Date: **Draft PTI (Date will be entered upon final issuance)**

GENERAL PERMIT CONDITIONS

TERMINATION OF PERMIT TO INSTALL

Substantial construction for installation must take place within 18 months of the effective date of this permit. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

NOTICE OF INSPECTION

The Director of the Ohio Environmental Protection Agency, or his authorized representatives, may enter upon the premises of the above-named applicant during construction and operation at any reasonable time for the purpose of making inspections, conducting tests, or to examine records or reports pertaining to the construction, modification or installation of the source(s) of environmental pollutants identified within this permit.

CONSTRUCTION OF NEW SOURCES

The proposed source(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources are inadequate or cannot meet applicable standards.

If the construction of the proposed source(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of Ohio Administrative Code (OAC) Rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations.

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet applicable standards.

PERMIT TO INSTALL FEE

In accordance with Ohio Revised Code 3745.11, the specified Permit to Install fee must be remitted within 30 days of the effective date of this permit to install.

PUBLIC DISCLOSURE

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC Rule 3745-49-03.

APPLICABILITY

This Permit to Install is applicable only to the contaminant sources identified. Separate application must be made to the Director for the installation or modification of any other contaminant sources.

BEST AVAILABLE TECHNOLOGY

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

PERMIT TO OPERATE APPLICATION

A Permit to Operate application must be submitted to the appropriate field office for each air contaminant source in this Permit to Install. In accordance with OAC Rule 3745-35-02, the application shall be filed no later than thirty days after

commencement of operation.

SOURCE OPERATION AFTER COMPLETION OF CONSTRUCTION

This facility is permitted to operate each source described by this permit to install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws and regulations.

Facility Name: **Key Plastics, Inc., Montpelier**Application Number: **03-0757**Date: **Draft PTI (Date will be entered upon final issuance)**AIR EMISSION SUMMARY

The air contaminant emissions units listed below comprise the Permit to Install for **Key Plastics, Inc., Montpelier** located in **Williams** County. The emissions units listed below shall not exceed the emission limits/control requirements contained in the table. This condition in no way limits the applicability of any other state or federal regulations. Additionally, this condition does not limit the applicability of additional special terms and conditions of this permit.

Ohio EPA Source Number	Source Identification Description	BAT Determination	Applicable Federal & OAC Rules	Permit Allowable Mass Emissions and/or Control/Usage Requirements
R028 (Mod)	Plastic Parts Spray Booth, Paint Booth A-1; Modification to allow for increased paint usage and use of photo- chemically reactive materials (coatings)	Use of filter exhaust system for control of PE emissions ,use of nonphotochemically reactive cleanup materials, compliance with the limitations and conditions of this permit and compliance with the "air toxics" policy	3745-31-05	10.36 lbs OC/hr, 45.4 OC TPY, and 231 tons VOC/yr (Combined limit see Additional Special Terms and Condition's) 101.8 lbs OC/month, 0.61 OC TPY from cleanup operations (See Additional Special Terms and Condition's) 1.56 lbs particulate emissions (PE)/hr & 6.83 tons PE/yr Opacity Restrictions (See Additional Special Terms and Condition's)
			3745-21-07 (G)(2)	8 lbs OC/hr and 40 lbs OC/day when employing

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

WASTE DISPOSAL

The owner/operator shall comply with any applicable state and federal requirements governing the storage, treatment, transport and disposal of any waste material generated by the operation of the sources.

MAINTENANCE OF EQUIPMENT

This source and its associated air pollution control system(s) shall be maintained regularly in accordance with good engineering practices and the recommendations of the respective manufacturers in order to minimize air contaminant emissions.

MALFUNCTION/ABATEMENT

In accordance with OAC RULE 3745-15-06, any malfunction of the source(s) or associated air pollution control system(s) shall be reported immediately to the **Ohio EPA Northwest District Office, 347 North Dunbridge Road, Bowling Green, Ohio 43402.**

Except as provided by OAC Rule 3745-15-06(A)(3), scheduled maintenance of air pollution control equipment that requires the shutdown or bypassing of air pollution control system(s) must be accompanied by the shutdown of the associated air pollution sources.

AIR POLLUTION NUISANCES PROHIBITED

The air contaminant source(s) identified in this permit may not cause a public nuisance in violation of OAC Rule 3745-15-07.

