

**Synthetic Minor Determination and/or**  **Netting Determination**

Permit To Install **14-05499**

**A. Source Description**

This facility manufactures electrical parts and supplies. Metal electrical boxes are fabricated and processed through a continuous conveyor electrodeposition paint line system (source K001). The electrodeposition tank is a dip tank that contains a mixture of coating materials (paste, resin, solvent, tints) and water. The coating materials and water are added to the dip tank as needed, depending on the production throughput (dragout).

**B. Facility Emissions and Attainment Status**

Square D Company is a major stationary source based on potential HAP and VOC emissions. The facility wishes to incorporate operating limitations in order to limit HAP and VOC emissions below major source thresholds. Actual facility-wide VOC emissions are 5.32 TPY and 3.36 TPY HAP (as glycol ethers). The facility is located in Butler County which is nonattainment for ozone.

**C. Source Emissions**

No control equipment exists on K001. The 18,700 gallon ED tank operates in an enclosure where evaporative emissions are exhausted through a process stack to atmosphere. Potential VOC emissions were calculated based on maximum capacity and 8760 hours/year of operation. The potential VOC emissions from K001, in the absence of limitations, are 213 TPY VOC. The potential HAP emissions, in the absence of limitations, are 45 TPY as glycol ethers. The emission limitation and operating restrictions outlined in this permit will limit VOC emissions to 30 TPY and HAP emissions to less than 9.9 TPY of any single HAP and less than 24.9 TPY for all HAPs combined. The facility will maintain coating material usage, VOC content, HAP content, and emission records as outlined in the permit to ensure compliance with the emission and usage limits.

**D. Conclusion**

The facility wants to increase their allowable coating material VOC content to 3.0 lbs VOC per gallon of coating materials, excluding water and exempt solvents pursuant to OAC rule 3745-21-09(U). Changes in production throughput (dragout) and operating conditions require more flexibility in the coating VOC content. In addition, the facility is decreasing its annual coating material usage to avoid Title V/major source thresholds due to increasing the VOC coating content. Actual facility coating material usage is 10,400 gallons per year; therefore a 12-month rolling coating usage limit of 20,000 gallons has been incorporated in this permit. The facility has accepted the terms and conditions of this permit which will limit the VOC and HAP emissions to avoid Title V, the Emissions Offset Policy and the case-by-case MACT requirements. The facility will maintain coating material usage, VOC content, HAP content, and emission records as outlined in the permit to ensure compliance with the emission and usage limits.

You are hereby notified that the Ohio Environmental Protection Agency has made a draft action recommending that the Director issue a Permit to Install for the air contaminant source(s) [emissions unit(s)] shown on the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the proposed installation. A public notice concerning the draft permit will appear in the Ohio EPA Weekly Review and the newspaper in the county where the facility will be located. Public comments will be accepted by the field office within 30 days of the date of publication in the newspaper. Any comments you have on the draft permit should be directed to the appropriate field office within the comment period. A copy of your comments should also be mailed to Robert Hodanbosi, Division of Air Pollution Control, Ohio EPA, P.O. Box 1049, Columbus, OH, 43266-0149.

A Permit to Install may be issued in proposed or final form based on the draft action, any written public comments received within 30 days of the public notice, or record of a public meeting if one is held. You will be notified in writing of a scheduled public meeting. Upon issuance of a final Permit to Install a fee of **\$200** will be due. Please do not submit any payment now.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469. If you have any questions about this draft permit, please contact the field office where you submitted your application, or Mike Ahern, Field Operations & Permit Section at (614) 644-3631.

Very truly yours,

Michael W. Ahern, Supervisor  
Field Operations and Permit Section  
Division of Air Pollution Control

**BUTLER COUNTY**

**PUBLIC NOTICE**

**ISSUANCE OF DRAFT PERMIT TO INSTALL 14-05499 FOR AN AIR CONTAMINANT SOURCE FOR SQUARE D COMPANY**

On 12/16/2003 the Director of the Ohio Environmental Protection Agency issued a draft action of a Permit To Install an air contaminant source for **Square D Company**, located at **5735 College Corner Road, Oxford, Ohio**.

Installation of the air contaminant source identified below may proceed upon final issuance of Permit To Install 14-05499:

**K001 - Electrodeposition Paint System on Misc. Metal Parts Coating Line. Modification of coating usage terms and conditions (supercedes PTI 14-2154, issued 12/5/1990).**

Comments concerning this draft action, or a request for a public meeting, must be sent in writing to the address identified below no later than thirty (30) days from the date this notice is published. All inquiries concerning this draft action may be directed to the contact identified below.

