Providence Hospital
John P Zarvis
1912 Hayes Avenue
Sandusky, OH 44870

You are hereby notified that the Ohio Environmental Protection Agency has made a draft action recommending that the Director issue a Permit to Install for the air contaminant source(s) [emissions unit(s)] shown on the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the proposed installation. A public notice concerning the draft permit will appear in the Ohio EPA Weekly Review and the newspaper in the county where the facility will be located. Public comments will be accepted by the field office within 30 days of the date of publication in the newspaper. Any comments you have on the draft permit should be directed to the appropriate field office within the comment period. A copy of your comments should also be mailed to Robert Hodanbosi, Division of Air Pollution Control, Ohio EPA, P.O. Box 1049, Columbus, OH, 43266-0149.

A Permit to Install may be issued in proposed or final form based on the draft action, any written public comments received within 30 days of the public notice, or record of a public meeting if one is held. You will be notified in writing of a scheduled public meeting. Upon issuance of a final Permit to Install a fee of **\$400** will be due. Please do not submit any payment now.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469. If you have any questions about this draft permit, please contact the field office where you submitted your application, or Mike Ahern, Field Operations & Permit Section at (614) 644-3631.

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

DRAFT PERMIT TO INSTALL 03-3231

Application Number: 03-3231

APS Premise Number: 0322020104

Permit Fee: **To be entered upon final issuance**

Name of Facility: Providence Hospital

Person to Contact: John P Zarvis

Address: 1912 Hayes Avenue
Sandusky, OH 44870

Location of proposed air contaminant source(s) [emissions unit(s)]:

**1912 Hayes Avenue
Sandusky, Ohio**

Description of proposed emissions unit(s):

365 LBS/HR INFECTIOUS WASTE INCINERATOR MODIFICATION.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may

be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources are inadequate or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities prove to be inadequate or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit to Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within thirty (30) days after commencing operation of the emissions unit(s) covered by this permit.

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

**SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS**

<u>Pollutant</u>	<u>TPY Increase Due to Modification</u>	<u>Tons Per Year</u>
PE	-1.24	0.365
HCl	-13.5	4.0
NO _x	-0.69	0.62

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

- The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Infectious Waste Incinerator (modification) Modification involves an increase in the permit allowable emissions limitation	OAC rule 3745-31-05 OAC 3745-35-07(B) OAC rule 3745-75-02	4.0 TPY HCl 0.62 lb NOx/hr, 0.62 TPY NOx 0.365 lb PE/hr, 0.365 TPY PE 4.0 TPY HCl based on a 2000 hour operating restriction as a rolling, 12-month summation 0.10 lb PE/100 lbs waste charged 4.0 lb HCl/hr 100 ppm CO by volume, on a dry basis, adjusted to 7% oxygen as an hourly average 0.0042 lb/hr arsenic and compounds 0.0076 lb/hr beryllium and compounds 0.010 lb/hr cadmium and compounds 0.0015 lb/hr chromium and compounds 0.068 lb/hr lead and compounds 0.011 lb/hr mercury and compounds 0.0076 lb/hr nickel and compounds Visible PE shall not exceed 5 percent opacity, as a 6-minute average, except for a 1-minute period in any continuous 60-minute period during which the opacity shall not exceed 10 percent.
	OAC rule 3745-17-07(A)	See section A.2.a.

2. Additional Terms and Conditions

- 2.a** The emission limitation based on this applicable rule is less stringent than the limit established pursuant to OAC rule 3745-75-02.
- 2.b** All infectious waste shall be incinerated in a controlled air, multi-chamber incinerator, or equivalent technology as approved by the Director, which provides complete combustion of the waste, excluding metallic items, to carbonized or mineralized ash. Any ash that does not meet this criterion shall be re-incinerated.
- 2.c** The stack(s) for this incinerator shall be designed to minimize the impact of the emissions on employees, residents, patients, visitors, and nearby residences. The design shall meet good engineering practices so as not to cause excessive concentrations of any air contaminant at any air intake for heating and cooling of any building or at operable windows or doors.
- 2.d** If this incinerator is mechanically fed, it must be equipped with an air lock system to prevent opening the incinerator to the room environment. The volume of the loading system shall be designed so as to prevent overcharging of the unit to ensure complete combustion of the waste.

