Application No: 03-17131

Fac ID: 0351010002

DATE: 2/1/2007

Bunge North America (East) LLC
Evan Taulbee
751 E Farming St
Marion, OH 43302

Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, OH 43215

Sincerely,

Michael W. Ahern, Manager

**Permit To Install
Terms and Conditions**

**Issue Date: 2/1/2007
Effective Date: 2/1/2007**

FINAL PERMIT TO INSTALL 03-17131

Application Number: 03-17131
Facility ID: 0351010002
Permit Fee: **\$7400**
Name of Facility: Bunge North America (East) LLC
Person to Contact: Evan Taulbee
Address: 751 E Farming St
Marion, OH 43302

Location of proposed air contaminant source(s) [emissions unit(s)]:

**751 E Farming St
Marion, Ohio**

Description of proposed emissions unit(s):

Natural gas boiler, bean weighing and cleaning, elevator rail receiving and truck unloading

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski
Director

Bunge North America (East) LLC

PTI Application: 03-17131

Issued: 2/1/2007

Facility ID: 0351010002

Part I - GENERAL TERMS AND CONDITIONS

A. State and Federally Enforceable Permit-To-Install General Terms and Conditions

1. Monitoring and Related Recordkeeping and Reporting Requirements

- a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
 - i. The date, place (as defined in the permit), and time of sampling or measurements.
 - ii. The date(s) analyses were performed.
 - iii. The company or entity that performed the analyses.
 - iv. The analytical techniques or methods used.
 - v. The results of such analyses.
 - vi. The operating conditions existing at the time of sampling or measurement.
- b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
 - i. Reports of any required monitoring and/or recordkeeping of federally enforceable information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
 - ii. Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be made to the appropriate Ohio EPA District Office or local air agency. The written

Bunge North America (East) LLC
PTI Application: 03-17131
Issued: 2/1/2007

Facility ID: 0351010002

reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. See B.9 below if no deviations occurred during the quarter.

- iii. Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted (i.e., postmarked) to the appropriate Ohio EPA District Office or local air agency every six months, by January 31 and July 31 of each year for the previous six calendar months. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.
 - iv. If this permit is for an emissions unit located at a Title V facility, then each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.
- d. The permittee shall report actual emissions pursuant to OAC Chapter 3745-78 for the purpose of collecting Air Pollution Control Fees.

2. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports shall be submitted pursuant to OAC rule 3745-15-06.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

3. Risk Management Plans

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

Bunge North America (East) LLC

PTI Application: 03-17131

Issued: 2/1/2007

Facility ID: 0351010002

4. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

5. Severability Clause

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

6. General Requirements

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and re-issuance, or modification
- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

Bunge North America (East) LLC
PTI Application: 03-17131
Issued: 2/1/2007

Facility ID: 0351010002

7. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable permit-to-install fees within 30 days after the issuance of any permit-to-install. The permittee shall pay all applicable permit-to-operate fees within thirty days of the issuance of the invoice.

8. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA and the State and by citizens (to the extent allowed by section 304 of the Act) under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

9. Compliance Requirements

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
 - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with ORC section 3704.08.
 - iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.

Bunge North America (East) LLC

PTI Application: 03-17131

Issued: 2/1/2007

Facility ID: 0351010002

- iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
 - i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

10. Permit-To-Operate Application

- a. If the permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77, the permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or modified source(s) would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).
- b. If the permittee is required to apply for permit(s) pursuant to OAC Chapter 3745-35, the source(s) identified in this permit is (are) permitted to operate for a period of up to one year from the date the source(s) commenced operation. Permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the source(s) covered by this permit.

11. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

12. Air Pollution Nuisance

8

Bunge North America (East) LLC
PTI Application: 03-17131
Issued: 2/1/2007

Facility ID: 0351010002

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

Bunge North America (East) LLC

PTI Application: 03-17131

Issued: 2/1/2007

Facility ID: 0351010002

13. Permit-To-Install

A permit-to-install must be obtained pursuant to OAC Chapter 3745-31 prior to "installation" of "any air contaminant source" as defined in OAC rule 3745-31-01, or "modification", as defined in OAC rule 3745-31-01, of any emissions unit included in this permit.

B. State Only Enforceable Permit-To-Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping of state-only enforceable information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from state-only required emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing

Bunge North America (East) LLC

PTI Application: 03-17131

Issued: 2/1/2007

Facility ID: 0351010002

of any transfer of this permit.

