## **GENERAL PERMIT CONDITIONS**

### **TERMINATION OF PERMIT TO INSTALL**

Substantial construction for installation must take place within 18 months of the effective date of this permit. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

### **NOTICE OF INSPECTION**

The Director of the Ohio Environmental Protection Agency, or his authorized representatives, may enter upon the premises of the above-named applicant during construction and operation at any reasonable time for the purpose of making inspections, conducting tests, or to examine records or reports pertaining to the construction, modification or installation of the source(s) of environmental pollutants identified within this permit.

### **CONSTRUCTION OF NEW SOURCES**

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

The air contaminant source(s) identified in this permit may not cause a public nuisance in violation of OAC Rule 3745-15-07.

**ADDITIONAL SPECIAL TERMS AND CONDITIONS**

1. VOC emissions from the hexane extraction operation emanate from Ohio EPA Source No.'s P039, P040 and P046. It is impractical to attempt to determine emission rates on a source-by-source basis. The VOC emission rates of this permit represent the allowable emissions from all three sources.
2. Hexane consumption/emission rates from the hexane extraction operation shall be determined on a "mass balance" basis. Consumption/emission rates shall not exceed the following levels:
  - i. Hexane consumption in sources P039, P040 and P046 shall not exceed 140,000 gallons (392 tons) per rolling twelve month period;
  - ii. The emissions of hexane from sources P039, P040 and P046 shall not exceed 0.24 gallons per ton crushed soybeans (.000671 pounds of hexane per pound of crushed soybeans), based on a 365-day rolling weighted average; and
  - iii. The short-term loss of hexane from sources P039, P040 and P046 shall not exceed 65.32 tons in any rolling 30 day period.
3. The company shall maintain daily records which contain the following information for sources P039, P040 and P046:
  - i. The total quantity of soybeans weighted in the preparation process before the hexane extraction operation;
  - ii. The change in the amount of hexane inventory;
  - iii. The 365-day rolling weighted average hexane loss rate (gallons per ton of crushed soybeans, and pounds hexane per pound crushed soybeans);
  - iv. The amount of hexane lost in the previous 30-day period (tons per rolling 30-day period);
  - v. All incidences of startup or shutdown of these sources (this should include all amounts of hexane that are routinely added to the system or returned to the storage tank due to startup or shutdown. This amount of hexane is process hexane that is present in the system during shutdown and needs to be charged back into the system during startup. The amount of hexane used to "recharge" the system should not be interpreted as a "hexane loss" in calculating emission rates.);
  - vi. Dates of scheduled cleaning/maintenance; and
  - vii. Dates of any process upsets.

The company shall submit quarterly reports documenting all exceedances of the emission limitations/usage restrictions of this permit to the Ohio EPA Northwest District Office. For each exceedance, the company shall also provide the following additional information:
  - i. The cause of the excursion; and
  - ii. The action that has been taken and/or will be taken to correct the violation and prevent further occurrences.
  
5. All reports are to be submitted to Ohio EPA Northwest District Office, 347 N. Dunbridge Rd., Bowling Green, OH 43402.