Brad Miller, Hamilton County Department of Environmental Services, 250 William Howart Taft Pkwy, Cincinnati, OH 45219-2660 [(513)946-7777]

**Permit To Install**

**Issue Date: To be entered upon final issuance**

**Terms and Conditions**

**Effective Date: To be entered upon final issuance**

**DRAFT PERMIT TO INSTALL 14-05499**

Application Number: 14-05499

APS Premise Number: 1409090278

Permit Fee: **To be entered upon final issuance**

Name of Facility: Square D Company

Person to Contact: Bruce Gray

Address: 5735 College Corner Road  
Oxford, OH 45056

Location of proposed air contaminant source(s) [emissions unit(s)]:

**5735 College Corner Road  
Oxford, Ohio**

Description of proposed emissions unit(s):

**K001 - Electrodeposition Paint System on Misc. Metal Parts Coating Line. Modification of coating usage terms and conditions (supercedes PTI 14-2154, issued 12/5/1990).**

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

\_\_\_\_\_  
Director

## Part I - GENERAL TERMS AND CONDITIONS

### A. Permit to Install General Terms and Conditions

#### 1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

#### 2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

#### 3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

#### 4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may

be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

**5. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

**6. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

**7. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

**8. Termination of Permit to Install**

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

**9. Construction of New Sources(s)**

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions

and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

**10. Public Disclosure**

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

**11. Applicability**

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

**12. Best Available Technology**

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

**13. Source Operation and Operating Permit Requirements After Completion of Construction**

- a. If the permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77, the permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or modified source(s) would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).

- b. If the permittee is required to apply for permit(s) pursuant to OAC Chapter 3745-35, the source(s) identified in this Permit To Install is (are) permitted to operate for a period of up to one year from the date the source(s) commenced operation. Permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the source(s) covered by this permit.

#### 14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

#### 15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

### B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)  
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
VOC	30
Individual HAP's	9.9
Combined HAP's	24.9

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
K001 - Electrodeposition Paint System - Misc. Metal Parts Coating Line - Modification	OAC rule 3745-31-05(A)(3)	49 lbs VOC/hr  The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(1)(i) and OAC rule 3745-31-05(C).
	OAC rule 3745-31-05(C)	30 TPY of VOC based upon a rolling, 12-month summation.  See terms A.2.b. and B.1.
	OAC rule 3745-21-09(U)(1)(i)	3.0 pounds of VOC per gallon of coating, excluding water and exempt solvents

**2. Additional Terms and Conditions**

- 2.a The hourly emission limitation outlined in term A.1. for VOC is based upon the emissions unit Potential to Emit (PTE). Therefore, no hourly records are required to demonstrate compliance with this limit.
- 2.b The total allowable usage of Hazardous Air Pollutants (HAPs), as identified in Section 112(b) of Title III of the Clean Air Act, from K001 (Electrodeposition paint system) and K002 (Off-line spray booth) shall not exceed 9.9\* TPY for any single HAP and 24.9\* TPY for any combination of HAPs. Compliance with the above limitations shall be based on a rolling, 12-month summation.

\* This assumes the HAP's emitted are the same as the amount of HAP's used, since all

HAP's used evaporate.

- 2.c** Compliance with OAC rule 3745-31-05(A)(3) shall be demonstrated by compliance with the coating material VOC content limitation, annual coating usage limitation, emission limitations, and air toxics policy.

**B. Operational Restrictions**

1. The maximum amount of all materials added to the electrodeposition tank, excluding water and exempt solvents, shall not exceed 20,000 gallons per year, based upon a rolling, 12-month summation. The company has existing records, therefore first year monthly material amounts are not necessary.

**C. Monitoring and/or Recordkeeping Requirements**

1. The permittee shall collect and record the following information each month for all materials employed in this emissions unit:
- a. The name and identification number of each material added to the electrodeposition tank.
  - b. The VOC content (excluding water and exempt solvents) in pounds per gallon for each material added to the electrodeposition tank.
  - c. The number of gallons (excluding water and exempt solvents) of each material added to the electrodeposition tank.
  - d. The rolling, 12-month summation of all materials added to the electrodeposition tank.
  - e. The VOC emissions, in pounds or tons (b x c).
  - f. The rolling, 12-month summation of the VOC emissions, in pounds or tons
2. The permittee shall collect and record the following information each month for K001 and K002 as follows:
- a. The name and identification number of each coating, employed.
  - b. The individual Hazardous Air Pollutant (HAP) content for each HAP of each coating in pounds of individual HAP per gallon of coating, as applied.
  - c. The total combined HAP content of each coating in pounds of combined HAPs per gallon of coating, as applied [sum all the individual HAP contents from (b)].

- d. The number of gallons of each coating employed.
- e. The name and identification of each cleanup material employed.
- f. The individual HAP content for each HAP of each cleanup material, in pounds of individual HAP per gallon of cleanup material, as applied.
- g. The total combined HAP content of each cleanup material, in pounds of combined HAPs per gallon of cleanup material, as applied [sum all the individual HAP contents from (f)].
- h. The number of gallons of each cleanup material employed.
- i. The total individual HAP usage for each HAP from all coatings and cleanup materials employed, in pounds or tons per month [for each HAP the sum of (b) times (d) for each coating plus the sum of (f) times (h) for each cleanup material].
- j. The total combined HAP usage from all coatings and cleanup materials employed, in pounds or tons per month [sum of (c) times (d) for each coating plus the sum of (g) times (h) for each cleanup material].
- k. The updated rolling, 12-month summation of usage for each individual HAP emissions\*\*, in pounds or tons. This shall include the information for the current month and the preceding eleven calendar months.
- l. The updated rolling, 12-month summation of usage for total combined HAP emissions\*\*, in pounds or tons. This shall include the information for the current month and the preceding eleven calendar months.

