RE: Air Permit to Operate Application
Submitted 10/28/02
For Emissions Unit F001,P901

Martin Block Co.
Richard Coriell
290 Twin Oak Drive
Jackson, OH 45640

Dear Richard Coriell:

This letter is in response to your 10/28/02 submittal of an air permit to operate application for the above-referenced air pollution source(s). The Ohio EPA has completed a preliminary review of your application and has determined that the application is complete. This completeness review does not imply that the application is approvable, only that the Ohio EPA has enough information to continue the review.

The next step for your application is for us to do a technical review. The technical reviews are done generally on a first-come, first-served basis. As soon as the complete permit applications received before yours are reviewed, your application will be reviewed. At that time, a permit reviewer may contact you for additional information or for clarification. Once the technical review is complete, a recommendation will be forwarded to the Ohio EPA, Division of Air Pollution Control (DAPC). If the DAPC review determines the recommendation is appropriate, then an air permit to operate an emissions unit will either be issued or the application will be denied.

Please be assured that we will do everything possible to process your application in an expeditious fashion. If you have any questions on your permit application, please contact me at (740) 380-5424.

Sincerely,

Steve Alspach
Southeast District Office