B. Operational Restrictions

- 1. The maximum annual operating hours for this emissions unit shall not exceed 2000 hours, based upon a rolling, 12-month summation of the operating hours. Emission Unit N002 is an existing emissions unit and, as such, has existing records of operating hours in lieu of establishing monthly operating hour restrictions for the first year.
- 2. The primary combustion chamber for this incinerator shall be maintained so that the exit gas is at a minimum temperature of 1400 degrees Fahrenheit. The secondary combustion chamber for this incinerator shall be operated so that the exit gas temperature is at a minimum of 1800 degrees Fahrenheit.
- 3. The secondary combustion chamber of this incinerator shall allow for a 1-second retention time at 1800 degrees Fahrenheit, in accordance with OAC rule 3745-75-03(D).
- 4. Infectious waste shall not be loaded into the primary combustion chamber of this incinerator until the exit gas temperature has reached 1400 degrees Fahrenheit.
- 5. This incinerator, including all associated equipment and grounds, shall be designed, operated and maintained to prevent the emission of objectionable odors.
- 6. The permittee shall not intentionally dispose of the following items by burning in the incinerator:

- a. visible globules of mercury;
 - b. nickel-cadmium batteries; and
 - c. switches, thermometers, batteries and other devices containing mercury.
7. The permittee shall have this incinerator inspected monthly using preventive maintenance procedures recommended by the equipment manufacturer. Each inspection shall include a written report identifying any needed repairs to the unit. If repairs are needed, the incinerator shall not be operated if the operation would result in any exceedance of the emission limits detailed in this permit. These repairs shall be completed within 30 days of the inspection. If a time period longer than 30 days is needed to complete the repairs, the appropriate Ohio EPA District Office or local air agency shall be notified in writing. This notice shall list the repairs needed and the reason(s) the repairs could not be accomplished within the required time period. All inspection and repair reports shall be kept by the permittee for a period of 5 years and shall be made available to the Director (the appropriate Ohio EPA District Office or local air agency) upon request.
8. This incinerator shall be operated only by properly trained personnel. A minimum of 40 hours of incinerator operation training shall be provided to each operator before he or she is allowed to operate this incinerator. This may include, for each operator, the successful completion of the training course for the operation and maintenance of hospital medical waste incinerators developed by the Control Technology Center, U.S. EPA, courses or instructions provided by incinerator manufacturers, professional engineering organizations, colleges or universities, or Ohio EPA. A copy of all the training records for each operator shall be maintained on file for a period of 5 years and shall be immediately available to the Director (the appropriate Ohio EPA District Office or local air agency) upon request.

C. Monitoring and/or Recordkeeping Requirements

1. The permittee shall maintain monthly records of the following information:
 - a. The operating hours for each month.
 - b. The rolling, 12-month summation of the operating hours.
2. The permittee shall operate and maintain a continuous temperature monitor and recorder which measures and records the primary combustion exhaust gas temperature, the secondary combustion exhaust gas temperature, and the bypass stack temperature (if applicable) when the incinerator is in operation. Units shall be in degrees Fahrenheit. Accuracy for each thermocouple, monitor and recorder shall be guaranteed by the manufacturer to be within ± 0.75 percent of the temperature being measured or ± 2.5 degrees Fahrenheit, whichever is greater. The temperature monitors and recorders shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, instructions and operating manuals.
3. Radioactive waste shall not be charged to this incinerator. The permittee shall operate and maintain equipment to continuously monitor the radioactivity of all waste prior to combustion. This monitor shall be equipped with an alarm which sounds a warning when radioactive waste is present. For

purposes of this permit, radioactive waste shall be defined as any waste which measures above ambient background levels of radiation. All radioactive infectious waste shall be managed in accordance with the applicable rules of the Ohio Department of Health and the regulations of the United States Nuclear Regulatory Commission.

4. A scale (accurate to within one pound) shall be installed near this incinerator to weigh all of the material charged to the unit. A written log shall be kept to record the amount of material charged to this unit on a pounds per hour basis. Alternative arrangements may be approved by the Director provided they can be shown to be of equivalent effectiveness as a method of regulating flow into the incinerator and generating a permanent record of charging rates.
5. A logbook shall be maintained for each continuous emissions monitoring system installed on this incinerator to document all activities involving the monitoring systems. Appropriate records should include, as a minimum, preventive maintenance, quality assurance and corrective action activities. The logbook shall be kept on file for a period of 5 years and shall be made available for inspection by the Ohio EPA or its authorized representatives at any reasonable time.

D. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports which identify all exceedances of the rolling, 12-month operating hours limitation.
2. The permittee shall submit annual reports which provide the following information for the previous calendar year:
 - a. the total amount of infectious waste incinerated, in tons; and
 - b. an identification of all hours of operation during which the charge rate exceeded the incinerator's design capacity, including the actual charge rates for all such hours of operation.
3. The permittee shall submit annual deviation (excursion) reports which provide the following information for each period during which the primary or secondary combustion chamber exhaust gas temperatures fall below the applicable limitations:
 - a. the date of the excursion;
 - b. the time interval over which the excursion occurred;
 - c. the temperature values during the excursion;
 - d. the cause(s) for the excursion; and
 - e. the corrective action which has been or will be taken to prevent similar excursions in the future.
4. These reports shall be submitted by January 31 of each year.