\* A listing of the HAPs can be found in Section 112(b) of the Clean Air Act or can be obtained by contacting your Hamilton County Department of Environmental Services contact. This information does not have to be kept on a individual emissions unit basis.

\*\* This assumes the HAP(s) emitted are the same as the amounts of HAP(s) used since all HAP(s) used evaporated.

- 3. The permit to install for this emissions unit K001 was evaluated based on the actual materials (typically coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Ground-Level Concentration (MAGLC).

The following summarizes the results of the modeling for the “worst case” pollutant(s):

Pollutant: Butoxy Ethanol (CAS 111-76-02)

TLV (ug/m3): 96,700

Maximum Hourly Emission Rate (lbs/hr): 10

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 443

MAGLC (ug/m3): 2302

Physical changes to or in the method of operation of the emissions unit after it’s installation or modification could affect the parameters used to determine whether or not the “Air Toxics Policy” is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the “Air Toxic Policy” will still be satisfied. If, upon evaluation, the permittee determines that the “Air Toxic Policy” will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in the “Air Toxic Policy” include the following:

- a. changes in the composition of the materials used (typically for coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
- b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
- c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the “Air Toxic Policy” will be satisfied with the above changes, the Ohio EPA will not consider the change(s) to be a “modification” under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is(are) defined as a modification under other provisions of the modification definition [other than (VV)(1)(a)(ii)], then the permittee shall obtain a final permit to install prior to the change.

The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will satisfy the Air Toxic Policy:”

- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
- b. documentation of it’s evaluation and determination that the changed emissions unit still satisfies the “Air Toxic Policy”; and

- c. when the computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the “Air Toxic Policy” for the change.

#### **D. Reporting Requirements**

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC contents). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
2. The permittee shall submit quarterly deviation reports which identify any exceedance of the material usage limitations set forth in term B.1.

The reports shall be submitted to the Director (the Hamilton County Department of Environmental Services) by February 15, May 15, August 15, and November 15 of each year and shall cover the previous three calendar months ( October through December, January through March, April through June and July through September, respectively) .

If no exceedances occurred, the permittee shall state so in the report.

3. The permittee shall submit quarterly deviation reports which identify any exceedance of the HAP emission limitations set forth in term A.2.b.

The reports shall be submitted to the Director (the Hamilton County Department of Environmental Services) by February 15, May 15, August 15, and November 15 of each year and shall cover the previous three calendar months ( October through December, January through March, April through June and July through September, respectively) .

If no exceedances occurred, the permittee shall state so in the report.

4. The permittee shall submit annual reports that specify the individual HAP emissions from the facility, the combined HAPs emissions from the facility, and the total VOC emissions from this emissions unit. The reports shall be submitted by April 15<sup>th</sup> of each year to the Hamilton County Department of Environmental Services. This reporting requirement may be satisfied by including and identifying the specific emission data for this emissions unit in the annual Fee Emission Report.

#### **E. Testing Requirements**

1. Compliance with the emission limitations in Section A.1 of these terms and conditions shall be determined in accordance with the following method:
  - a. Emission Limitation:  
49 lbs/hour VOC

**Square D Company**

**PTI Application: 14-05499**

**Issued: To be entered upon final issuance**

**Facility ID: 1409090278**

**Emissions Unit ID: K001**

Applicable Compliance Method:

The hourly limit is determined by multiplying the maximum coating usage rate in the electrodeposition tank of 16.2 gals/hr by the VOC content of the coating materials of 3.0 lbs VOC/gal.

- b. Emission Limitation:  
30 TPY VOC based upon a rolling, 12-month summation

Applicable Compliance Method:

Compliance shall be based upon the record keeping requirements as specified in Section C.1.

- c. Emission Limitation:  
3.0 pounds of VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:

Compliance shall be based upon the record keeping requirements specified in Section C.1.

USEPA methods 24 and 24A shall be used to determine the VOC content for coatings. If, pursuant to 40 CFR Part 60, Appendix A, a permittee determines that Method 24 or 24A cannot be used for a particular coating, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24 or 24A.

- d. Emission Limitation:  
Coating materials added to the electrodeposition tank, excluding water and exempt solvents, shall not exceed 20,000 gallons per year as a rolling, 12-month summation.

Applicable Compliance Method:

Compliance shall be based upon the record keeping requirements as specified in Section C.1.

2. Compliance with the HAP emission limits from K001 and K002 specified in term A.2.b shall be demonstrated by the recordkeeping in term C.2. Formulation data shall be used to determine the HAP contents of the coating and cleanup materials.

## **F. Miscellaneous Requirements**

1. The terms and conditions of this permit shall supercede permit to install (PTI)14-2154 as issued on December 5, 1990.
2. The following terms and conditions of this permit are federally enforceable: A, B, C.1, C.2, D and E.
