
3. The permittee shall collect and record the following information each day for this emissions unit:
 - a. the name and identification number of each coating employed;
 - b. the volume, in gallons, of each coating employed; and
 - c. the total volume, in gallons, of all of the coatings employed.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing that the coating line employed more than 10 gallons of coatings per day. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 45 days following the end of the date the exceedance occurred.
2. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the rolling, 365-day VOC emission limitation of 52.5 tons. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
3. The permittee shall submit annual reports that summarize the actual annual VOC emissions, in tons, for this emissions unit. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

V. Testing Requirements

1. In accordance with OAC rule 3745-21-10, any determination of VOC content*, solids content, or density of a coating and/or cleanup material shall be based on the coating/cleanup material as employed (as applied), including the addition of any thinner or viscosity reducer to the coating/cleanup material. The company shall determine the composition of the coatings/cleanup materials by formulation data supplied by the manufacturer of the coating/cleanup material or from data determined by an analysis of each coating/cleanup material, as received, by Reference Method 24. The Ohio EPA may require the company, if it uses formulation data supplied by the manufacturer, to determine data used in the calculation of the VOC content of coatings/cleanup materials by Reference Method 24 or an equivalent or alternative method.

* "VOC content" means all volatile organic compounds that are in a coating/cleanup material expressed as pounds of VOC per gallon.

2. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 2.a Emission Limitation: 52.5 tons VOC/rolling, 365-day period

Applicable Compliance Method: The permittee shall demonstrate compliance with this emission limitation through the record keeping required in sections A.III.1 and 2 of the terms and conditions of this permit.

- 2.b Usage Restriction: 10 gallons/day coatings usage

Applicable Compliance Method: The permittee shall demonstrate compliance with this emission limitation through the record keeping required in section A.III.3 of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
e-coat primer repair application (emissions unit K012)	OAC rule 3745-31-05 (PTI No. 03-8762)	13.7 pounds volatile organic compounds (VOC)/hour and 68.5 pounds VOC/day [from coatings usage]

2. Additional Terms and Conditions

- 2.a The 13.7 pounds VOC/hour emission limitation was established for PTI purposes to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with this limitation.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for the coatings employed in this emissions unit:
 - a. the name and identification number of each coating employed;
 - b. the volume, in gallons, of each coating employed;
 - c. the total volume, in gallons, of all of the coatings employed;
 - d. the VOC content of each coating employed; and
 - e. the total VOC emissions from all of the coatings employed, in pounds [summation of (b x d) for all coatings].
2. The permit to install for this emissions unit (K012) was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: glycol ether*
 TLV (ug/m3): 121,000
 Maximum Hourly Emission Rate (lbs/hr): 13.7
 Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 156.2
 MAGLC (ug/m3): 2881

*worst-case scenario -- assume all emissions are of the compound with the lowest TLV.

III. Monitoring and/or Record Keeping Requirements (continued)

3. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- changes in the composition of the materials used (typically coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

4. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy":
- a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the daily VOC emission limitation of 68.5 pounds. All quarterly deviation reports shall be submitted in accordance with paragraph A.3.b of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section B.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):
- 1.a Emission Limitation: 13.7 pounds VOC/hour, from coatings usage
- Applicable Compliance Method: Compliance shall be determined by multiplying the maximum coating usage rate of 2 gallons/hour by the maximum VOC content, as applied, of all of the coatings employed (lbs/gallon).
- 1.b Emission Limitation: 68.5 pounds VOC/day, from coatings usage
- Applicable Compliance Method: Compliance shall be based upon the record keeping required in section B.III.1 of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Coach Joint Sealer Application (Z003)
Activity Description: Coach Joint Sealer Application

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
coach joint sealer (emissions unit K013)	OAC rule 3745-31-05 (PTI No. 03-8762)	52.5 tons volatile organic compounds (VOC)/year (refer to section A.I.2.a of the terms and conditions of this permit)
	OAC rule 3745-21-09(U)(1)(i)	The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(1)(i). 3.0 pounds VOC/gallon of coating, excluding water and exempt solvents

2. Additional Terms and Conditions

- 2.a The combined VOC emissions from the application of coatings and cleanup materials in emissions units K003, K012, K013 and K014, combined shall not exceed 52.5 tons/rolling, 365-day summation of the daily coatings and cleanup materials VOC input rates.* The 52.5 tons/year is broken down as follows:
 - i. E-coat/pretreat/oven - 78,000 pounds VOC/year;
 - ii. E-coat/primer repair - 14,240 pounds VOC/year;
 - iii. Coach joint sealer - 5,475 pounds VOC/year, and
 - iv. Interior topcoat - 7,366 pounds VOC/year.

