RE: Air Permit to Operate Application  
Submitted 01/24/02  
For Emissions Units F001, P003

Agland Co-op Inc  
John W. Smith  
11797 Buckhorn Rd. SW  
Newcomerstown, OH 43832

Dear John W. Smith:

This letter is in response to your 01/24/02 submittal of an air permit to operate application for the above-referenced air pollution source(s). The Ohio EPA has completed a preliminary review of your application and has determined that the application is complete. This completeness review does not imply that the application is approvable, only that the Ohio EPA has enough information to continue the review.

The next step for your application is for us to do a technical review. The technical reviews are done generally on a first-come, first-served basis. As soon as the complete permit applications received before yours are reviewed, your application will be reviewed. At that time, a permit reviewer may contact you for additional information or for clarification. Once the technical review is complete, a recommendation will be forwarded to the Ohio EPA, Division of Air Pollution Control (DAPC). If the DAPC review determines the recommendation is appropriate, then an air permit to operate an emissions unit will either be issued or the application will be denied.

Please be assured that we will do everything possible to process your application in an expeditious fashion. If you have any questions on your permit application, please contact me at (740) 385-8501.

Sincerely,

Glen Greenwood  
Southeast District Office
