PO Box 900 169 South Main Street
Orrville, OH 44667

Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, Ohio 43215

Sincerely,

Michael W. Ahern, Supervisor
Field Operations and Permit Section
Division of Air Pollution Control

**Permit To Install
Terms and Conditions**

**Issue Date: 5/18/2004
Effective Date: 5/18/2004**

FINAL PERMIT TO INSTALL 02-19132

Application Number: 02-19132
APS Premise Number: 0285010083
Permit Fee: **\$200**
Name of Facility: The Will-Burt Company, Plant 8
Person to Contact: Jeff Martin
Address: PO Box 900 169 South Main Street
Orrville, OH 44667

Location of proposed air contaminant source(s) [emissions unit(s)]:
**169 South Main Street
Orrville, Ohio**

Description of proposed emissions unit(s):
Glue Booth.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may

be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the emissions unit(s) covered by this permit.

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and

conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
VOC	10.0

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
R006 - One 11 ft x 11 ft x 10 ft coating booth for application of adhesive glue to miscellaneous metal parts and metal furniture by brush, equipped with exhaust filters.	OAC rule 3745-31-05(A)(3)	Less than 15 lbs VOC per day for coating metal furniture. See section A.2.a. Maximum usage of 10 gallons coating per day for coating metal furniture and miscellaneous metal parts. 54.1 lbs VOC per day and 9.9 tons VOC per year for coating metal furniture and miscellaneous metal parts. 18.9 lbs VOC per month when using cleanup material. 0.1 ton VOC per year when using cleanup material See section A.2.b.
	OAC rule 3745-21-09(I)(1)	Exempt. See section A.2.c.
	OAC rule 3745-21-09(U)(1)(d)	Exempt. See section A.2.d.
	40 CFR Part 60, Subpart EE	See section A.2.e.

2. Additional Terms and Conditions

- 2.a The 15 lbs of VOC per day limit when coating metal furniture is for all metal furniture coating lines, in combination, at the facility.

- 2.b The emissions from this emissions unit (R006) in combination with emissions unit R003 shall not exceed the following:
 - i. 9.9 tons per year of any individual hazardous air pollutant (HAP); and
 - ii. 24.5 tons per year of total aggregate HAPs.
- 2.c OAC rule 3745-21-09(I)(3)(a) states that the requirements of OAC rule 3745-21-09(I)(1) shall not apply if all prime coat, topcoat, or single coat coating lines for metal furniture, in combination, at the facility emit less than 15 lbs of VOC per day.
- 2.d OAC rule 3745-21-09(U)(2)(3)(iii) states that the requirement of OAC rule 3745-21-09(U)(1) shall not apply when coating miscellaneous metal parts when no more than ten gallons are used per day.
- 2.e If the permittee uses less than 3,842 liters (1,015 gallons) of metal furniture coatings (as applied) per calendar year and keeps purchase or inventory records or other data necessary to substantiate annual coating usage, the permittee shall be exempt from all other provisions of Subpart EE, 40 CFR 60.313.

If the permittee uses more than 3,842 liters (1,015 gallons) of metal furniture coatings (as applied) per calendar year and thereafter the permittee shall emit no more than 0.90 kilogram of VOC per liter of coating solids applied, based on a monthly volume-weighted average.

B. Operational Restrictions

None

C. Monitoring and/or Recordkeeping Requirements

- 1. The permittee shall collect and record the following information each day for this emissions unit, and all other metal furniture coating lines at the facility, when coating metal furniture:
 - a. the name and identification number of each coating, as applied,
 - b. the VOC content (excluding water and exempt solvents) and the number of gallons of each coating (excluding water and exempt solvents), as applied,
 - c. the VOC emissions, in pounds per day, from the coatings employed in this emissions unit only, as calculated by the following equation:

$T_{\text{furniture}}$ = the sum of the product of A times B for each coating applied,

$A_{\text{furniture}}$ = mass of VOC per volume of coating (excluding water and exempt solvents), as applied, in units of pounds VOC per gallon,

$B_{\text{furniture}}$ = volume of coating (excluding water and exempt solvents), as applied, in units of gallons per day.

d. the total VOC emissions, in pounds per day, from the coatings employed in this emissions unit in addition to the VOC emissions from other metal furniture coating operations at the facility. The other VOC emissions are also calculated using the equation above, in C.1.c.

2. The permittee shall collect and record the following information each day for this emissions unit, when coating miscellaneous metal parts:

a. the name and identification number of each coating, as applied,

b. the VOC content (excluding water and exempt solvents) and the number of gallons of each coating (excluding water and exempt solvents), as applied,

c. the total VOC emissions, in pounds per day, from the coatings employed as calculated by the following equation:

$T_{\text{misc metal}}$ = the sum of the product of A times B for each metal furniture coating applied,

$A_{\text{misc metal}}$ = mass of VOC per volume of coating (excluding water and exempt solvents), as applied, in units of pounds VOC per gallon,

$B_{\text{misc metal}}$ = volume of coating (excluding water and exempt solvents), as applied, in units of gallons per day.