*Daily VOC input rate of each coating and cleanup material = (C x D), where C = the number of gallons employed per day and D = the VOC content in pounds of VOC per gallon. The daily VOC input rate is equivalent to the daily VOC emission rate, and is based upon 100 percent of the solvent in the coating or cleanup material being emitted.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for this emissions unit:
 - a. the name and identification number of each material (coating, solvent, etc.) employed in this coating line;
 - b. the VOC content, in pounds VOC per gallon of coating (excluding water and exempt solvents), for each coating employed;
 - c. the VOC content, in pounds VOC per gallon of material, for each material employed;
 - d. the volume, in gallons, for each material employed;
 - e. the VOC emissions, in pounds, for each material employed [c x d];
 - f. the total VOC emissions, in pounds, for all of the materials employed [summation of (e) for all materials]; and
 - g. the rolling, 365-day summation of VOC emissions, in tons (the rolling, 365-day VOC emissions shall be based upon the sum of 2.f for the preceding 364 calendar days + 2.f for the current day divided by 2000).
2. The permittee shall collect and record each day the rolling, 365-day summation of VOC emissions, in tons, for emissions units K003, K012, K013 and K014, combined.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing that the VOC content of any coating employed in this emissions unit exceeded 3.0 pounds VOC/gallon of coating, excluding water and exempt solvents. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 45 days following the end of the calendar month.
2. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the rolling, 365-day VOC emission limitation of 52.5 tons. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
3. The permittee shall submit annual reports that summarize the actual annual VOC emissions, in tons, for this emissions unit. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

V. Testing Requirements

1. In accordance with OAC rule 3745-21-10, any determination of VOC content*, solids content, or density of a coating and/or cleanup material shall be based on the coating/cleanup material as employed (as applied), including the addition of any thinner or viscosity reducer to the coating/cleanup material. The company shall determine the composition of the coatings/cleanup materials by formulation data supplied by the manufacturer of the coating/cleanup material or from data determined by an analysis of each coating/cleanup material, as received, by Reference Method 24. The Ohio EPA may require the company, if it uses formulation data supplied by the manufacturer, to determine data used in the calculation of the VOC content of coatings/cleanup materials by Reference Method 24 or an equivalent or alternative method.

* "VOC content" means all volatile organic compounds that are in a coating/cleanup material expressed as pounds of VOC per gallon.

2. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):
 - 2.a Emission Limitation: 52.5 tons VOC/year

Applicable Compliance Method: The permittee shall demonstrate compliance with this emission limitation through the record keeping required in sections A.III.1 and 2 of the terms and conditions of this permit.

V. Testing Requirements (continued)

2.b Emission Limitation: 3.0 pounds VOC/gallon of coating, excluding water and exempt solvents

Applicable Compliance Method: Compliance shall be based upon the testing requirement required in section A.III.1 of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
coach joint sealer (emissions unit K013)	OAC rule 3745-31-05 (PTI No. 03-8762)	3.0 pounds volatile organic compounds (VOC)/hour

2. Additional Terms and Conditions

- 2.a The 3.0 pounds VOC/hour emission limitation was established for PTI purposes to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with this limitation.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

None

IV. Reporting Requirements

None

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section B.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

Emission Limitation: 3.0 pounds VOC/hour, from coatings usage

Applicable Compliance Method: Compliance shall be determined by multiplying the maximum coatings usage rate of 13.6 gallons/hour by the maximum VOC content of all of the coatings (lbs/gallon).