BAT FOR COLD CLEANERS

In accordance with OAC Rule 3745-21-09(0)(2), each owner or operator of a cold cleaner shall:

- a. equip the cold cleaner with either:

29 of 81 Pages

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

1. a cover - if the solvent has a vapor pressure greater than 0.3 pound per square inch absolute measured at 100°F or the solvent is heated or agitated, the cover shall be signed and constructed so that it can be easily operated with one hand; or
 2. a remote solvent reservoir from which solvent is pumped through a nozzle suspended over a sink-like work area which drains back to the reservoir, provided a sink-like work area has an open drain area of less than 16 square inches and provided the solvent is neither heated above 120°F nor has a vapor pressure greater than 0.6 pound per square inch absolute, measured at 100°F;
- b. equip the cold cleaner with a device for draining the cleaned parts - if the solvent has a vapor pressure greater than 0.6 pound per square inch absolute measured at 100°F, the drainage facility shall be constructed internally so that parts are enclosed under the cover during draining, unless an internal type drainage device cannot fit into the cleaning system;
- c. install one of the following devices if the solvent vapor pressure is greater than 0.6 pound per square inch absolute measured at 100°F, or if the solvent is heated above 120°F;
1. freeboard that gives a freeboard ratio greater than or equal to 0.7;
 2. water cover (solvent must be insoluble in and heavier than water); or
 3. other systems of equivalent control, such as refrigerated chiller or carbon adsorption, approved by the Director; and
- d. operate and maintain the cold cleaner in a manner which is consistent with good engineering practice and which minimizes solvent evaporation from the unit.

30 of 81 Pages

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

ADDITIONAL SPECIAL TERMS AND CONDITIONS

Introduction:

The permittee has submitted a Permit to Install for the modification of all existing volatile organic compound (VOC)/organic compound (OC) emitting emissions units at the facility and for the installation of one new VOC/OC emitting emissions unit. The purpose of this PTI is two-fold; to correct emissions violations by establishing new limits and to establish the facilities potential to emit (PTE) at less than "major" status for PSD. Although the emissions units at the facility have existing PTI limits totaling 222.93 tons VOC/year, these PTI limits are not federally enforceable and the facility's current potential-to-emit is >250 tons VOC/year.

A. Applicable Emission Limitations and/or Control Requirements:

1. Coating material usage shall not result in an exceedance of the following emission limitations and/or control requirements:
 - a. the permittee shall not employ more than 231 tons of VOC per rolling 365 day period based upon the daily VOC input rates to emissions unit R009, R011 through R014, R028 through R032, R034 through R044 and K001 combined.

*Daily VOC input rate = (C x D) where C = the number of gallons of each coating employed per day and D = the VOC content of each coating employed in pounds of VOC per gallon of coating materials being emitted. Daily VOC input rates are equivalent to daily VOC emission rates and are based upon 100% of the solvent in the coating materials being emitted.

To ensure federal enforceability during the first 12 calendar months of operation following the issuance of this permit, the permittee shall not exceed the input rates specified in the following table:

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

Month	Maximum Allowable Cumulative Input Rates of VOC's (tons)
1	19.58
1-2	39.16
1-3	58.74
1-4	78.32
1-5	97.90
1-6	117.48
1-7	137.06
1-8	156.64
1-9	176.22
1-10	195.80
1-11	215.38
1-12	231.0

After the first 12 calendar months of operation following the issuance of this permit, compliance with the annual input rate of 231.0 tons VOC per year shall be based upon a rolling, 365-day summation of the daily input rates.

2. Cleanup material usage shall not result in an exceedance of the following emission limitations and/or control requirements:
 - a. The combined OC emissions from cleanup material usage in emissions units R009, R011 through R014, R028 through R032, R034 through R044 and K001 shall not exceed 3000 lbs/month & 18 tons/yr.

Facility Name: **Key Plastics, Inc., Montpelier**Application Number: **03-0757**Date: **Draft PTI (Date will be entered upon final issuance)****B. Operational Restrictions**

1. This permit allows for the use of coatings and cleanup materials specified by the permittee in Permit to Install (PTI) application number 03-10757. In conjunction with best available technology (BAT) requirements of OAC 3745-31-05, the emission limits for these units were established in accordance with Ohio EPA's "Air Toxics Policy" and are based on both the coating and cleanup material formulation data and the design parameters of the emissions unit's exhaust system, as specified in the application. Compliance with the Ohio EPA's "Air Toxics Policy" was demonstrated for each pollutant based on the Screen 3 Model & ISCST3 Model and a comparison of the predicted 1 hour maximum ground level concentration to the MAGLC. The following summarizes the results of the modeling for each pollutant:

