RE: Air Permit to Operate application
Submitted 09/18/96
For Emissions Unit F001

Logan Clay Products Company
David Chapman
201 S. Walnut St.
PO Box 698
Logan, OH 43138

Dear David Chapman:

This letter is in response to your 09/18/96 submittal of an Air Permit to Operate application for the above referenced air pollution source(s). The Southeast District Office has completed a preliminary review of your application and has determined that the application is complete. This completeness review does not imply that the application is approvable, only that the Ohio EPA has enough information to continue the review.

The next step for your application is for us to do a technical review. The technical reviews are done generally on a first come, first serve basis. As soon as the complete permit applications received before yours are reviewed, your application will be reviewed. At that time, a permit reviewer may contact you for additional information or for clarification. Once the technical review is complete, a recommendation will be forwarded to the Ohio EPA, Division of Air Pollution Control (DAPC). If their review determines the recommendation is appropriate, then an Air Permit to Operate an Emission Unit will either be issued or the application will be denied.

Please be assured that we will do everything possible to process your application in an expeditious fashion. If you have any questions on your permit application, please contact me at (614) 385-8501.

Sincerely,

Rex S. Haggy
Environmental Specialist II
Div. of Air Pollution Control
Southeast District Office