Bunge North America (East) LLC

PTI Application: 03-17131

Issued: 2/1/2007

Facility ID: 0351010002

4. Authorization To Install or Modify

If applicable, authorization to install or modify any new or existing emissions unit included in this permit shall terminate within eighteen months of the effective date of the permit if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

5. Construction of New Sources(s)

This permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. This permit does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the application and terms and conditions of this permit. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of this permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Issuance of this permit is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

6. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

7. Applicability

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

8. Construction Compliance Certification

Bunge North America (East) LLC

PTI Application: 03-17131

Issued: 2/1/2007

Facility ID: 0351010002

If applicable, the applicant shall provide Ohio EPA with a written certification (see enclosed form if applicable) that the facility has been constructed in accordance with the permit-to-install application and the terms and conditions of the permit-to-install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

9. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly (i.e., postmarked), by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

C. Permit-To-Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
PE	2.58
Fugitive PE	21.02
Fugitive PM ₁₀	5.12
NO _x	20.19
CO	16.95
VOC	1.10
SO ₂	0.13

Bunge North America (East) LLC

Issued: 2/1/2007

Facility ID: 0351010002

Part II - FACILITY SPECIFIC TERMS AND CONDITIONS

A. State and Federally Enforceable Permit To Install Facility Specific Terms and Conditions

None

B. State Only Enforceable Permit To Install Facility Specific Terms and Conditions

None

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (B003) - 47 mmBtu/hr natural gas-fired boiler

Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
OAC rule 3745-31-05(A)(3) (Modification to change from the use of coal to natural gas)	4.61 lbs nitrogen oxides (NOx)/hr, 20.19 tons NOx/yr 3.87 lbs carbon dioxide (CO)/hr, 16.95 tons CO/yr 0.35 lb particulate emissions (PE)/hr, 1.53 tons PE/yr (see A.I.2.a) 0.25 lb volatile organic compounds (VOC)/hr, 1.10 tons VOC/yr 0.03 lb sulfur dioxide (SO ₂)/hr, 0.13 ton SO ₂ /yr Visible PE shall not exceed 10% opacity, as a 6-minute average. See A.I.2.b.
OAC rule 3745-17-07(A)	See A.I.2.c.
OAC rule 3745-17-10(B)	See A.I.2.c.
OAC rule 3745-21-08(B)	See A.I.2.e.
40 CFR Part 60, Subpart Dc	See A.I.2.f.

2. Additional Terms and Conditions

- 2.a All PE is assumed to be particulate matter less than 10 microns in size (PM₁₀).
- 2.b The "Best Available Technology" (BAT) control requirements for this emissions unit have been determined to be the use of natural gas, compliance with the terms and conditions of this permit and includes compliance with 40 CFR Part 60, Subpart Dc.
- 2.c The emission limitation established by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
- 2.d The emissions unit is exempt from the requirements of OAC rule 3745-18-06 in

Emissions Unit ID: B003

accordance with OAC rule 3745-18-06(A).

- 2.e** The permittee has satisfied the "best available control techniques and operating practices" required pursuant to OAC rule 3745-21-08(B) by committing to comply with the best available technology requirements established pursuant to OAC rule 3745-31-05 (A)(3) in this permit to install.

On November 5, 2002, OAC rule 3745-21-08 was revised to delete paragraph (B); therefore, paragraph (B) is no longer part of the State regulations. However, that rule revision has not yet been submitted to the U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-21-08, the requirement to satisfy the "best available control techniques and operating practices" still exists as part of the federally-approved SIP for Ohio.

- 2.f** This regulation does not specify emission limitations for units that only fire natural gas.
- 2.g** The hourly emissions limitations outlined are based upon the emissions unit's potential to emit (PTE). Therefore, no monitoring, record keeping, or reporting is required to demonstrate compliance with these limitations.
- 2.h** There are no SO₂ emission limitations established pursuant to Chapter 3745-18 because natural gas is the only fuel burned in this emissions unit.