E. Testing Requirements

1. Compliance with the emission limitation(s) in Section A.I. of these terms and conditions shall be determined in accordance with the following method(s):

a. Emission Limitation

4.0 lbs HCl/hr

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 26 which is located in 40 CFR Part 60, Appendix A.

b. Emission Limitation

4.0 TPY HCl

Applicable Compliance Method

The tons/yr limitation was developed by multiplying the lb/hr limitation by the restricted operating schedule of 2000 hrs/yr in a rolling, 12-month period, and dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the hourly limitation and the operational restriction, compliance will also be shown with the annual limitation.

c. Emission Limitation

0.10 lb PE/100 lbs charged

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 5 which is located in 40 CFR Part 60, Appendix A.

d. Emission Limitation

0.365 lb PE/hr

Applicable Compliance Method

The emission limitation of 0.365 lb PE/hr was developed by multiplying the emission limitation of 0.10 lb PE/100 lbs charged by the maximum capacity of the incinerator (365 lb charged/hr). Therefore, provided compliance is shown with the emission limitation listed in E.1.c., compliance will also be shown with the hourly limitation.

e. Emission Limitation

0.365 TPY PE

Applicable Compliance Method

The tons/yr limitation was developed by multiplying the lb/hr limitation by the maximum operating schedule of 2000 hrs/yr in a rolling, 12-month period, and dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the hourly limitation and the operational restriction, compliance will also be shown with the annual limitation.

f. Emission Limitation

0.62 lb NO_x/hr

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 7 which is located in 40 CFR Part 60, Appendix A.

g. Emission Limitation

0.62 TPY NO_x

Applicable Compliance Method

The tons/yr limitation was developed by multiplying the lb/hr limitation by the maximum operating schedule of 2000 hrs/yr in a rolling, 12-month period, and dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the hourly limitation and the operational restriction, compliance will also be shown with the annual limitation.

h. Emission Limitation

100 ppm by volume carbon monoxide

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 10 which is located in 40 CFR Part 60, Appendix A.

i. Emission Limitation

0.0042 lb/hr arsenic and compounds

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 29 which is located in 40 CFR Part 60, Appendix A.

j. Emission Limitation

0.0076 lb/hr beryllium and compounds

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 29 which is located in 40 CFR Part 60, Appendix A.

k. Emission Limitation

0.010 lb/hr cadmium and compounds

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 29 which is located in 40 CFR Part 60, Appendix A.

l. Emission Limitation

0.0015 lb/hr chromium and compounds

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 29 which is located in 40 CFR Part 60, Appendix A.

m. Emission Limitation

0.068 lb/hr lead and compounds

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 12 which is located in 40 CFR Part 60, Appendix A.

n. Emission Limitation

0.011 lb/hr mercury and compounds

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 29 which is located in 40 CFR Part 60, Appendix A.

o. Emission Limitation

0.0076 lb/hr nickel and compounds

Applicable Compliance Method

The test method employed to demonstrate compliance with the emission limitation shall be Method 29 which is located in 40 CFR Part 60, Appendix A.

p. Emission Limitation

visible PE shall not exceed 5 percent opacity, as a 6-minute average, except for a 1-minute period in any continuous 60-minute period during which opacity shall not exceed 10 percent

Applicable Compliance Method

The test method employed to demonstrate compliance with the visible emission limitation shall be Method 9 which is located in 40 CFR Part 60, Appendix A.

q. Operational Restriction

The maximum annual operating hours shall not exceed 2000 hours per year based on a rolling, 12-month summation.

Applicable Compliance Method

Compliance shall be determined by the recordkeeping specified in section C.1.

2. Within 6 months of the issuance of this permit, the permittee shall conduct performance tests to demonstrate compliance with the allowable mass emissions rates or control efficiency rate as specified in OAC rule 3745-75-02(A) through (F), as applicable, for particulates, hydrogen chloride, carbon monoxide, arsenic, beryllium, cadmium, chromium, lead, mercury, and nickel. The emissions test(s) shall be conducted in accordance with the test methods and procedures specified in OAC rule 3745-75-06; 40 CFR Part 60, Appendix A, Methods 1-5, 10, 26; 40 CFR Part 266, Appendix IX, section 3 (will be 40 CFR Part 60, Method 29); and 40 CFR Part 61, Appendix B,

Method 101A. The test(s) shall be conducted under maximum charging rates unless otherwise specified or approved by the Ohio EPA.

3. Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission test(s).

Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment and acquire data and information regarding the emissions unit operating parameters.

A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA district office or local air agency within 30 days following completion of the test(s).

F. Miscellaneous Requirements

1. The terms and conditions in this permit shall supersede the air pollution control requirements contained in Permit to Install number 03-4228 issued for this emissions unit on August 23, 1989.
