**PUBLIC NOTICE  
NOTICE OF RECEIPT OF 401 APPLICATION**

Public notice is hereby given that the Ohio Environmental Protection Agency (Ohio EPA) Division of Surface Water (DSW) has received an application for, and has begun to consider whether to issue or deny, a Clean Water Act Section 401 water quality certification for a project to realign 900 linear feet of State Route 690 to avoid a landslide slip plane. The application was submitted by the Ohio Department of Transportation. The project is located five miles east of Athens on State Route 690 in Canaan Township (39.334722, -81.986944). The Ohio EPA ID Number for this project is 134180.

As required by the Antidegradation Rule, rule 3745-1-05 of the Ohio Administrative Code (OAC), three alternatives have been submitted for the project. The applicant's proposed preferred alternative, if approved, would impact 643 linear feet of intermittent, Class III stream and 270 linear feet of two ephemeral, Class I streams for a total of 913 linear feet of stream impact. The applicant's proposed minimal degradation alternative, if approved, would impact 60 linear feet of intermittent, Class III stream and 417 linear feet of two ephemeral, Class I streams for a total of 477 linear feet of stream impact. The applicant's proposed non-degradation alternative, if approved, would have no direct impacts on waters of the state.

Discharges from the activity, if approved, would result in degradation to, or lowering of, the water quality of three unnamed tributaries to Canaanville Run. Ohio EPA will review the application, and decide whether to grant or deny the application, in accordance with OAC Chapters 3745-1 and 3745-32. In accordance with OAC rule 3745-1-05, an antidegradation review of the application will be conducted before deciding whether to allow a lowering of water quality. All three proposed alternatives will be considered during the review process. No exclusions or waivers, as outlined by OAC rule 3745-1-05, apply or may be granted.
