

Server Based
Automated
Document Rendering Solutions

- **10 years of helping industry-leading companies to:**
 - Reduce Costs
 - Improve Compliance & Risk Management
 - Increase Customer Service

- **Provider of enterprise-wide document transformation solutions.**

- **Over 5,000 customers and 100,000 end-users in 40 countries.**

Proven Solutions

Document Transformation Technology

- **Reduce Costs**
 - Automation of inefficient manual processes.
 - no end-user software installation or workstation maintenance reducing cost of ownership and IT services expenses.
- **Risk Management**
 - Ability to centrally apply and deploy standards for document transformation and archiving purposes.
- **Increased Productivity**
 - Provides essential services tightly integrated into the users' workflow
 - Automates document transformation removing error prone manual processes.
 - Reduces the burden on users to become document experts allowing them to focus on their core competency.

Document Transformation Technology

- **Standard product requires no modifications**
 - Reduces implementation costs
- **Standard integration tools**
 - Reduces current and future IT costs by utilizing Adlib's
 - WebServices Module
 - *Service-Oriented-Architecture* (SOA) compliant infrastructure
 - Metadata Rules Engine
 - SharePoint Integration Tools
- **Company Wide Deployment**
 - Enables standardization of procedures for document transformation
 - Reduce costs through SOA based application support

Server Based vs. Desktop

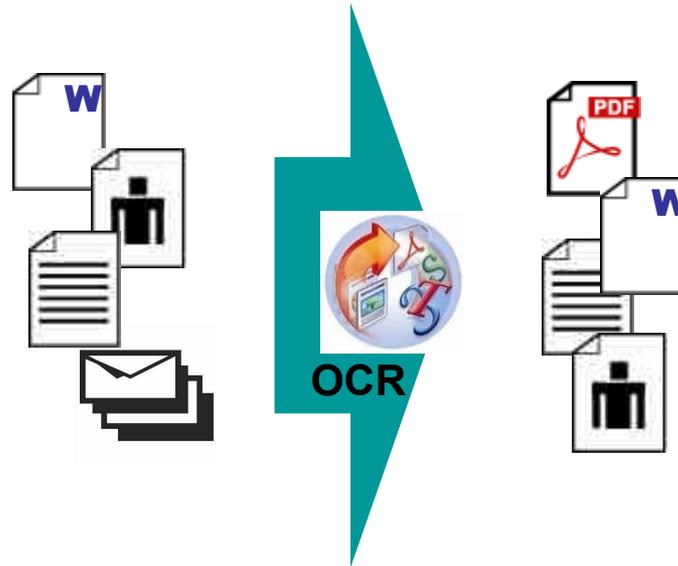

Document Transformation Technology

- **Centralized Control** – single server easily monitored
- **Automated** - enables multiple automated customized workflows
- **Easily Scalable** – unprecedented scalability by allowing multiple servers to be added as an organizations document processing volumes increase without effecting the original systems architecture or end-user processes.
- **Reliability** - client workstations unaffected by document workflows
- **Maintenance** - reduced number of licenses to Support

Transformation Workflow

Document Transformation Technology

- MS Office
 - Word
 - Excel
 - PPT
- Images
- PDF
- Web
- Email
- ZIP
- Legacy formats

- PDF
- PDF/A
- DOC
- RTF
- HTML
- Text
- TIFF
- JPG
- PNG

Document Transformation Technology

- **Conversion** - automatically convert over 300 file types into PDF, TIFF, PDF/A, PDF/X , XML & Text as part of any document workflow.
- **Recognition(OCR)** - converts static paper documents – faxes, photocopies, images and non-searchable PDF's into to searchable PDF documents.
- **Publishing** - assembles content from diverse sources and file formats into a single PDF document. Customize your PDF's by adding such things as watermarks, page numbers, headers, footers, disclaimers in order to create new documents that meet the needs of corporate guidelines and/or regulatory governance.
- **Extended Outputs-** allows companies to automatically convert PDF documents into other reusable type documents such as WORD, RTF, HTML, JPEG, PNG, and XPS. The Extended Output for XML provides users with a robust, open and trustworthy electronic paper format alternative to PDF.

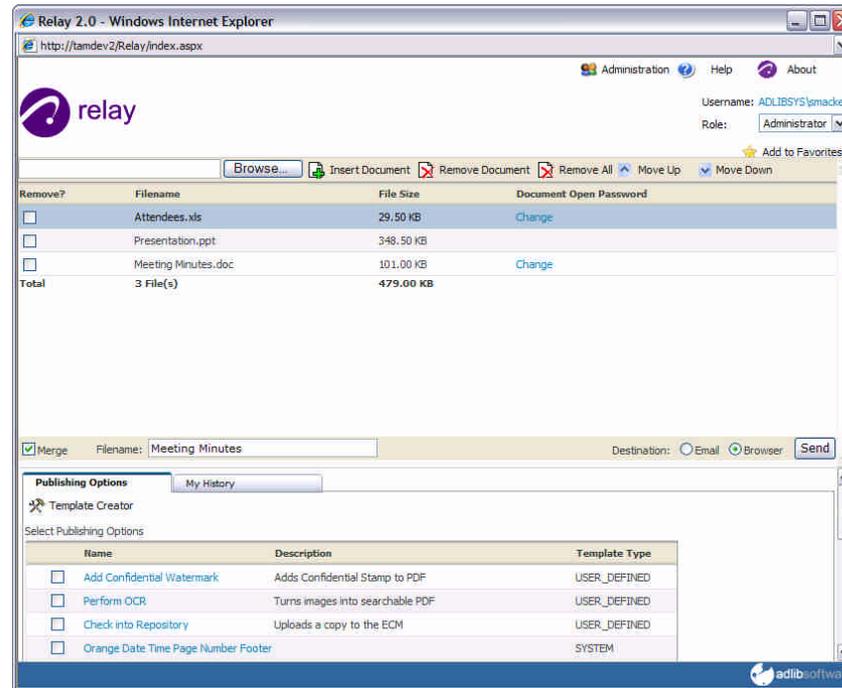

End-User Integration

Document Transformation Technology

Key Benefits

- Increased productivity of users
- Customizable interface
- Cost effective
- Easy to administer

Use a Web based browser to enable individual users to create ad hoc document conversions using templates to ensure all documents conform to company standards.

Ease Of Integration Options

Document Transformation Technology

:

- **Watched Folder**
- **Web Services**
- **Email**
- **XML Job Tickets**
- **End user access via Web browser**
