

**BUCKEYE TERMINALS, L.L.C - TOLEDO STATION  
SYNTHETIC MINOR DETERMINATION  
FACILITY ID 0448010984**

**A. Emissions Unit Description**

Buckeye Terminals, L.L.C. - Toledo Station is a pipeline breakout facility. This permit covers 10 petroleum product storage tanks. Petroleum products are received at the facility by pipeline and leave the facility by pipeline. The company has requested federally enforceable limitations restricting facility-wide emissions to 95 tons per year VOC, 9.9 tons per year of any individual HAP emissions, and 24.9 tons per year of any combination of HAP emissions.

**B. Facility Determination/Attainment Status**

This facility is currently a minor source of all pollutants and HAP. Lucas County is non-attainment for ozone. This permit provides for federally enforceable limitations on throughput and vapor pressure to maintain the facility's minor source status.

**C. Conclusion**

This permit restricts facility-wide VOC emissions to 95 tons per year, individual HAP emissions to 9.9 tons per year, and any combination of HAP emissions to 24.9 tons per year. This facility is not considered a major facility for Title V purposes or MACT.