II. Operational Restrictions

1. The permittee shall burn only natural gas in this emissions unit.

III. Monitoring and/or Recordkeeping Requirements

1. The permittee shall maintain monthly records of the quantity of natural gas burned in this emissions unit, in mm cu. ft.
2. For each day during which the permittee burns a fuel other than natural gas the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than pipeline quality natural gas was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
2. This emissions unit is subject to the applicable provisions of Subpart Dc of the New

Issued: 2/1/2007

Source Performance Standards (NSPS) as promulgated by the United States Environmental Protection Agency, 40 CFR Part 60.

The application and enforcement of these standards are delegated to the Ohio EPA. The requirements of 40 CFR Part 60 are also federally enforceable.

Pursuant to 40 CFR Part 60.7, the permittee is hereby advised of the requirement to report the following at the appropriate times:

- a. construction date (no later than 30 days after such date);
- b. actual start-up date (within 15 days after such date); and,
- c. date of performance testing (if required, at least 30 days prior to testing).

Reports are to be sent to:

Ohio Environmental Protection Agency
DAPC - Permit Management Unit
P. O. Box 163669
Columbus, Ohio 43216-3669

and

Ohio Environmental Protection Agency
Northwest District Office
Division of Air Pollution Control
347 North Dunbridge Road
Bowling Green, Ohio 43402

V. Testing Requirements

1. Compliance with the emission limitations in the terms and conditions of this permit shall be determined in accordance with the following methods:
 - a. Emission Limitations: 4.61 lbs NO_x/hr and 20.19 tons NO_x/yr

Applicable Compliance Method:

Compliance with the hourly allowable NO_x emission limitation may be determined by multiplying the emission factor (AP-42, Section 1.4, Table 1.4-1.) of 100 lb NO_x/10⁶ scf by a conversion factor of 1 scf/1020 Btu, and by the

Bunge North America (East) LLC

DTI Application: 02 17124

Facility ID: 0351010002

Emissions Unit ID: B003

maximum heat input of 47 mmBtu/hr.

If required, the permittee shall demonstrate compliance with the hourly allowable NOx emission limitation by testing in accordance with Methods 1 - 4 and 7 of 40 CFR Part 60, Appendix A.

Compliance with the annual emission limitation may be determined by multiplying the hourly emission limitation by 8760 hours/year, and then dividing by 2000 lbs/ton.

Issued: 2/1/2007

- b. Emission Limitations: 3.87 lbs CO/hr and 16.95 tons CO/yr

Applicable Compliance Method:

Compliance with the hourly allowable CO emission limitation may be determined by multiplying the emission factor (from AP-42, Section 1.4, Table 1.4-1.) of 84 lb CO/10⁶ scf by the a conversion factor of 1 scf/1020 Btu, and by the maximum heat input of 47 mmBtu/hr.

If required, the permittee shall demonstrate compliance with the hourly allowable CO emission limitation by testing in accordance with Methods 1 - 4, and 10 of 40 CFR Part 60, Appendix A.

Compliance with the annual emission limitation may be determined by multiplying the hourly emission limitation by 8760 hours/year, and then dividing by 2000 lbs/ton.

- c. Emission Limitations: 0.35 lb PE/hr and 1.53 tons PE/yr

Applicable Compliance Method:

Compliance with the hourly allowable PE limitation may be determined by multiplying the emission factor (from AP-42, Section 1.4, Table 1.4-2.) of 7.6 lb PE/10⁶ scf by a conversion factor of 1 scf/1020 Btu, and by the maximum heat input of 47 mmBtu/hr.

If required, the permittee shall demonstrate compliance with the hourly allowable PE limitation by testing in accordance with Methods 1 - 5 of 40 CFR Part 60, Appendix A.

Compliance with the annual emission limitation may be determined by multiplying the hourly emission limitation by 8760 hours/year, and then dividing by 2000 lbs/ton.

- d. Emission Limitations: 0.25 lb VOC/hr and 1.10 tons VOC/yr

Applicable Compliance Method:

Compliance with the hourly allowable VOC emission limitation may be determined by multiplying the emission factor (from AP-42, Section 1.4, Table 1.4-2.) of 5.5 lb VOC/10⁶ scf by a conversion factor of 1 scf/1020 Btu, and by the maximum heat input of 47 mmBtu/hr.

If required, the permittee shall demonstrate compliance with the hourly allowable

Issued: 2/1/2007

VOC emission limitation by testing in accordance with Methods 1 - 4 and 18, 25 or 25A of 40 CFR Part 60, Appendix A.

