**PUBLIC NOTICE
NOTICE OF RECEIPT OF ISOLATED WETLAND PERMIT
APPLICATION (LEVEL 2)**

Public notice is hereby given that the Ohio Environmental Protection Agency (Ohio EPA) Division of Surface Water (DSW) has received an application for, and has begun to consider whether to issue or deny, an Isolated Wetland Permit (Level 2) for a project to increase acreage to the surrounding agricultural land, impacting 0.84 acres of Category 2 wetlands. The application was submitted by Nathan McClarren. The project is located at the southeast corner of the intersection of County Road 13 and County Road H, Wauseon. The Ohio EPA Number for this project is 144404.

The review of the application will be conducted, and a decision whether to grant or deny the application will be made, in accordance with Ohio Revised Code (ORC) Sections 6111.02 to 6111.028 and other applicable provisions of state laws. Other alternatives as proposed by the applicant resulting in less adverse impact to the isolated wetland ecosystem, will be considered by Ohio EPA during the review process.

Starting October 2, 2014, copies of the application and technical support information may be inspected at Ohio EPA/DSW, Lazarus Government Center, 50 West Town Street, Suite 700, Columbus, Ohio, by first calling (614) 644-2001. Applications can be made available at Ohio EPA District Offices by calling the same number.

Persons wishing to 1) be on Ohio EPA's interested parties mailing list for this project, 2) request a public hearing, or 3) submit written comments for Ohio EPA's consideration in reviewing the application should do so in writing to Ohio EPA/DSW, Attention: Permits Processing Unit, P.O. Box 1049, Columbus, Ohio 43216-1049 within 20 days of the date of this public notice.

**PUBLIC NOTICE - PUBLIC HEARING
ROLLING HILLS GENERATING LLC
Issuance of Draft Air Pollution Permits-to-Install,
Issuance of Proposed National Pollutant Discharge Elimination
System Permit Modification**

Notice is hereby given that on October 3, 2014, the Ohio Environmental Protection Agency (Ohio EPA), 50 West Town Street, Columbus Ohio, Division of Air Pollution Control issued two draft Permits-to-Install (permit numbers P0110152 and P0110708) and Ohio EPA Division of Surface Water issued a proposed National Pollutant Discharge Elimination System (NPDES) permit modification (No. 01B00036*CD) to Rolling Hills Generating LLC, 43111 State Route 160, Wilkesville, OH 45695.

Comment Period and Public Hearing:

Ohio EPA is providing an opportunity for the public to comment on the permits. Comments received shall be considered by the director before a final decision on the permits. To be part of the official record, all comments must be received at Ohio EPA by 5 p.m., December 11, 2014.

A public information session and hearing will be held at 6 p.m. on Thursday, December 4, 2014 at the Wilkesville Community Center, 164 Main Street, Wilkesville, OH 45695. The meeting will end when everyone in attendance has had an opportunity to comment on the permits.

Surface Water Action:

The proposed NPDES modification, if issued as a final action, would authorize the discharge of cooling water blow down and other power plant discharges via a new 16-mile-long outfall pipe from the existing plant site through Vinton, Gallia and Meigs counties to the Ohio River near Middleport, Ohio. An application for a permit to install for the wastewater treatment systems and the outfall pipe would be submitted to Ohio EPA for review and approval after a final action on the NPDES permit.

The new discharges from the facility, if approved, would result in degradation to, or lowering of, the water quality in the Ohio River; however, the chemical-specific water quality criteria developed to protect aquatic life and human health, as set forth in Ohio Administrative Code (OAC) 3745-1-07 will not be exceeded.

Comments regarding the proposed NPDES permit modification may be presented at the hearing or mailed to: Ohio EPA-DSW, attn.: Permits Processing Unit, P.O. Box 1049, Columbus, Ohio 43216-1049 or dswcomments@epa.ohio.gov. Please include DSW Public Notice No. 14-10-021 with your comments.

Air Pollution Permit:

The draft permits propose to allow the modification of four turbines to combined cycle blocks with heat recovery steam generators and duct burners, and installation of two new cooling towers.

This facility is subject to the applicable provisions of the Prevention of Significant Deterioration (PSD) regulations as promulgated by U.S. EPA (40 CFR 52.21) and the Ohio EPA permit-to-install requirements (OAC 3745-31). The proposed allowable PSD pollutant air emission rates are listed below, in tons per year.

Pollutant	Tons/yr (Scenario 1)	Tons/yr (Scenario 2)
PM	247	360
PM ₁₀ /PM _{2.5}	234	347
NO _x	435	450
CO	5074	5102
VOC	611	601
H ₂ SO ₄	7.97	8.39
CO ₂ e/GHG	4,901,000	5,177,000

The U.S. EPA allows sources to consume no more than the maximum available ambient PSD increment(s) for each PSD pollutant. The Ohio EPA allows PSD sources to consume less than one half the available increment. This facility has demonstrated that the impact from the source is less than one half the available PM_{2.5} increments, and is less than the PSD significant impact increments for NO₂ (1 ug/m³ annual) and PM₁₀ (1 ug/m³ annual; 5 ug/m³ 24-hour). There are no PSD increments for NO₂ (1-hour) or CO. For these pollutants, Ohio EPA only allows a source to have impacts up to one quarter of the National Ambient Air Quality Standards. Based on this analysis, the project complies with the requirements.

Copies of the draft permits may be reviewed at <http://epa.ohio.gov/dapc/permitsonline.aspx> by entering the permit numbers. Additional information, including applications and technical support information, is available by first calling (740) 385-8501.

Comments concerning the draft air permits may be presented at the hearing or mailed to: Sarah Harter, Ohio EPA DAPC-SEDO, 2195 Front Street, Logan, OH 43138 or sarah.harter@epa.ohio.gov.