VI. Miscellaneous Requirements

1. Modeling to demonstrate compliance with the Ohio EPA's "Air Toxic Policy" was not necessary because the emissions unit's maximum annual emissions for each toxic compound will be less than 1.0 ton. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified permit to install prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any pollutant that has a listed TLV to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new permit to install

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Interior Topcoat Application (Z004)
Activity Description: Interior Topcoat Application

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
interior topcoat (emissions unit K014)	OAC rule 3745-31-05 (PTI No. 03-8762)	52.5 tons volatile organic compounds (VOC)/year (refer to section A.1.2.a of the terms and conditions of this permit)
		The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(C)(4) and 40 CFR, Part 60, Subpart MM.
	OAC rule 3745-21-09 (C)(4)	15.1 pounds VOC/gallon of deposited solids
	40 CFR Part 60, Subpart MM	1.47 kilograms VOC/liter of applied coating solids {this converts to 12.3 lbs VOC/gallon deposited solids}, based on a monthly, volume-weighted average
	OAC rule 3745-17-11(B)	none (refer to section A.1.2.b of the terms and conditions of this permit)
	OAC rule 3745-17-07(A)	none (refer to section A.1.2.c of the terms and conditions of this permit)

2. Additional Terms and Conditions

- 2.a The combined VOC emissions from the application of coatings and cleanup materials in emissions units K003, K012, K013 and K014, combined shall not exceed 52.5 tons/rolling, 365-day summation of the daily coatings and cleanup materials VOC input rates.* The 52.5 tons/year is broken down as follows:
 - i. E-coat/pretreat/oven - 78,000 pounds VOC/year;
 - ii. E-coat/primer repair - 14,240 pounds VOC/year;
 - iii. Coach joint sealer - 5,475 pounds VOC/year, and
 - iv. Interior topcoat - 7,366 pounds VOC/year.

*Daily VOC input rate of each coating and cleanup material = (C x D), where C = the number of gallons employed per day and D = the VOC content in pounds of VOC per gallon. The daily VOC input rate is equivalent to the daily VOC emission rate, and is based upon 100 percent of the solvent in the coating or cleanup material being emitted.

2. Additional Terms and Conditions (continued)

- 2.b** The uncontrolled mass rate of particulate emissions (PE) from this emissions unit is less than 10 pounds/hour. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. In addition, Table I of OAC rule 3745-17-11 does not apply since the facility is located in Huron County, which is identified as a P-3 county.
- 2.c** This emissions unit is exempt from the visible PE limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

- 1.** The permittee shall collect and record the following information each month for this emissions unit in accordance with 40 CFR Part 60, section 60.393(c)(1) to demonstrate compliance with the monthly volume-weighted average mass of VOC emitted per volume of applied coating solids:
- 1.a** the permittee shall determine the composition of the coatings by formulation data supplied by the manufacturer of the coating or from data determined by an analysis of each coating, as received, by Reference Method 24 (see section V.1 of the terms and conditions of this permit); and
- 1.b** the permittee shall collect and record the following information each month:
- i. volume coatings consumed, as received;
 - ii. mass solvent used for thinning purposes; and
 - iii. the volume-weighted average of the total mass of VOC/volume coating solids used each calendar month, determined by the following procedures:
 - (a) calculate the mass of VOC used in each calendar month by the equation located in 40 CFR Part 60, section 60.393(c)(1)(i)(A);
 - (b) calculate the total volume of coating solids used in each calendar month by the equation located in 40 CFR Part 60, section 60.393(c)(1)(i)(B); and
 - (c) calculate the volume-weighted average mass of VOC/volume of applied coating solids during each calendar month by the equation located in 40 CFR Part 60, section 60.393(c)(1)(i)(D).
- If the volume-weighted average mass of VOC per volume of applied coating solids, calculated on a calendar month basis, is less than or equal to the applicable emission limitation specified in section A.I of the terms and conditions of this permit, the operation is in compliance. Each monthly calculation is a performance test for the purpose of 40 CFR Part 60, Subpart MM.
- 2.** The permittee shall maintain daily records of the pounds VOC/gallon of deposited solids (refer to paragraphs (C)(1)(a)(v) and (C)(1)(c) of OAC rule 3745-21-09) for this emissions unit, calculated in accordance with the U.S. EPA publication entitled "Protocol for Determining the Daily Volatile Organic Compound Emission Rate of Automobile and Light-Duty Truck Topcoat Operations" (EPA 450/3-88-018, December, 1988).

