

After connecting to the F5, users may still get the security warning (looks something like this):

At the top of the browser window, near the address, you should see a lock symbol. You should click on the lock symbol and select **“view certificates”** You will see the following screen:

You should then click on “Install Certificate” and follow the default prompts from the certificate install wizard to install the certificate.

This should eliminate future security warnings from the F5.

Contact Shawn Naber at [shawn.naber@epa.state.oh.us](mailto:shawn.naber@epa.state.oh.us) if you still encounter the certificate error.