Pollutant	TLV (ug/m ³)	Maximum Hourly Emission Rate (lbs/hr)	Predicted 1 hour Maximum Ground- Level Concentration at Fenceline (ug/m ³)	Maximum Acceptable Ground Level Concentration (MAGLC) (ug/m ³)
Ethanol	1,880	0.65	6.82	44,762
iso- Propanol (iso- Propyl Alcohol Anhydrous)	400	5.7	46.56	9,524
Acetone	1,780	23.43	303.08	42,381
iso-Butyl Alcohol	152	11.33	106.65	3,619

Date: **Draft PTI (Date will be entered upon final issuance)**

notification to and approval from the appropriate Ohio EPA district office or local air agency are required, including the possible issuance of modifications to PTI number 03-10757:

- a. any change in the composition of the coatings or cleanup materials or use of new coatings or cleanup materials that would result in the emissions of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value specified in the above table;
 - b. any change to an emissions unit or its exhaust parameters (e.g., increased emission rate, reduction of exhaust gas flow rate, and decreased stack height) that would result in an exceedance of the Maximum Acceptable Ground-Level Concentration (MAGLC) specified in the above table;
 - c. any change to the emissions unit or its method of operation that would either require an increase in the emission limitation(s) established by this permit or would otherwise be considered a "modification" as defined in OAC rule 3745-31-01; and,
 - d. any change in the composition of the coatings, or use of new coatings, that would result in the emission of any of the exempted organic compounds included in the definition of "VOC", as defined in OAC rule 3745-21-01, in emissions units R009, R011 through R014, R028 through R032, R034 through R044.
2. The permittee shall not employ cleanup materials that are either a "photochemically reactive material" or a "volatile organic compound", as defined in OAC 3745-21-01, in Ohio EPA emissions units R009, R011 through R014, R028 through R032, R034 through R044, and K001.
 3. The permittee shall not place any part coated in Ohio EPA emissions units R009, R011 through R014, R028 through

R032, R034 through R044 in an oven in which the coating, or solvent vapor from the coating, comes into contact with flame or is baked, heat-cured, or heat-polymerized, in the presence of oxygen. The determination of whether or not the coating is baked, heat-cured, or heat-polymerized is based on whether the coating will redissolve in the original solvent mixture.

4. The permittee shall not place any miscellaneous metal part coated in emission unit K001 in an oven that exceeds 200 degrees Fahrenheit.
5. Each coating employed in emissions unit K001 shall comply with the VOC emissions limitation of 3.5 lbs per gallon, minus water and exempt solvents.

C. Monitoring and/or Record Keeping Requirements

The permittee shall maintain the following monitoring and/or record keeping requirements for coating material usage in emissions units R009, R011 through R014, R028 through R032, R034 through R044 on a daily basis for each emissions unit:

1. On each day when all, or a portion of, the coatings employed in the emissions unit are PRMs, the permittee shall collect and record the following information:
 - a. the company identification for each coating employed;
 - b. documentation on whether or not each coating is a photochemically reactive material;
 - c. the number of gallons of each coating employed;.
 - d. the organic compound content in pounds per gallon and the volatile organic compound content in pounds per gallon for each coating;
 - e. the organic compound emission rate for each coating in pounds per day;
 - f. the volatile organic compound emission rate for each coating in pounds per day;

- g. the total organic compound emission rate for all coatings in pounds per day [Summation of (e)];
 - h. the total volatile organic compound emission rate for all coatings in pounds per day [Summation of (f)];
 - i. the total number of hours the emissions unit was in operation; and,
 - j. the average hourly organic compound emission rate for all coatings, i.e., (g)/(i), in pounds per hour (average).
- 2. On each day when all the coatings employed in the emissions unit are not PRMs, the permittee shall collect and record the following information:
 - a. the company identification for each coating employed;
 - b. documentation on whether or not each coating is a photochemically reactive material;
 - c. the number of gallons of each coating employed;
 - d. the organic compound content in pounds per gallon and the volatile organic compound content in pounds per gallon for each coating;

Date: **Draft PTI (Date will be entered upon final issuance)**

The permittee shall maintain the following monitoring and/or record keeping requirements for coating material usage in emissions unit K001 on a daily basis:

3. When coating miscellaneous metal parts in emissions unit K001, the permittee shall collect and record the following information:
 - a. the name and identification number of each coating, as applied;
 - b. the VOC content of each coating, excluding water and exempt solvents, on an as applied basis;
 - c. the number of gallons, excluding water and exempt solvents, of each coating employed;
 - d. the total VOC emissions from all coatings employed, in pounds per day; and,
 - e. the number of hours miscellaneous metal parts were coated.