Compliance with the annual emission limitation may be determined by multiplying the hourly emission limitation by 8760 hours/year, and then dividing by 2000 lbs/ton.

- e. Emission Limitation: 0.03 lb SO₂/hr and 0.13 tons SO₂/yr

Applicable Compliance Method:

Compliance with the hourly allowable SO₂ emission limitation may be determined by multiplying the emission factor (from AP-42, Section 1.4, Table 1.4-2.) of 0.6 lb PE/10⁶ scf by a conversion factor of 1 scf/1020 Btu, and by the maximum heat input of 47 mmBtu/hr.

If required, the permittee shall demonstrate compliance with the hourly allowable SO₂ emission limitation by testing in accordance with Methods 1 - 4 and 6 of 40 CFR Part 60, Appendix A.

Compliance with the annual emission limitation may be determined by multiplying the hourly emission limitation by 8760 hours/year, and then dividing by 2000 lbs/ton.

- f. Emission Limitation: Visible PE shall not exceed 10% opacity, as a 6-minute average.

Applicable Compliance Method:

The permittee shall demonstrate compliance by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A.

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (B003) - 47 mmBtu/hr natural gas fired boiler

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**A. State and Federally Enforceable Section****I. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (F005) - Elevator rail receiving

Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
OAC rule 3745-31-05(A)(3)	18.92 tons fugitive particulate emissions (PE)/yr 4.61 tons fugitive particulate matter less than 10 microns in size (PM ₁₀)/yr See A.I.2.a.
OAC rule 3745-17-07(B)	See A.I.2.b.
OAC rule 3745-17-08(B)	See A.I.2.c.
40 CFR Part 60, Subpart DD	See A.I.2.d.

2. Additional Terms and Conditions

- 2.a Best available technology (BAT) control requirements for this emissions unit have been determined to be the use of an enclosure, compliance with the terms and conditions of this permit and includes compliance with 40 CFR Part 60, Subpart DD.
- 2.b This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).
- 2.c This facility is not located within an "Appendix A" area as identified in OAC rule 3745-17-08 (it is located in Marion County). Therefore, pursuant to OAC rule 3745-17-08(A), this emissions unit is exempt from the requirements of OAC rule 3745-17-08(B).
- 2.d No owner or operator subject to the provisions of this subpart shall cause to be

Emissions Unit ID: F005

Issued: 2/1/2007

discharged into the atmosphere any fugitive emissions from any individual truck unloading station, railcar unloading station, or railcar loading station, which exhibits greater than 5 percent opacity.

Issued: 2/1/2007

II. Operational Restrictions

None

III. Monitoring and/or Recordkeeping Requirements

1. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible fugitive particulate emissions from the egress points (i.e., building windows, doors, roof monitors, etc.) serving this emissions unit. The presence or absence of any visible fugitive emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the location and color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emission incident; and
 - e. any corrective actions taken to eliminate the visible emissions.

IV. Reporting Requirements

1. The permittee shall submit semiannual written reports that (a) identify all days during which any visible fugitive particulate emissions were observed from the egress points (i.e., building windows, doors, roof monitors, etc.) serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible fugitive particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I.1 of the terms and conditions of this permit shall be determined in accordance with the following methods:
 - a. Emission Limitation: 18.92 tons fugitive PE/yr

Applicable Compliance Method: The tons of fugitive PE/yr limitation was developed by multiplying the AP-42 emission factors [from Table 9.9.1-1 (5/03)] of 0.032 lb PE/ton, the maximum hourly throughput rate of 450 tons/hr, the capture efficiency of 70% (1-0.70) and the maximum annual operating schedule

Emissions Unit ID: F005

of 8760 hrs/yr, and then dividing by 2000 lbs/ton.

- b. Emission Limitation: 4.61 tons fugitive PM₁₀/yr

Applicable Compliance Method: The tons of fugitive PM₁₀/yr limitation was developed by multiplying the AP-42 emission factors [from Table 9.9.1-1 (5/03)] of 0.0078 lb PM₁₀/ton, the maximum hourly throughput rate of 450 tons/hr, the capture efficiency of 70% (1-0.70) and the maximum annual operating schedule of 8760 hrs/yr, and then dividing by 2000 lbs/ton.

