Todd Crandall
Davey Resource Group
3728 Fishcreek Rd.
Stow, OH 44224

Dear Mr. Crandall:

After reviewing the Biodiversity Database, I find the Division of Wildlife has no records of rare or endangered species in the Union Square Development project area, including a one mile radius, in sections 22 and 23 of Green Township, Summit County, and on the North Canton Quad. We are unaware of any unique ecological sites, geologic features, animal assemblages, scenic rivers, state wildlife areas, nature preserves, parks or forests, national wildlife refuges, parks or forests or other protected natural areas within a one mile radius of the project area.

Our inventory program has not completely surveyed Ohio and relies on information supplied by many individuals and organizations. Therefore, a lack of records for any particular area is not a statement that rare species or unique features are absent from that area. Although we inventory all types of plant communities, we only maintain records on the highest quality areas.

Please contact me at 614-265-6818 if I can be of further assistance.

Sincerely,

Debbie Woischke, Ecological Analyst
Ohio Biodiversity Database Program

Subject RE: Bat Mist-Net Study Summit County, Ohio 

Dear Ms. Hickey,

This is in response to your July 28, 2011 request for an amendment to your Federal Fish and Wildlife Permit No. TE235639-0 to conduct a 2011 mist net survey for the Indiana bat (*Myotis sodalis*) at the proposed 150-acre development site located along Massillon and Wise Roads in the City of Green, Summit County, Ohio.

This notification serves as written concurrence that Davey Resource Group is authorized to proceed with the Indiana bat survey as described in the request. Upon completion of the survey, we request that you submit an electronic copy of the survey results to this office for review. Please include the latitude and longitude coordinates for each survey site in the report. If any Indiana bats are found during the survey, please notify this office within 48 hours.

Due to concerns over White-nose Syndrome, **we are requiring that the White-nose Syndrome Decontamination Protocol be followed for all bat survey work conducted in Ohio.** Please be advised that the current protocol (attached) is subject to revision. Please visit the following link prior to conducting the survey to ensure the most current protocol is being followed.

<http://www.fws.gov/midwest/endangered/mammals/BatDisinfectionProtocol.html>

(See attached file: WNSDecontaminationProtocol_January 25 2011.pdf)

We request that all Indiana bats be banded utilizing the Ohio Department of Natural Resources, Division of Wildlife (DOW) bands. Please contact Jennifer Norris (DOW) to request bands @ (740) 747-2525, ext. 26.

Please carry a copy of this site specific authorization and your Federal permit while conducting the survey. Please contact me if you have questions, or we may be of further assistance in this matter.

Sincerely,
Angela Boyer

Subject: RE: Bat Report

Sorry, our phone lines have all been in use. I am hoping to get a line at 3 for a webinar myself! The applicant really shouldn't clear ANY areas on the site without getting the proper permits in place. Clearing areas in advance of receiving permits can preclude avoidance and minimization options during the permitting and section 7 processes, which is strongly discouraged. Once the permits are in place, summer clearing is an option due to the negative survey results for the Indiana bat.

Rosty –

Here are the verified wetland categories for the DeHoff Property:

Wetland	Category
A&B together	2
C	2
D	2
E	2
F	1
G	2
H	2
I	2
J	1
K	1
L	1
M	2
N	2
O	2
P	2
Q	2
R	2
S	1
T	2

I have not heard from Greg Orr if has received and verified the HHEI/QHEI score sheets yet.

Nor do I know if any new wetland areas have been added that are not yet scored.

Let me know if you have any questions.

thanks,

Joe Loucek
