**PUBLIC NOTICE
NOTICE OF RECEIPT OF 401 APPLICATION**

Public notice is hereby given that the Ohio Environmental Protection Agency (Ohio EPA) Division of Surface Water (DSW) has received an application for, and has begun to consider whether to issue or deny, a Clean Water Act Section 401 water quality certification for a project that would include the construction of a relocated gateway entrance at the intersection of National Rd. and Reese Drive. The project would also include piping three streams north of Fifth Street and south of First Street and construction of a storm water detention basin for storm sewer upgrades north of First Street and south of Kaufman Ave. The project also involves the construction of several new buildings, parking lots and street upgrades in association with a Base Realignment and Closure (BRAC) infrastructure improvement project. The application was submitted by the United States, Department of Air Force, 88 ABW/CEVO, Wright Patterson AFB, Ohio 45433. The project is located west of National Road, north of I-675 and south of State Route 444 in Area B Hilltop District of Wright-Patterson Air Force Base, Greene County, Ohio. The Huntington District of the U.S. Army Corps of Engineers number for this project is LRH-2007-00744-GMR. The Ohio EPA ID Number for this project is 073238.

As required by the Antidegradation Rule, rule 3745-1-05 of the Ohio Administrative Code (OAC), three alternatives have been submitted for the project. The applicant's proposed preferred alternative, if approved, would impact 0.052 acres of category 2 wetlands and enclose 2,905 feet of stream to construct new infrastructure and replace existing infrastructure in support of multiple mission activities relocating to Wright-Patterson Air Force Base (WPAFB), Ohio. The applicant's proposed minimal degradation alternative, if approved, would impact 0.052 acres of category 2 wetlands and impact 2,905 feet of stream by over-wide floodplain excavation, leaving 1,790 feet of stream as open channels. The applicant's proposed non-degradation alternative would have no direct impacts on streams and wetlands.

The discharges from the activity, if approved, would result in degradation to, or lowering of, the water quality of unnamed tributaries to Hebble Creek in the Mad River watershed. The review of the application will be conducted by Ohio EPA and a decision whether to grant or deny the application, in accordance with OAC Chapters 3745-1 and 3745-32 of the Ohio Administrative Code (OAC). In accordance with OAC rule 3745-1-05, an antidegradation review of the application will be conducted before deciding whether to allow a lowering of water quality. Other alternatives resulting in the lesser or no

degradation, or lowering of water quality, will be considered by Ohio EPA during the review process.

No exclusions or waivers, as outlined in Paragraph 3745-1-05 (D), of the Antidegradation Rule apply or may be granted by the Director of Ohio EPA.

Starting December 7, 2007, copies of the application for the certification and technical support information may be inspected at Ohio EPA-DSW, Lazarus Government Center, 50 West Town Street, Suite 700, Columbus, Ohio, by first calling (614) 644-2001. Copies of the application and technical support information can be made available upon request at Ohio EPA District Offices by calling the same number.