III. Monitoring and/or Record Keeping Requirements (continued)

3. The permittee shall collect and record the following information each day for this emissions unit:
 - a. the name and identification number of each material (coating, solvent, etc.) added to the dip tank;
 - b. the VOC content, in pounds VOC per gallon, excluding water and exempt solvents, of each material added to the dip tank;
 - c. the solids content, in gallon of solids per gallon, of each material employed;
 - d. the volume, in gallons (excluding water and exempt solvents), of each material added to the dip tank;
 - e. the total volume, in gallons (excluding water and exempt solvents), of all materials added to the dip tank;
 - f. the daily, volume-weighted average VOC content of the materials added to the dip tank, in pounds VOC per gallon [excluding water and exempt solvents];
 - g. the VOC emissions, in pounds, for each material employed [equals (b) times (d)];
 - h. the solids employed, in gallons, for each material employed [equals (c) times (d)];
 - i. the total VOC emissions, in pounds, for all materials employed [summation of (g) for all materials];
 - j. the total solids employed, in gallons, for all materials employed [summation of (h) for all materials];
 - k. the volume design capacity of the electrodeposition system, in gallons;
 - l. the solids turnover ratio [(i) divided by (k)];
 - m. the average pounds of VOC per gallon of solids [(i) divided by (j)]; and
 - n. the rolling, 365-day summation of VOC emissions, in tons (the rolling, 365-day VOC emissions shall be based upon the sum of 1.i for the preceding 364 calendar days + 1.i for the current day).
4. The permittee shall collect and record each day the rolling, 365-day summation of VOC emissions, in tons, for emissions units K003, K012, K013 and K014, combined.

IV. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the rolling, 365-day VOC emission limitation of 52.5 tons. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing that the VOC content of any material employed in this emissions unit exceeded 15.1 pounds VOC/gallon of deposited solids. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days after the exceedance occurs.
3. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing that the VOC content of any coating employed in this emissions unit exceeded 1.47 kilograms VOC/liter of applied coating solids (based on a monthly volume-weighted average). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 45 days following the end of the calendar month.
4. The permittee shall submit annual reports that summarize the actual annual VOC emissions from this emissions unit. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

V. Testing Requirements

1. In accordance with OAC rule 3745-21-10, any determination of VOC content*, solids content, or density of a coating and/or cleanup material shall be based on the coating/cleanup material as employed (as applied), including the addition of any thinner or viscosity reducer to the coating/cleanup material. The company shall determine the composition of the coatings/cleanup materials by formulation data supplied by the manufacturer of the coating/cleanup material or from data determined by an analysis of each coating/cleanup material, as received, by Reference Method 24. The Ohio EPA may require the company, if it uses formulation data supplied by the manufacturer, to determine data used in the calculation of the VOC content of coatings/cleanup materials by Reference Method 24 or an equivalent or alternative method.

* "VOC content" means all volatile organic compounds that are in a coating/cleanup material expressed as pounds of VOC per gallon.

2. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

2.a Emission Limitation: 52.5 tons VOC/year

Applicable Compliance Method: The permittee shall demonstrate compliance with this emission limitation through the record keeping required in sections A.III.3 and 4 of the terms and conditions of this permit.

2.b Emission Limitation: 15.1 pounds VOC/gallon of deposited solids

Applicable Compliance Method: Compliance shall be based upon the record keeping specified in section A.III.2 of the terms and conditions of this permit.

2.c Emission Limitation: 1.47 Kg VOC/litter of applied coating solids (12.3 pounds of VOC emitted/gallon of deposited solids)

Applicable Compliance Method: Compliance shall be based upon the record keeping specified in section A.III.1 of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
interior topcoat (emissions unit K014)	OAC rule 3745-31-05 (PTI No. 03-8762)	5.4 pounds volatile organic compounds (VOC)/hour

2. Additional Terms and Conditions

- 2.a The 5.4 pounds VOC/hour emission limitation was established for PTI purposes to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with this limitation.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

None

IV. Reporting Requirements

None

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section B.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

Emission Limitation: 5.4 pounds VOC/hour, from coatings usage

Applicable Compliance Method: Compliance shall be determined by multiplying the maximum coatings usage rate of 1.8 gallons/hour by the maximum VOC content of all of the coatings (lbs/gallon).

VI. Miscellaneous Requirements

1. Modeling to demonstrate compliance with the Ohio EPA's "Air Toxic Policy" was not necessary because the emissions unit's maximum annual emissions for each toxic compound will be less than 1.0 ton. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified permit to install prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any pollutant that has a listed TLV to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new permit to install.

THIS IS THE LAST PAGE OF THE PERMIT