- c. Emission Limitation: No owner or operator subject to the provisions of this subpart shall cause to be discharged into the atmosphere any fugitive emission from any individual truck unloading station, railcar unloading station, or railcar loading station, which exhibits greater than 5 percent opacity.

Applicable Compliance Method: The permittee shall demonstrate compliance with the visible emissions limitation above pursuant to Method 9 of 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

Issued: 2/1/2007

B. State Only Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (F005) - Elevator rail receiving

VI. Miscellaneous Requirements

None

Issued: 2/1/2007

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (P012) - Bean weighing and cleaning

Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
OAC rule 3745-31-05(A)(3) (Modification to allow for increased capacity)	0.0025 grain (gr) particulate emissions (PE)/dry standard cubic foot (dscf), 0.11 lb PE/hr, 0.48 ton PE/yr (see A.I.2.a) Visible PE shall not exceed 20% opacity, as a 6-minute average. See A.I.2.b.
OAC rule 3745-17-07(A)	See A.I.2.c.
OAC rule 3745-17-11(B)	See A.I.2.d.

2. Additional Terms and Conditions

- 2.a All PE is assumed to be particulate matter less than 10 microns in size (PM₁₀).
- 2.b The "Best Available Technology" (BAT) control requirements for this emissions unit have been determined to be the use of baghouse with a maximum outlet grain loading of 0.0025 gr PE/dscf and compliance with the terms and conditions of this permit.
- 2.c These emissions units are exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, Table 1 does not apply because the facility is located in Marion County.

II. Operational Restrictions

None

III. Monitoring and/or Recordkeeping Requirements

1. The permittee shall properly install, operate, and maintain equipment to continuously monitor and record the pressure drop, in inches of water, across the baghouse during operation of this emissions unit, including periods of startup and shutdown. The monitoring equipment shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop, in inches of water, across the baghouse on a weekly basis.

Whenever the monitored value for the pressure drop deviates from the range specified below, the permittee shall promptly investigate the cause of the deviation. The permittee shall maintain records of the following information for each investigation: the date and time the deviation began and the magnitude of the deviation at that time, the date(s) the investigation was conducted, the names of the personnel who conducted the investigation, and the findings and recommendations.

In response to each required investigation to determine the cause of a deviation, the permittee shall take prompt corrective action to bring the operation of the control equipment within the acceptable range specified below, unless the permittee determines that corrective action is not necessary and documents the reasons for that determination and the date and time the deviation ended. The permittee shall maintain records of the following information for each corrective action taken: a description of the corrective action, the date it was completed, the date and time the deviation ended, the total period of time (in minutes) during which there was a deviation, the pressure drop immediately after the corrective action, and the names of the personnel who performed the work. Investigation and records required by this paragraph does not eliminate the need to comply with the requirements of OAC rule 3745-15-06 if it is determined that a malfunction has occurred.

The acceptable range for the pressure drop across the baghouse is 0.5 to 8 inches of water.

The range is effective for the duration of this permit, unless revisions are requested by the permittee and approved in writing by the appropriate Ohio EPA District Office or local air agency. The permittee may request revisions to the range based upon information obtained during future particulate emission tests that demonstrate compliance with the allowable particulate emission rate for this emissions unit. In addition, approved revisions to the range will not constitute a relaxation of the monitoring requirements of this permit and may be incorporated into this permit by means of a minor permit modification.

Issued: 2/1/2007

IV. Reporting Requirements

1. The permittee shall submit quarterly reports that identify the following information concerning the operation of the control equipment during the operation of this emissions unit:
 - a. each period of time when the pressure drop across the baghouse field was outside of the acceptable range;
 - b. an identification of each incident of deviation described in (a) where a prompt investigation was not conducted;
 - c. an identification of each incident of deviation described in (a) where prompt corrective action, that would bring the pressure drop into compliance with the acceptable range, was determined to be necessary and was not taken; and
 - d. an identification of each incident of deviation described in (a) where proper records were not maintained for the investigation and/or the corrective action.

These quarterly reports shall be submitted (i.e., postmarked) by January 31, April 30, July 31, and October 31 of each year; and each report shall cover the previous calendar quarter.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I.1 of the terms and conditions of this permit shall be determined in accordance with the following methods:

- a. Emission Limitations: 0.0025 gr PE/dscf, 0.11 lb PE/hr, 0.48 tons PE/yr

Applicable Compliance Method: The 0.0025 gr/dscf limitation is the established BAT maximum outlet concentration. The lb PE/hr limitation was established by multiplying the maximum outlet concentration of 0.0025 gr/dscf by the maximum volumetric air flow (5000 acfm), the appropriate conversion factors of 7000 grains/lb, 1 dscf/1 acfm, 60 minutes/hr.