4. On each day in which the permittee coats non-miscellaneous metal parts and all or a portion of, the coatings employed in the emissions unit are PRMs, the permittee shall collect and record the following information:
 - a. the company identification for each coating employed;
 - b. documentation on whether or not each coating is a photochemically reactive material;
 - c. the number of gallons of each coating employed;
 - d. the organic compound content and volatile organic compound content of each coating in pounds per gallon;
 - e. the organic compound emission rate for each coating in pounds per day;

- f. the volatile organic compound emission rate for each coating in pounds per day;
 - g. the total organic compound emission rate for all coatings in pounds per day [sum of(e)];
 - h. the total volatile organic compound emission rate for all coatings in pounds per day [sum of(f)];
 - i. the number of hours the emissions unit was in operation, excluding periods when miscellaneous metal parts were being coated;
 - j. the average hourly organic compound emission rate for all coatings, i.e., (g)/(i), in pounds per hour (average); and,
 - k. the annual, year to date volatile organic compound emissions from all coatings employed [sum of (f) for each day to date].
5. On each day in which the permittee coats non-miscellaneous metal parts and all of the coatings employed in the emissions unit are not PRMs, the permittee shall collect and record the following information:
- a. the company identification for each coating employed;
 - b. documentation on whether or not each coating is a photochemically reactive material;
 - c. the number of gallons of each coating employed;
 - d. the organic compound content and volatile organic compound content of each coating in pounds per gallon;
 - e. the organic compound emission rate for each coating in pounds per day;
 - f. the volatile organic compound emission rate for each coating in pounds per day;

39 of 81 Pages

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

- g. the total organic compound emission rate for all coatings in pounds per day [sum of (e)];
 - h. the total volatile organic compound emission rate for all coatings in pounds per day [sum of(f)]; and,
 - i. the number of hours non-miscellaneous metal parts were coated.
6. The permittee shall collect and record the following information each month for cleanup material usage in emission units L001 and L002:
- a. the types of solvents employed in the cold cleaner;
 - b. the vapor pressure of each solvent, in pound per square inch absolute, measured at 100 degrees Fahrenheit;
 - c. the organic compound emission rate for each solvent in pounds/month;
 - d. the volatile organic compound emission rate for each solvent in pounds/month;
 - e. the annual, year to date OC emissions from all cleanup material usage [sum of (c) for each emissions unit for each calendar month to date from January to December];
 - f. the annual, year to date VOC emissions from all cleanup material usage [sum of (d) for each emissions unit for each calendar month to date from January to December].

The following monitoring and/or record keeping requirements for cleanup material usage in emissions units R009, R011 through R014, R028 through R032, and R034 through R044 shall be maintained on a combined emissions unit basis.

40 of 81 Pages

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

7. The permittee shall collect and record the following information each month for combined cleanup material usage in emissions units R009, R011 through R014, R028 through R032, R034 through R044, and K001:
 - a. the name and identification of each cleanup material employed;
 - b. documentation that each cleanup material is not a photochemically reactive material or a volatile organic compound;
 - c. the number of gallons of each cleanup material employed;
 - d. the OC content of each cleanup material, in pounds per gallon;
 - e. the total combined OC emission rate from all cleanup materials employed, in pounds per month [summation of (cxd)]; and,
 - f. the total combined OC emission rate from all cleanup materials employed for the calendar year to date, in tons per year [summation of (e) for the calendar year to date].

Note: The permittee may also calculate the combined monthly OC emissions rate in accordance with the following formula if waste cleanup materials are sent off-site for reclamation/disposal:

Combined monthly OC emissions from cleanup operations = (total gallons of cleanup material used X solvent density) - (total gallons cleanup material sent off-site for disposal or reclamation [minus solids content of said material]) X solvent density.

