

RABQSA CERTIFIED AND IATCA RECOGNIZED

***ENVIRONMENTAL MANAGEMENT SYSTEMS (EMS) LEAD AUDITING
USING ISO 14001***

Each five-day class covers the following sections of the student reference manual:

- ❑ Introduction to Environmental Management
- ❑ Understanding and Reducing Environmental Impacts
- ❑ Comparison of EMS Standards (including ISO 14001 and EMAS)
- ❑ Assessing Environmental Impacts
- ❑ Environmental Policy, Objectives and Targets
- ❑ The EMS Audit
- ❑ Audit Planning and Preparation
- ❑ Environmental Legislation and Regulation (USA)
- ❑ Documenting the EMS
- ❑ Performing the Audit
- ❑ Environmental Education and Training
- ❑ Reporting the Audit
- ❑ Corrective Action and Follow-up
- ❑ Monitoring, Reporting and Improving Environmental Performance
- ❑ Registration, Accreditation and Auditor Certification

The Workshops (some of which include role play) are entitled:

- ❑ Assessing Environmental Impacts
- ❑ Environmental Policy
- ❑ Objectives and Targets
- ❑ Writing a Checklist
- ❑ Opening Meeting
- ❑ Audit Investigation
- ❑ Writing Nonconformity Statements
- ❑ Closing Meeting
- ❑ Reporting the Audit
- ❑ Corrective Action

This class is certified by the RABQSA and recognized by International Auditor and Training Certification Association (IATCA) so Alumni earning a certificate of successful completion can progress with EMS auditing experience to register as an RABQSA certified EMS Lead Auditor and IATCA certified EMS Senior Auditor.

Even though ISO 14001 is used as the model for teaching audit, this class enables students to develop and apply their audit skills using any recognized management system standard according to their experience.
