

Additional Information for Emissions Activity Category Form
Material Handling: Fugitive Dust Emissions
P006 - N Coke Handling
P025 - S Coke Dry/Hand

- For Number 4 (Conveyor Types), “Other” is a pivot bucket conveyor.
- For Number 5 (Transfer Points), Bucket Elevator Loading/Unloading consists of 1 wet metallurgical coke handling and 1 dry metallurgical coke handling. Also, Vibrating Conveyor Loading/Unloading consists of 1 wet metallurgical coke handling and 1 dry metallurgical coke handling.
- For Number 6 (Applicable Control Methods):
 1. For Basis for Efficiency Estimation, “Other” is the design efficiency.
 2. Every place a RACM efficiency of 70% appears, note that this conveying/transferring is that of wet coke (zero emissions).
 3. Every place the control equipment “C006&25SLY2” appears, the material handling operation vents to either C006&25SLY2 or the identical unit C006&25SLY1.