Compliance with the tons PE/yr limitation shall be determined by multiplying the hourly emission limitation by 8760 hours/year and dividing by 2000 lbs/ton.

- b. Emission Limitation: Visible PE shall not exceed 20% opacity, as a 6-minute

Bunge North America (East) LLC

DTI Application: 02 17124

Facility ID: 0351010002

Emissions Unit ID: P012

average.

Applicable Compliance Method: The permittee shall demonstrate compliance with the visible emissions limitation above pursuant to Method 9 of 40 CFR, Part 60, Appendix A.

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (P906) - 2 3 track rail unloading

Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
OAC rule 3745-31-05(A)(3)	0.003 grain (gr) particulate emissions (PE)/dry standard cubic foot (dscf), 0.13 lb PE/hr, 0.57 ton PE/hr (see A.I.2.a) 2.10 tons fugitive PE/yr 0.51 ton fugitive particulate matter less than 10 microns in size (PM ₁₀)/yr See A.I.2.b.
OAC rule 3745-17-07(A)	See A.I.2.c.
OAC rule 3745-17-07(B)	See A.I.2.d.
OAC rule 3745-17-08(B)	See A.I.2.e.
OAC rule 3745-17-11(B)	See A.I.2.f.
40 CFR, Part 60, Subpart DD	See A.I.2.g and A.I.2.h.

2. Additional Terms and Conditions

- 2.a All PE is assumed to be particulate matter less than 10 microns in size (PM₁₀).
- 2.b The "Best Available Technology" (BAT) control requirements for this emissions unit have been determined to be the use of a baghouse with a maximum outlet grain loading of 0.003 gr PE/dscf, the use of an enclosure, and compliance with the terms and conditions of this permit, including compliance with 40 CFR, Part 60, Subpart DD.
- 2.c These emissions units are exempt from the visible emissions limitations

Emissions Unit ID: P906

specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.

- 2.d** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).
- 2.e** This facility is not located within an "Appendix A" area as identified in OAC rule 3745-17-08 (it is located in Marion County). Therefore, pursuant to OAC rule 3745-17-08(A), this emissions unit is exempt from the requirements of OAC rule 3745-17-08(B).
- 2.f** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, Table 1 does not apply because the facility is located in Marion County.
- 2.g** No owner or operator subject to the provisions of this subpart shall cause to be discharged into the atmosphere from any affected facility except a grain dryer any process emission which exhibits greater than 0 percent opacity.
- 2.h** No owner or operator subject to the provisions of this subpart shall cause to be discharged into the atmosphere any fugitive emission from any individual truck unloading station, railcar unloading station, or railcar loading station, which exhibits greater than 5 percent opacity.

II. Operational Restrictions

None

III. Monitoring and/or Recordkeeping Requirements

1. The permittee shall properly install, operate, and maintain equipment to continuously monitor and record the pressure drop, in inches of water, across the baghouse during operation of this emissions unit, including periods of startup and shutdown. The monitoring equipment shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop, in inches of water, across the baghouse on a weekly basis.

Whenever the monitored value for the pressure drop deviates from the range specified below, the permittee shall promptly investigate the cause of the deviation. The permittee shall maintain records of the following information for each investigation: the date and time the deviation began and the magnitude of the deviation at that time, the date(s) the investigation was conducted, the names of the personnel who conducted the investigation, and the findings and recommendations.

Issued: 2/1/2007

In response to each required investigation to determine the cause of a deviation, the permittee shall take prompt corrective action to bring the operation of the control equipment within the acceptable range specified below, unless the permittee determines that corrective action is not necessary and documents the reasons for that determination and the date and time the deviation ended. The permittee shall maintain records of the following information for each corrective action taken: a description of the corrective action, the date it was completed, the date and time the deviation ended, the total period of time (in minutes) during which there was a deviation, the pressure drop immediately after the corrective action, and the names of the personnel who performed the work. Investigation and records required by this paragraph does not eliminate the need to comply with the requirements of OAC rule 3745-15-06 if it is determined that a malfunction has occurred.

