Thank you Lexi for the update. The company(Fairmount Santrol)that you are representing and file/permit number are now documented in our computer files for future references. I wish you the best throughout this permit application process.

Again if you need any further assistance throughout the process please do not hesitate to call or email, my hours are 0600 to 1430.

Regards,

George Brkovich

George,

You are correct about the location of the proposed barge dock. I asked my supervisor, and she informed me that Fairmount Santrol has been paying Walden Industries for use of the existing dock (hence my confusion over the name on the permits); the proposed barge dock will be owned and operated by Fairmount Santrol.

There are no wetlands or streams on site to be impacted.

Thank you again for your help!
Lexi Feutz

Alexandra,

Please open the 2 attachments of a Google earth snap shot of the area in question. First I believe this is the location of the propose barge docking area? As you can see there is no structure within this area. So as far as this office is concerned the company that you are representing has no established waterfront.

You are correct **the Ohio River is a Section 10 waterway, a jurisdictional determination would not be needed for the river,** however, at the ordinary high water(OHW) and above where disturbance is taking place, will any streams and/or wetlands be impacted?