The permittee shall collect and record the following information each day for determining the combined VOC usage (input) rate from emissions units R009, R011 through R014, R028 through R032, R034 through R044, and K001:

41 of 81 Pages

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

8. The permittee shall maintain daily records of the following information:
 - a. the total VOC usage (input) rate for all coatings, in pounds per day;
 - b. for the first 12 months of operation following the issuance of this permit, the cumulative monthly usage (input) rate of VOC, in tons per month;
 - c. after the first 12 months of operation following the issuance of this permit, the annual usage (input) rate of VOC based upon a rolling 365 day summation of the daily usage (input) rates.
9. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings, if a strip recorder is employed, for continuous monitoring instrumentation, and copies of all reports required by the permit. Such records may be maintained in computerized form.

D. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports which include the following information for emissions units R009, R011 through R014, R028 through R032, R034 through R044 and K001 (when coating non-miscellaneous metal parts) on days in which any portion of the coatings used are photochemically reactive materials.
 - a. an identification of each day during which the average hourly controlled OC emissions from the coatings exceeded 8 pounds per hour, and the actual average hourly controlled OC emissions for each such day.

42 of 81 Pages

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

- b. An identification of each day during which the controlled OC emissions from the coatings exceeded 40 pounds per day, and the actual controlled OC emissions for each such day.

If no exceedances have occurred, a letter stating that fact shall still be submitted. These reports shall be submitted by January 30, April 30, July 30, and October 30 of each year.

2. The permittee shall notify the Director (Ohio EPA Northwest District Office) in writing of any monthly record showing the use of noncomplying coatings in emissions unit K001 during periods in which the permittee coats miscellaneous metal parts and coatings are subject to a 3.5 pounds VOC minus water and exempt solvents emissions limitation. The notification shall include a copy of such record and shall be sent to the Director (Ohio EPA Northwest District Office) within 30 days following the end of the calendar month.
3. The actual annual VOC emissions data for emissions units R009, R011 through R014, R028 through R032, R034 through R044 and K001 shall be reported pursuant to the fee emissions report required by OAC 3745-78-02 (A).
4. The permittee shall submit quarterly written reports for emissions units R009, R011 through R014, R028 through R032, R034 through R044, K001 and L001 through L002 of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures taken, shall be promptly made to Ohio EPA Northwest District Office. If no deviations occurred

43 of 81 Pages

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

E. Testing Requirements

Compliance with the emissions limitations in this permit to install shall be determined in accordance with the following methods:

1. R028 - Paint Booth A-1

- a. Emission Limitation: 10.36 lbs OC/hr & 45.4 OC Tons per year

Applicable Compliance Method: The hourly and annual OC emission limitations are based on the emission units potential to emit. Therefore, no hourly or annual recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with these limitations.

- b. Emission Limitation: 8 lbs OC/hr & 40 lbs OC/day

Applicable Compliance Methods: Compliance shall be determined based upon the recordkeeping requirements specified in section C.1.

- c. Emission Limitation: 101.8 lbs OC/month & 0.61 OC TPY

Applicable Compliance Method: The monthly and annual OC emission limitations are based on the emission units potential to emit. Therefore, no monthly or annual recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with these limitations.

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

- d. Emissions Limitation: 3000 lbs OC/month & 18.0 tons OC/yr from emission units R009, R011 through R014, R028 through R032, R034 through R044, and K001 cleanup operations

Applicable Compliance Method: Compliance shall be determined based upon the recordkeeping requirements specified in section C.7.

- e. Emission Limitation: 1.56 lbs PE/hr & 6.83 TPY**

Applicable Compliance Method: Compliance shall be determined using test procedures specified in 40 CFR Pat 60, Appendix A.

$E = (\text{maximum coating solids usage rate in pounds per hour}) * (1-TE) * (1-CE)$

E = Particulate emissions rate (lbs/hr)

TE = Transfer efficiency, which is the ratio of the amount of coating solids deposited on the coated part to the amount of coating solids used

CE = Control efficiency of the control equipment

** tons PE/yr should be determined using the above calculated PE emissions (lbs/hr) and the actual operating hours for the emissions unit.

- f. Emission Limitation: 0% opacity limitation

Applicable Compliance Method: Compliance with the visible emissions limitations shall be determined in accordance with the test method 40 CFR 60, Appendix A-Method 9.

- g. Emission Limitation: 231 tons VOC/rolling 365 days

Applicable Compliance Method: Compliance shall be determined based upon recordkeeping requirements specified in section C.8.

Date: **Draft PTI (Date will be entered upon final issuance)**

2. R029 - Paint Booth A-2

- a. Emission Limitation: 4.65 lbs OC/hr & 20.4 OC TPY

Applicable Compliance Method: The hourly and annual OC emission limitations are based on the emission units potential to emit. Therefore, no

hourly or annual recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with these limitations.