3. The permittee shall collect and record the following information each day for this emissions unit, when coating both metal furniture and miscellaneous metal parts:

a. the total VOC emissions, in pounds per day, from the coating of both metal furniture and miscellaneous metal parts as calculated by the summation of the totals calculated in sections C.1.c and C.2.c above.

b. the total number of gallons used for coating both metal furniture and miscellaneous metal parts, as calculated by the summation of the recorded numbers in sections C.1.b and C.2.b.

4. The permittee shall collect and record the following information each month for this emissions unit:

a. the name and identification of each cleanup material employed,

b. the number of gallons of each cleanup material employed,

c. the VOC content of each cleanup material, in pounds per gallon,

d. the total VOC emissions from all cleanup materials employed, in pounds per month, calculated by the following equation:

T_c = the sum of the product of A times B for each cleanup material employed,

A_c = mass of VOC per volume of cleanup material employed,

B_c = volume of cleanup material employed, in units of gallons per day.

5. The permittee shall collect and record the following information each month for this emissions unit, in combination with R003:

a. the name and identification number of each coating, as applied,

b. the individual hazardous air pollutant (HAP) content for each HAP of each coating in pounds of individual HAP per gallon of coating, as applied,

c. the total combined HAP content for each HAP of each coating in pounds of combined HAPs per gallon of coating, as applied (sum all the individual HAP contents from (3.b) above),

d. the number of gallons of each coating employed,

e. the name and identification of each cleanup material employed,

f. the individual HAP content for each HAP of each cleanup material in pounds of individual HAP per gallon of cleanup material, as applied,

g. the total combined HAP content of each cleanup material in pounds of combined HAPs per gallon of cleanup material, as applied (sum all the individual HAP contents from (3.f) above),

h. the number of gallons of each cleanup material employed,

i. the total individual HAP emissions for each HAP from all coatings and cleanup materials employed, in pounds or tons per month and pounds or tons per rolling 12 month period (for each HAP the sum of (3.b) times (3.d) for each coating and the sum of (3.f) times (3.h) for each cleanup material),

j. the total combined HAP emissions from all coatings and cleanup materials employed, in pounds or tons per month and pounds or tons per rolling 12 month period (the sum of (3.c) times (3.d) for each coating plus the sum of (3.g) times (3.h) for each cleanup material),

A listing of the HAPs can be found in Section 112(b) of the Clean Air Act or can be obtained by contacting the Ohio EPA Northeast District Office. Material Safety Data Sheets typically include

a listing of the solvents contained in the coatings or cleanup materials. This information does not have to be kept on a line-by-line basis.

6. If the permittee uses more than 3,842 liters (1,015 gallons) of metal furniture coatings per year, during that year and thereafter if the permittee uses a non-complying coating during any month, the permittee shall maintain the following monthly records for all the metal furniture coatings:
 - a. the identification of each coating,
 - b. the volume of each coating consumed, as received (liters) [B],
 - c. the density of each coating, as received (kilograms per liter)[C],
 - d. the proportion of VOC in each coating, as received (fraction by weight) [D],
 - e. the volume of each VOC-solvent diluent added to each coating (liter) [E],
 - f. the density of each diluent VOC-solvent (kilograms per liter) [F],
 - g. the mass of VOC used during each month [G], i.e., $G = (B_i)(C_i)(D_i) + \dots + (B_n)(C_n)(D_n) + (E_i)(F_i) + \dots + (E_n)(F_n)$, where: n = the total number of surface coatings employed in the emissions unit during the month; and i = subscript denoting a specific coating employed,
 - h. the proportion of solids in each coating, as received (fraction by volume) [H],
 - i. the total volume of coating solids used in each calendar month [I]; i.e., $I = (B_i)(H_i) + \dots + (B_n)(H_n)$,
 - j. the transfer efficiency (fraction) [J] as specified in Table 1 of 40 CFR 60.313, Subpart EE, and
 - k. the average VOC emissions per unit volume of coating solids applied [K]; i.e., $K = G/(I)(J)$.

The permittee shall conduct an initial compliance test for any new metal furniture coatings brought into the facility and used to coat metal furniture. The initial compliance test shall be performed in accordance with the requirement in 40 CFR 60, Subpart EE.

