An electronic version of the template is located at <http://www.epa.state.oh.us/ddagw/Documents/new-ddbp-smp3.PDF>. A copy of this document is also available from your local Ohio EPA District Office. Any questions concerning this schedule or the Disinfectants and Disinfection Byproducts Rule can be directed to Richard Ciotola of the Ohio EPA DDAGW Central Office at (614) 644-3387 or richard.ciotola@epa.state.oh.us. Your district office representative is also available to provide assistance.

Multiple wells drawing water from a single aquifer may be considered one treatment plant for determining the number of TTHM and HAA5 samples required, with approval from Ohio EPA.

* Total chlorine samples are collected in the distribution system at the same time and place as total coliforms are sampled.

** One sample for Chlorite at each of the following locations: near the first customer, at a location representative of the average residence time, and at a location reflecting maximum residence time of the water in the distribution system.

Asbestos Sampling Information

Collect one sample at a tap served by asbestos-cement pipe. The sample monitoring point (smp) code is DS000. Due to limited Laboratory capacity and a 48 hour filtering requirement, contact your lab early in the monitoring period to schedule a sampling date.