- b. Emission Limitation: 8 lbs OC/hr & 40 lbs OC/day

Applicable Compliance Methods: Compliance shall be determined based upon the recordkeeping requirements specified in section C.1.

- c. Emission Limitation: 101.8 lbs OC/month & 0.61 OC TPY

Applicable Compliance Method: The monthly and annual OC emission limitations are based on the emission units potential to emit. Therefore, no monthly or annual recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with these limitations.

- d. Emissions Limitation: 3000 lbs OC/month & 18.0 tons OC/yr from emission units R009, R011 through R014, R028 through R032, R034 through R044, and K001 cleanup operations

Applicable Compliance Method: Compliance shall be determined based upon the recordkeeping requirements specified in section C.7.

- e. Emission Limitation: 0.70 lb PE/hr & 3.07 PE TPY**

46 of 81 Pages

Facility Name: **Key Plastics, Inc., Montpelier**

Application Number: **03-0757**

Date: **Draft PTI (Date will be entered upon final issuance)**

Applicable Compliance Method: Compliance shall be determined using test procedures specified in 40 CFR Pat 60, Appendix A.

$E = (\text{maximum coating solids usage rate in pounds per hour}) * (1-TE) * (1-CE)$

E = Particulate emissions rate (lbs/hr)

TE = Transfer efficiency, which is the ratio of the amount of coating solids deposited on the coated part to the amount of coating solids used

CE = Control efficiency of the control equipment

**tons PE/yr should be determined using the above calculated PE emissions (lbs/hr) and the actual operating hours for the emissions unit.

- f. Emission Limitation: 0% opacity limitation

Applicable Compliance Method: Compliance with the visible emissions limitations shall be determined in accordance with the test method 40 CFR 60, Appendix A-Method 9.

- g. Emission Limitation: 231 tons VOC/rolling 365 days

Applicable Compliance Method: Compliance shall be determined based upon recordkeeping requirements specified in section C.8.

3. R030 - Paint Booth A-3

- a. Emission Limitation: 4.65 lbs OC/hr & 20.4 OC TPY

Applicable Compliance Method: The hourly and annual OC emission limitations are based on the emission units potential to emit. Therefore, no hourly or annual recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with these limitations.

$E = (\text{maximum coating solids usage rate in pounds per hour}) * (1-TE) * (1-CE)$

E = Particulate emissions rate (lbs/hr)

TE = Transfer efficiency, which is the ratio of the amount of coating solids deposited on the coated part to the amount of coating solids used

CE = Control efficiency of the control equipment

** tons PE/yr should be determined using the above calculated PE emissions (lbs/hr) and the actual operating hours for the emissions unit.

- f. Emission Limitation: 0% opacity limitation

Applicable Compliance Method: Compliance with the visible emissions limitations shall be determined in accordance with the test method 40 CFR 60, Appendix A-Method 9.

g. Emission Limitation: 231 tons VOC/rolling 365 days

Applicable Compliance Method: Compliance shall be determined based upon recordkeeping requirements specified in section C.8.

15. R013 - Paint Booth C-7

a. Emission Limitation: 2.50 lbs OC/hr & 10.95 OC TPY

Applicable Compliance Method: The hourly and annual OC emission limitations are based on the emission units potential to emit. Therefore, no hourly or annual recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with these limitations.

b. Emission Limitation: 8 lbs OC/hr & 40 lbs OC/day

Applicable Compliance Methods: Compliance shall be determined based upon the recordkeeping requirements specified in section C.1.

c. Emission Limitation: 101.8 lbs OC/month & 0.61 OC TPY

Applicable Compliance Method: The monthly and annual OC emission limitations are based on the emission units potential to emit. Therefore, no monthly or annual recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with these limitations.

d. Emissions Limitation: 3000 lbs OC/month & 18.0 tons OC/yr from emission units R009, R011 through R014, R028 through R032, R034 through R044, and K001 cleanup operations

Applicable Compliance Method: Compliance shall be determined based upon the recordkeeping requirements specified in section C.7.

- e. Emission Limitation: 0.10 lb PE/hr & 0.44 PE TPY**

Applicable Compliance Method: Compliance shall be determined using test procedures specified in 40 CFR Part 60, Appendix A.

$E = (\text{maximum coating solids usage rate in pounds per hour}) * (1-TE) * (1-CE)$