7. The permit to install for this emissions unit was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model. The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following table summarizes the results of the modeling:

Compound	Toluene	Hexane
Max hourly rate (The reported, actual hours of operation per year of 2,080 hrs/yr is used instead of a potential of 8,760 hrs/yr because it gives a higher concentration)	Review of MSDS for Hybond 56 indicates toluene at 16.37 % by weight. 16.37% of 9.9 tons = 1.62 tons 1.62 tons/yr x yr/2080 hrs x 2000 lbs/ton = 1.56 lbs/hr	Review of MSDS for Hybond 56 indicates hexane at 21.97% by weight. 21.97% of 9.9 tons = 2.17 tons 2.17 tons/yr x yr/2080 hrs x 2000 lbs/ton = 2.09 lbs/hr
grams/sec	1.56 lbs/hr x hr/60 min x min/60 sec x 453.592 gr/lb = 0.197 g/s	2.09 lbs/hr x hr/60 min x min/60 sec x 453.592 gr/lb = 0.263 g/s
TLV (mg/m3)	(50 ppm)(92.13)/24.45 = 188.405 mg/m3	(500 ppm)(86.18)/24.45 = 1762.372 mg/m3
TLV (ug.m3)	188.405 mg/m3 x 1000 ug/mg = 188,405 ug/m3	1762.372 mg/m3 x 1000 ug/mg = 1,762,372 ug/m3
1-hr max ground level concentration	89.5 ug/m3	119.9 ug/m3
MAGLC = TLV/42	188,405/42 = 4,485.3 ug/m3	1,762,372/42 = 41,961.2 ug/m3
[1-hr max] < MAGLC ?	Yes, PASS	Yes, PASS

8. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- changes in the composition of the materials used or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH), " than the lowest TLV value previously modeled;
 - changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - physical changes to the emissions unit or its exhaust parameters (e.g., increased/decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition

(other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change(s).

9. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
 - a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfied the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

D. Reporting Requirements

1. The permittee shall submit a deviation (excursion) report for each calendar quarter which includes the following information for this emissions unit.
 - a. an identification of each day during which the VOC emissions from all metal furniture coating lines at the facility exceeded 15 pounds per day,
 - b. an identification of each day during which more than ten (10) gallons of coating was used for coating metal furniture and miscellaneous metal parts.
 - c. an identification of each day during which the calculated VOC emission when coating metal furniture and miscellaneous metal parts exceeded 54.1 pounds per day.
 - d. an identification of each month within the quarter during which the calculated VOC emission when using cleanup material exceeded 18.9 pounds per month.
2. The quarterly deviation reports shall be submitted in accordance with the reporting requirements of the General Terms and Conditions of this permit.
3. The permittee shall notify the Director of any monthly record showing any deviation from the following:
 - a. the total individual HAP emissions limitation for each HAP from all coatings and cleanup materials employed, in pounds or tons per month and pounds or tons per rolling 12 month period,
 - b. the total combined HAP emissions limitation from all coatings and cleanup materials employed, in pounds or tons per month and pounds or tons per rolling 12 month period.

4. The permittee shall submit annual reports of the amount of metal furniture coatings used during each calendar year, i.e., January 1 through December 31. The report may include purchase or inventory records or other data necessary to document the annual metal furniture coating usage. The annual report shall be submitted annually, i.e., by January 31 for the previous calendar year.
5. If the permittee uses more than 3,842 liters (1,015 gallons) of metal furniture coatings (as applied) per year, the permittee shall notify the Ohio EPA Northeast District Office in writing of this and shall document any exceedances of Subpart EE during that year and any subsequent months. The notification shall include a copy of such record and shall be sent to the Ohio EPA Northeast District Office within 45 calendar days after the exceedance occurs.
6. The permittee shall submit annual reports of the total VOC emissions from coating metal furniture and miscellaneous metal parts per calendar year. The total VOC emissions from use of cleanup material per calendar year shall also be reported. This report shall be submitted annually, i.e., by January 31 for the previous calendar year.

E. Testing Requirements

1. Emission Limitation:
Less than 15 lbs VOC per day when coating metal furniture

Applicable Compliance Method:

Compliance with the above limitation shall be determined based on the record keeping specified in section C.1.d.

2. Emission Limitation:
54.1 pounds VOC per day and 9.9 tons VOC per year when coating metal furniture and miscellaneous metal parts.

Applicable Compliance Method:

Compliance with the daily VOC limit shall be determined based on the record keeping specified in section C.3.a.

Compliance with the annual VOC limit when coating metal furniture and miscellaneous metal parts shall be determined by the summation of each daily VOC emission during a calendar year. This number is then multiplied by ton/2,000 pounds so that the annual emission may be reported in terms of tons per year.

3. Emission Limitation:
18.9 pounds VOC per month and 0.1 ton VOC per year when using cleanup material.

Applicable Compliance Method:

Compliance with the monthly VOC limit shall be determined based on the record keeping specified in section C.4.d.

Compliance with the annual VOC limit (when using cleanup material) shall be determined by the summation of each monthly VOC emission during a calendar year. This number is then multiplied by ton/2,000 pounds so that the annual emission may be reported in terms of tons per year.

4. Emission Limitation:
9.9 tons per year of any individual hazardous air pollutant (HAP); and 24.5 tons per year of total aggregate HAPs from this emissions units and R003 shall not be exceeded.

Applicable Compliance Method:

Compliance shall be determined based on the record keeping specified in section C.5.i and C.5.j.

F. Miscellaneous Requirements

None
