Date of Public Notice: July 5, 2014

**PUBLIC NOTICE
NOTICE OF RECEIPT OF 401 APPLICATION**

Public notice is hereby given that the Ohio Environmental Protection Agency (Ohio EPA) Division of Surface Water (DSW) has received an application for, and has begun to consider whether to issue or deny, a Clean Water Act Section 401 water quality certification for a project to construct a Modified Record Fire (MRF) Range and a Multipurpose Machinegun (MPMG) Range. The projects will help upgrade current firing range capability within the property limits of Camp Ravenna. The application was submitted by the United States Property and Fiscal Officer for Ohio. The project is located at 1438 State Route 534, Newton Falls. The Pittsburgh District Corps of Engineers Public Notice Number for this project is 14-26. The Ohio EPA ID Number for this project is 144371.

As required by the Antidegradation Rule, 3745-1-05, of the Ohio Administrative Code (OAC), three alternatives have been submitted for the project. The applicant's proposed preferred alternative, if approved, would impact 13.12 acres of jurisdictional category 1 and 2 wetlands. The preferred alternative stream impacts consist of 1,864 linear feet of intermittent and ephemeral streams. The applicant's proposed minimal degradation alternative, if approved, would impact 7.45 acres of jurisdictional category 1 and 2 wetlands. The minimal degradation alternative stream impacts consist of 496 linear feet of intermittent and ephemeral streams. The applicant's proposed non-degradation alternative, if approved, would have no direct impacts on waters of the state.

Discharges from the activity, if approved, would result in degradation to, or lowering of, the water quality of the Mahoning watershed. Ohio EPA will review the application, and decide whether to grant or deny the application, in accordance with OAC Chapters 3745-1 and 3745-32. In accordance with OAC rule 3745-1-05, an antidegradation review of the application will be conducted before deciding whether to allow a lowering of water quality. All three proposed alternatives will be considered during the review process. No exclusions or waivers, as outlined by OAC rule 3745-1-05, apply or may be granted.

Starting July 5, 2014, copies of the application and technical support information may be inspected on Ohio EPA-DSW website: www.epa.ohio.gov/dsw

Persons wishing to 1) be on Ohio EPA's interested parties mailing list for this project, 2) request a public hearing, or 3) submit written comments for Ohio EPA's consideration in reviewing the application should do so in writing to Ohio EPA-DSW, Attention: Permits Processing Unit, P.O. Box 1049, Columbus, Ohio 43216-1049 within thirty days of the date of this public notice.