The acceptable range for the pressure drop across the baghouse is 0.5 to 8 inches of water.

The range is effective for the duration of this permit, unless revisions are requested by the permittee and approved in writing by the appropriate Ohio EPA District Office or local air agency. The permittee may request revisions to the range based upon information obtained during future particulate emission tests that demonstrate compliance with the allowable particulate emission rate for this emissions unit. In addition, approved revisions to the range will not constitute a relaxation of the monitoring requirements of this permit and may be incorporated into this permit by means of a minor permit modification.

2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible fugitive particulate emissions from the egress points (i.e., building windows, doors, roof monitors, etc.) serving this emissions unit. The presence or absence of any visible fugitive emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the location and color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emission incident; and
 - e. any corrective actions taken to eliminate the visible emissions.

IV. Reporting Requirements

Emissions Unit ID: P906

1. The permittee shall submit quarterly reports that identify the following information concerning the operation of the control equipment during the operation of this emissions unit:
 - a. each period of time when the pressure drop across the baghouse field was outside of the acceptable range;
 - b. an identification of each incident of deviation described in (a) where a prompt investigation was not conducted;
 - c. an identification of each incident of deviation described in (a) where prompt corrective action, that would bring the pressure drop into compliance with the acceptable range, was determined to be necessary and was not taken; and
 - d. an identification of each incident of deviation described in (a) where proper records were not maintained for the investigation and/or the corrective action.

These quarterly reports shall be submitted (i.e., postmarked) by January 31, April 30, July 31, and October 31 of each year; and each report shall cover the previous calendar quarter.

2. The permittee shall submit semiannual written reports that (a) identify all days during which any visible fugitive particulate emissions were observed from the egress points (i.e., building windows, doors, roof monitors, etc.) serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible fugitive particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I.1 of the terms and conditions of this permit shall be determined in accordance with the following methods:
 - a. Emission Limitations: 0.003 gr PE/dscf, 0.13 lb PE/hr, 0.57 ton PE/yr

Applicable Compliance Method: The 0.003 gr/dscf limitation is the established BAT maximum outlet concentration. The lb PE/hr limitation was established by multiplying the maximum outlet concentration of 0.003 gr/dscf by the maximum volumetric air flow (5000 acfm), the appropriate conversion factors of 7000 grains/lb, 1 dscf/1 acfm, 60 minutes/hr.

Compliance with the tons PE/yr limitation shall be determined by multiplying the hourly emission limitation by 8760 hours/year, and then dividing by 2000 lbs/ton.

Issued: 2/1/2007

- b. Emission Limitation: 2.10 tons fugitive PE/yr

Applicable Compliance Method: The tons of fugitive PE/yr limitation was developed by multiplying the AP-42 emission factors [from Table 9.9.1-1 (5/03)] of 0.032 lb PE/ton, the maximum hourly throughput rate of 50 tons/hr, the capture efficiency of 70% (1-0.70) and the maximum annual operating schedule of 8760 hrs/yr, and then dividing by 2000 lbs/ton.

- c. Emission Limitation: 0.51 tons fugitive PM₁₀/yr

Applicable Compliance Method: The tons of fugitive PM₁₀/yr limitation was developed by multiplying the AP-42 emission factors [from Table 9.9.1-1 (5/03)] of 0.0078 lb PM₁₀/ton, the maximum hourly throughput rate of 50 tons/hr, the capture efficiency of 70% (1-0.70) and the maximum annual operating schedule of 8760 hrs/yr, and then dividing by 2000 lbs/ton.

- d. Emission Limitation: No owner or operator subject to the provisions of this subpart shall cause to be discharged into the atmosphere from any affected facility except a grain dryer any process emission which: exhibits greater than 0 percent opacity.

Applicable Compliance Method: The permittee shall demonstrate compliance with the visible emissions limitation above pursuant to Method 9 of 40 CFR, Part 60, Appendix A.

- e. Emission Limitation: No owner or operator subject to the provisions of this subpart shall cause to be discharged into the atmosphere any fugitive emission from any individual truck unloading station, railcar unloading station, or railcar loading station, which exhibits greater than 5 percent opacity.

Applicable Compliance Method: The permittee shall demonstrate compliance with the visible emissions limitation above pursuant to Method 9 of 40 CFR, Part 60, Appendix A.
